

**Charles R. Drew University of Medicine and Science positively transforms underserved communities.** As a community-founded health professions higher education institution, CDU has a special mission and a special relationship with the under-resourced areas of Los Angeles County and others like it around the nation and the world. Born from the ashes of the Watts Revolt in 1965 and still located in South Los Angeles, CDU doesn't define health solely as the absence of illness in the individual. We take a broader, community view of health in order to empower, strengthen and positively transform disadvantaged communities through:

- Research designed to eliminate health disparities
- Direct intervention and outreach into these communities
- Recruitment of students who share our passion for social justice and health equity and have a drive to be health professions leaders and practitioners in under-resourced areas
