University Catalog
2015-2016
ACCREDITATION

Charles R. Drew University of Medicine and Science is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100; Alameda, CA 94501; (510) 748-9001. WASC granted Charles R. Drew University its regional accreditation in 1995.

Charles R. Drew University is approved by the State of California Council for Private Postsecondary and Vocational Education to grant a Doctor of Medicine degree in cooperation with the Board of Regents of the University of California.

The Liaison Committee on Medical Education (LCME) accredits the Drew/UCLA Medical Education Program through the UCLA School of Medicine.

The College of Science and Health programs are accredited by the following agencies:

- Council on Education in Public Health (CEPH)
- Joint Review Committee on Education in Radiologic Technology (JRCERT)

The Mervyn M. Dymally School of Nursing MSN program is accredited by the Commission on Collegiate Nursing Education (CCNE). The Entry Level Masters (ELM) Track is approved by the California Board of Registered Nursing (BRN).

VETERANS ADMINISTRATION

Charles R. Drew University is approved for the training of veterans and eligible persons by the California State Approving Agency for Veterans Education (CSAAVE) under the provisions of Title 38, United States Code. Veterans and dependents are required to comply with VA regulations in regards to required class attendance and acceptable academic progress.

NON-DISCRIMINATION POLICY

Charles R. Drew University of Medicine and Science (CDU) has zero tolerance for any form of discrimination and/or harassment including, but not limited to, discrimination and/or harassment on the basis of race, color, sex, sexual orientation, gender, gender identity, gender expression, age (over 40), physical handicap, disability, national origin, ancestry, marital status, medical condition, military or veteran status, genetics or religion. CDU does not prohibit use of any language unless such prohibition is required for business or academic purposes. CDU will reasonably accommodate any employee or job applicant that requires such an accommodation. CDU will not retaliate against any employee, applicant, or student because they have engaged in protected activity.

CDU supports, and is in compliance with, Title IV, Title VI, Title VII, Title IX, Clery Act, Violence Against Women Act, SaVE Act, American with Disabilities Act, California Fair Employment and Housing Act, and all other applicable State and Federal Statutes.

EFFECTIVE CATALOG DATES

This Catalog is in effect from Fall Semester 2015 through Summer Semester 2016.

COVER DESIGN

The cover page highlights the University’s 50th Anniversary.

BUREAU FOR PRIVATE POSTSECONDARY EDUCATION

An individual may contact the Bureau for Private Postsecondary Education for review of a complaint. The Bureau may be contacted at 2535 Capital Oaks Drive, Suite 400, Sacramento, CA 95833, (http://bppe.ca.gov/), tel. no. 916-431-6959 and fax no. 916-263-1897.

CATALOG STATEMENT

This Catalog reflects information available as of the date of publication. Policies, regulations, tuition and fees in this Catalog are subject to change and do not constitute an irrevocable contract between any student and Charles R. Drew University of Medicine and Science. Policy updates will be posted on the website and made available to students via email.

While CDU adheres to the terms of program offerings as stipulated in this catalog, circumstances including change in professional associations and/or accrediting agencies’ requirements may require course substitution, course changes, and/or course addition. Should this unanticipated situation occur, CDU will ensure that such changes do not require additional cost on the affected students.

Charles R. Drew, MD (1904 - 1950)
A Life Committed to Excellence

Charles R. Drew University of Medicine and Science is named in honor of a most distinguished African American surgeon whose research and groundbreaking accomplishments in the collection and storage of blood plasma became the foundation and model for today’s system of blood donation and preservation.

Charles Richard Drew’s life was characterized by a strong commitment to excellence. He won a scholarship to Amherst College, Massachusetts, after attending Dunbar High School in Washington, D.C., where he had been voted most popular boy, and best all-round athlete in his senior year. At Amherst, he excelled in athletics, winning the Pentathlon trophy all four years, and the Mossman trophy, for the athlete bringing greatest honor to the school.

Charles R. Drew was an athletic coach and biology teacher at Morgan College, Baltimore, before going on to medical school at McGill University in Canada, where he graduated with his Doctor of Medicine and Master of Surgery degrees in 1933. He was an Alpha Omega Alpha scholar at McGill, and winner of the J. Francis Williams Fellowship in Medicine, awarded on the basis of a competitive examination given annually to the top five students in the graduating class.

Dr. Drew returned to Washington D.C. to do a residency in surgery at Freedmen’s Hospital (later Howard University Medical Center). A Rockefeller Foundation Fellowship took him to Columbia-Presbyterian Medical Center, where his exhaustive research provided the background for his doctoral thesis: Banked Blood: A Study in Blood Preservation. He was the first African American to earn the postgraduate Doctor of Science in Medicine (M.D. Sc.) degree.

At the outbreak of World War II, Charles R. Drew provided crucial assistance to the war effort in Britain by developing and directing a successful blood collection and storage project in response to a request from his former McGill professor, Dr. John Beattie. The “Blood for Britain” program was an organization of several hospitals involved in uniform procedures for recruiting donors, collecting blood, and processing and supplying plasma to the British Red Cross. Thousands of lives were saved on the battlefield through the new storage techniques, and Charles R. Drew was subsequently appointed Director of the first American Red Cross blood bank, establishing an effective program for the U.S. Armed Forces. He later resigned the post to protest the military’s practice of maintaining segregated blood banks.

Charles R. Drew returned to Howard in 1941 to head the department of Surgery, and in 1944 became Chief of Staff at Freedmen’s Hospital. That year, he was awarded the SPINGARN medal by the NAACP for his “outstanding work in blood plasma.” Charles R. Drew’s pioneering work had earned him several honorary degrees and appointments on national scientific committees. On his way to a scientific meeting in Tuskegee in 1950, Charles R. Drew died as a result of an automobile accident from severe injuries sustained at the wheel of his car.

Dr. Charles R. Drew left behind a wife, four children, and a legacy of deep compassion and devotion to excellence and civil liberties for all.
A Message from the President

Greetings,

Welcome to Charles R. Drew University of Medicine and Science (CDU). These pages contain the University’s Catalog of courses that lead to graduation, taught by an impressive faculty that is dedicated to every single student’s success. Consider this university home, an academic home with a unique history and a distinct mission.

*The CDU Mission,* The University develops a diverse group of health professional leaders who seek social justice, promote wellness, provide care with excellence and compassion, and are uniquely qualified to transform the health of underserved populations through outstanding education, research and clinical services in the context of community engagement. Our Mission does not exist on paper. It lives in the hearts of those who teach here, who work here and who study here. It springs out of the teaching, research and clinical practice that occur here.

This calling prepares students to heed our Mission of helping underserved and under-resourced populations who depend upon our graduates for providing health services they cannot afford. The Mission compels us to reach out to these populations with excellence, compassion, dedication, kindness, patience and caring, while using the latest research and clinical practice techniques. Through this undertaking, our success is measured.

For nearly 50 years, Charles R. Drew University of Medicine and Science has graduated more than 4,000 health professionals from our College of Medicine, College of Science and Health and Mervyn M. Dymally School of Nursing. CDU has earned designation as a minority-serving institution by the U.S. Office for Civil Rights, and its College of Medicine is recognized by the Department of Education as a Historically Black Graduate Institution. The University is also a charter member of the Hispanic Serving Health Professions Schools. CDU is recognized as a leader in translational and health inequities research, specifically with respect to heart disease, diabetes, cancer, mental health and HIV/AIDS. It fills a void in an area that desperately requires medical attention. South Los Angeles residents are more likely to suffer from these ailments than anywhere else in the county, and choose from fewer doctors for treatment.

This need for medical services helps explain why the courses outlined in this Catalog, and the education offered at this University, are so critical. The mission does not stop outside our doors, as the University serves local, national and international communities.

A wide range of students, diverse through gender, race and ethnicity, are drawn to this University. Tour the campus and you will see and understand why Charles R. Drew University of Medicine and Science represents the future of health care and the health professions. It’s unlike any other academic health sciences institution in the nation.

Students are embraced here, making CDU more than home. It’s family.

Welcome to the family.

Jackie Brown
Chief of Staff
Greetings students, faculty, staff, and members of our campus community!

The Academic Senate would like to cordially welcome all of you to Charles R. Drew University of Medicine and Science. Our university is a richly diverse institution blessed with the most dedicated faculty you will find, working together to develop and maintain the highest in quality academic programs for its students. The energy and passion of our faculty and students and the resulting synergy creates new ideas, fresh perspectives and lively discussion that are the lifeblood of a university.

At Charles R. Drew University, you will find faculty doing cutting edge research and directly applying the benefits of their disciplines to helping underserved populations, both locally and abroad. We are nationally recognized for our research enterprise and in 2009, were ranked among the top 50 American private research universities in total federal research funding. Many former fellows and faculty have become national leaders in education, government services, research institutions, and clinical enterprises.

As the Academic Senate, we are the proud voice for our dedicated faculty, serving as a cross-campus legislative body and as the official representative of the faculty to the President and the Board of Trustees on matters relating to academic policies and programs. The Academic Senate serves as advisors to the administration through the process of shared governance in ensuring the success of the University’s mission in teaching, research and service. Needless to say, the Academic Senate takes this charge very seriously, and we are confident that with the support of our entire faculty from the three colleges and schools, we can strive to reach our fullest potential.

Yours Sincerely,

Mohsen Bazargan, PhD
President
Academic Senate
University Overview

Vision
Excellent health and wellness for all persons, people and communities, in a world without health disparities.

Mission
The University develops a diverse group of health professional leaders who are committed to social justice, promote wellness, provide care with excellence and compassion, and are uniquely qualified to transform the health of underserved populations through outstanding education, research and clinical services in the context of community engagement.

University Student Learning Outcomes
Upon graduation from Charles R. Drew University of Medicine and Science, graduates will be able to demonstrate the following:

- Demonstrate excellence in their chosen field of study.
- Evaluate, use and/or conduct research.
- Demonstrate compassion and cultural sensitivity, with a special commitment to serving diverse and underserved populations.
- Demonstrate responsible, empathetic and ethical professional behavior.

History of the University
Charles R. Drew University is a private, nonprofit, nonsectarian, minority-serving medical and health science institution established in 1966. The University (then a “postgraduate medical school”) was conceived during planning discussions in 1963. However, real progress to establish the University was not made until the McCone Commission cited poor health status and diminished access to healthcare among the major factors fomenting the 1965 civil unrest in Watts. Charles R. Drew University, which continues to serve as the only academic health sciences center for the area’s 1.5 million people, is the only designated minority-serving health sciences university in a county of more than 10 million people, 70 percent of whom are from minority communities. Defined as a Minority Serving Institution by the Office of Civil Rights, the University is recognized by the Department of Education under subsection (a), Title III B Section 326 as a Historically Black Graduate Institution (HBGI). The University is a founding member of the Hispanic Serving Health Professions Schools, a national nonprofit dedicated to improving the health of Hispanic people through research initiatives, training opportunities, and academic development. Since being founded in 1966, CDU has graduated more than 5,400 health professionals—including 650 physicians, 2,700 postgraduate physician specialists, 1,200 physician assistants, 380 MSN prepared nurses and family nurse practitioners, and hundreds of other health professionals.

Charles R. Drew University maintains an academic focus that emphasizes a primary care approach to both healthcare and community relations. Guided by its mission, Charles R. Drew University continues to promote community-based programs in the context of a collaborative model for teaching, research and service.

University Mascot
The CDU Mighty Lion mascot was created to promote school spirit, pride and an overall identity for the institution. The Lion is the king of the jungle - wise, brave, and protective; characteristics of a leader. CDU students strive to be leaders in the health field just like Dr. Charles R. Drew, a brilliant African-American physician known as a pioneer for his work with blood preservation. The Lion possesses a strong, positive nature and does not retreat from adverse circumstances. Strength, determination and courage are characteristics affiliated with the Lion and with CDU students who are passionate about fulfilling the University’s mission to effect change in underserved communities.

University Colors
The University colors are black and gold.
Diversity as a University Value

The University values cultural diversity in its faculty, staff and student body, as well as in its academic programs. The evolution of the University demonstrates its unique ability to create and carry out educational methods that accommodate a variety of learning styles. As a result of the demographic changes in underserved communities, the range of knowledge and skills necessary to provide effective healthcare services to these communities has increased enormously. The challenge for the University has been to increase awareness and to recruit, educate and retain a diverse student body. Consequently, the University has implemented strong academic programs to meet the increasing and changing educational needs of current and potential students.

The University believes that knowledge and compassion are essential for success in a multicultural institution. Therefore, development of a curriculum that includes courses focusing on multicultural issues affords an educational opportunity for our students to learn about themselves as well as other groups and cultures. This approach to education enables our students to appreciate themselves better as well as the differences and commonalities of other groups and cultures.

The University seeks to respond to the future needs of a diverse student body and changing community by identifying and committing specific resources to preparation, recruitment and retention of interested students.
Academic Policies

Academic Degree and/or Certificate
Academic degree and/or certificate will be issued to any Charles R. Drew University graduate upon verification of completion of degree/certificate requirements. Students must file the Degree Completion form and obtain all approvals prior to submission to the Registration and Records Office. Duplicate or replacement diplomas and certificates may be requested in writing from the Registrar. There is a fee charged for each duplicate diploma or certificate. Contact the Registration and Records Office for complete details.

Academic Dishonesty
Defined as any academic act, which intentionally violates the trust upon which the pursuit of truth is based. The sections that follow illustrate key areas in which academic dishonesty should be watched for and eliminated:

- **Examination Behavior:** During didactic training, any behavior that involves external assistance is considered academically dishonest, unless expressly permitted by the instructor. Specific violations that are considered unacceptable during an examination include communicating in any way with another student during the examination, copying material from another student's examination, and using unauthorized notes or other devices during an examination.

- **Fabrication:** Any intentional falsification or invention of data or of a scholastic citation in an academic exercise is considered a violation of academic integrity. Acts of fabrication include altering existing data and resubmitting returned and corrected academic work under the pretense of grader evaluation error when, in fact, the work has been altered from its original form.

- **Plagiarism:** The appropriation and subsequent passing off of another's ideas or words as one's own is plagiarism. If the words or ideas of another are used, acknowledgment of the original source must be made through recognized referencing practices. Any use of a direct quotation must be acknowledged by footnote citation and by either quotation marks or appropriate indentation and spacing. If another's ideas are borrowed in whole or in part and are merely recast in the student's own words, proper acknowledgment must be made; a footnote or proper internal citation must follow the paraphrased material.

- **Other Types of Academic Dishonesty:** The following activities are also considered violations of the University's academic integrity policy: submitting a paper written by or obtained from another, using a paper or essay in more than one class without the instructor's express permission, obtaining a copy of an examination in advance without the knowledge and consent of the instructor, using another person to complete homework assignments or take home examinations without the knowledge and/or consent of the instructor, altering academic records, using electronic devices to perform coursework or during an examination without the express permission of the instructor.

Academic Integrity
As members of the academic community, faculty, students, and administrative officials share the responsibility for maintaining a productive environment. Faculty has the primary responsibility for establishing and maintaining an atmosphere and attitude of academic integrity such that the University may flourish in an open and honest way. Students share responsibility for maintaining standards of academic performance and classroom behavior conducive to the learning process. Administrative officials are responsible for the establishment and maintenance of procedures to support and enforce these academic standards.

Academic Load
A full-time academic load for undergraduate students (degree or certificate seeking students) is defined as 12 units per semester.

A full-time academic load for graduate students is defined as 9 units per semester. Six units is considered part-time academic load for graduate students.

Undergraduate students enrolled in less than 12 units/semester are considered part-time students. Undergraduate students may enroll for a maximum of 21 semester units if:

1. they have earned a minimum GPA of 3.3 on all work pursued during the previous semester;
2. they have not received any grade less than a “C”; and
3. they are recommended by their Program Director to the Dean.

Course Load for Students on Academic Probation
Undergraduate or certificate students on initial scholastic probation, extended scholastic probation, or...
who are returning to the University after a period of absence caused by academic suspension will be allowed to pursue a maximum of 15 semester units during any semester until their cumulative GPA has been restored to at least 2.0 on a 4.0 scale.

**Course Load for Conditional Students**

Students admitted conditionally will be permitted to register for one semester as full-time students.

**Academic Probation**

Undergraduate students will be placed on academic probation if their GPA for the semester is less than 2.0 on a 4.0 scale, or if their cumulative GPA, computed by the total of all courses undertaken, is less than 2.0 on a 4.0 scale. Please see the probation policies of each academic program for more details.

Graduate students will be placed on academic probation if the semester or cumulative GPA falls below 3.0. Each graduate program may have additional criteria, which may place the student on academic probation. For more details, see the requirements listed for the specific graduate program.

Students who fail to achieve the required academic standards while on academic probation will be dismissed from the program and university.

Students may appeal an academic dismissal and should discuss the preparation of such an appeal with their Program advisor.

In the College of Science and Health, the Student Academic Performance, Promotion and Judiciary Committee (SAPPIC) reviews all appeals and makes final determinations unless the Dean disagrees with the process or decision. In such cases, the Dean may appoint an ad hoc committee to review the appeal. The decision of the ad hoc committee is final and the Dean will so inform the student in writing.

Students who withdraw from the University while on academic probation will be automatically dismissed. Students who have been dismissed or who have withdrawn while on academic probation may not be readmitted as full-time students until they have been separated from the College of Science and Health for at least one semester.

In the Mervyn M. Dymally School of Nursing (MMDSON), a graduate student is subject to academic probation if a cumulative GPA of at least 3.0 (B) is not maintained. A listing of students subject to probation will be reviewed each semester by the MMDSON. The MMDSON will, with the advice of the Student Advisor, disqualify a graduate student who is on academic probation if the student does not, or cannot, raise the study plan course work cumulative GPA to 3.0 by the completion of the second semester following the session in which the cumulative GPA failed to meet the minimum 3.0 standard. A student who has been disqualified from a master’s degree program may apply for readmission to that program or any other after one calendar year following disqualification. A new study plan must be filed; any student who wishes to use previous course work must have it approved by the MMDSON. Disqualification will remove a student from graduate standing and prevent further enrollment in the University.

Students experiencing academic difficulty are encouraged to enter into a Learning Contract with their Advisor to identify problem areas and develop a strategy to achieve academic/course requirements.

A graduate student may be placed on probation, or may be disqualified, for reasons other than cumulative GPA. These reasons include repeated withdrawal, failure to progress toward an educational objective, noncompliance with an academic requirement, and inappropriate behavior as defined in the Academic Dishonesty sections of the University Catalog. Students on probation must meet with their advisor to discuss strategies to achieve and maintain a “B” average. Students on probation at the close of their last semester remain on probation.

Students dismissed for ethical or behavioral reasons may not be readmitted. Special conditions may apply. Tuition and fees will be refunded according to the University refund policy.

**Attendance**

1. Instructors shall take attendance throughout the term, commencing on the first day of class and continuing throughout the term, by verifying that the students in attendance in class appear on the official class roster.

2. The Office of Registration & Records provides up-to-date class rosters via MyCDU Self-Service portal. Rosters can be printed, downloaded to Excel or viewed online in MyCDU.

   a. On an interim basis, the Registrar will provide printed or electronic class rosters to the Deans’ Offices for distribution to instructors as follows:
i. First Day of Classes (Monday of Week 1)
ii. Second Week of Classes (Monday of Week 2)
iii. End of Add/Drop/Late Registration period (Monday of Week 3)
iv. At Census (Monday of Week 4)

3. Students attending class and not appearing on the roster as of Week 3 must be sent to the Office of Registration & Records to determine their status and eligibility to enroll in class.

4. All students attending class as of the Census date must appear on the official class roster. No student shall be permitted to attend class who does not appear on the Census Roster.

5. Instructors may use discretion in determining the most efficient manner to take attendance (i.e. sign in sheet, roll call, etc.).
   a. Students not appearing on the official class roster shall be informed that they are not officially enrolled in class and must take appropriate steps to become enrolled or must stop attending class.
   b. Attendance in virtual, asynchronous or self-paced classes will be determined by submission of required assignments by the due dates. A student would be considered absent if an assignment is not received by the due date.
   c. Students’ attendance shall be recorded in the Attendance feature of MyCDU Portal.
      i. Such report must be made within 72 hours of the class meeting.
      ii. The Registrar will follow up with instructors who report students as being absent as an initial step to commencing the Administrative Drop process.

6. The instructor shall have the authority to execute an Administrative Drop for any student who is absent three (3) or more consecutive class meetings without instructor approval. The student must make every effort to dialog with the instructor regarding his/her absence.
   a. Prior to filing an Administrative Drop, the instructor will contact the Retention Coordinator.
   b. The instructor may forward the Administrative Drop form to the Office of Registration and Records.

   Administrative Drops will be processed as follows:
   1. Within the first two (2) weeks of the term, the student will be dropped without record of enrollment.
   2. After week two (2) and before the published deadline to withdraw, a grade of “W” shall be recorded on the student’s record.
   3. After the published deadline to withdraw, the grade of “U” shall be recorded on the student’s record.
      ii. In each of the above instances, the Last Date of Attendance as reported by the instructor shall be recorded on the student’s record and will be used by the Financial Aid Office to calculate any required repayment of aid as per Federal regulations.

Vacations
The University does not have regularly scheduled vacations for faculty or students. Vacations may be taken during semester breaks and during the spring break.

Holidays
The University observes nine holidays each year. Students on clinical rotations may occasionally observe a different holiday schedule. Students on clinical rotation may be required to make up holiday time and are asked to check their respective program policy regarding holidays.

Sick Leaves
Students who are absent three or more days due to illness may be required to present a doctor’s statement to their instructor documenting the illness and the expected date of return. Students MUST make contact with the instructor prior to the third day of absence or risk being administratively dropped from the class. The
doctor’s note becomes part of the student’s file. Students are responsible for the material covered during the period of their illness and must make up all days in clinical rotation missed as a result of their illness.

Tardiness
Tardiness by students is discouraged in both didactic courses and on clinical rotations. Each instructor will determine a class tardiness policy and make this policy known to each class by recording it in the course syllabus.

Leave of Absence
A Leave of Absence may be granted through the individual academic programs for personal, medical or military purposes. Only one Leave of Absence per student is permitted. Documentation of these mitigating circumstances must be provided and submitted with the Leave of Absence form. To petition for a Leave of Absence, a student must meet with the Program Director and complete the Leave of Absence Form (available in the Office of Registration & Records). Conditions of the Leave of Absence are handled by the individual program with review by the Dean. Students must be in good academic and professional standing to be considered for a Leave of Absence. The student must be fully accepted to the University prior to requesting a Leave of Absence, without any outstanding provisions of a conditional acceptance. To comply with Federal Department of Education regulations, a Leave of Absence will not be granted for longer than 180 days.

A student’s return to the program earlier than the time indicated is contingent upon space availability and scheduling in the program. Extensions of leave will be reviewed and approved by the individual program. The maximum time of a Leave of Absence is 180 days, inclusive of approved extensions. If the student does not return at the time indicated and an extension has not been approved, the student will be withdrawn from the University.

Students wishing to return to CDU to resume their studies may do so under several conditions. In order to be considered for return from leave, a student must first obtain a Petition to Return from Leave of Absence. This Petition to Return from Leave of Absence requires information from the student regarding the intended semester of return, current address information and information about their leave. This petition must be submitted to their academic department at least eight (8) weeks prior to the beginning of the semester of planned study.

The Petition to Return from Leave of Absence requires approval of the student’s academic department and Dean. If a student’s department chooses to deny the student’s Petition to Return from Leave of Absence, the student may appeal to his/her Dean.

Students who have taken courses elsewhere must submit an official transcript and course descriptions with their Petition to Return from Leave of Absence. Transfer credit approval is determined by the academic department based on course level, performance and appropriateness to the student’s curriculum requirements. Transfer credit is subject to college-specific policy. Failure to submit the necessary documents at the time of return will result in denial of transfer credit.

The process of returning from a Leave of Absence is not completed until all necessary signatures on the Petition to Return from Leave of Absence are obtained by the student and all outstanding financial obligations are settled with the Finance Office. The Registrar’s Office will then notify the appropriate University offices of the student’s return.

It is the student’s responsibility to make arrangements regarding their financial aid and student account. Students must meet with the Office of Financial Aid & Scholarships to understand the potential financial implications of the Leave of Absence.

Classification of Students
- Freshman: An undergraduate student who has completed less than 30 units.
- Sophomore: An undergraduate student who has completed 30 to 59 units.
- Junior: An undergraduate student who has completed 60 to 89 units.
- Senior: An undergraduate student who has completed 90 or more units.
- Non-Matriculating Student: A student who has been granted permission to enroll in classes for a single semester without being accepted to a degree or certificate program.
- Graduate Student: A student who has been admitted to a graduate program.

Unit Requirement
Total units required for the Associate of Science, Bachelor of Science, graduate degrees and professional certificates vary by program.

Residence Requirement
Prior to receiving an Associate of Science degree, students must have completed at least half of the total units required for degree completion in their program in
residence. Prior to receiving a Bachelor of Science degree, students must have completed a total of at least 63 units in residence (including at least half of these in the required major).

The residency requirement for Master programs varies by program. See the Urban Public Health program or Nursing program sections of this Catalog for details.

Final Examinations
A final examination is required in each course during the scheduled examination period, except in those courses in which the program has previously determined that no examination will be given. Since the final examination week is part of the semester hour requirement, the period scheduled for final examinations is used either for the final examination in the course or as an instructional period.

Repeating Final Examinations
Excluding competency-based skills development courses, clinical learning courses or courses in which there is no scheduled final examination, an undergraduate student achieving a final course grade of C- or lower can request one retake of the final course examination if both of the following conditions exist:

1. The student has achieved a passing grade (as determined by the criteria of the program of matriculation) for all coursework completed prior to the final course examination; and

2. The student has not been absent without valid and approved reasons from more than 25 percent of all scheduled class sessions.

Where the aforementioned conditions exist, the student will have the request granted if either of the following reasons are applicable:

1. The student has experienced personal illness (as documented by physician certification); or

2. The student has encountered family illness or extenuating circumstances (e.g., death in the family or financial hardship). The student must provide documentation to support the request.

Students must request re-examination in writing within seven days of grade posting. The re-examination will be administered to the student 15 days after receipt of the request. In all cases, the final course grade will be no higher than C.

Academic Grievance/Grade Appeal

College of Science and Health
When a student considers a final course grade inaccurate, the student should confer with the instructor regarding the accuracy of the grade received within the first three weeks of the semester following receipt of the grade. At this time, the student and instructor must together review all class material pertinent to the grade for errors to be corrected. If the student is not satisfied, or if the instructor does not confer with the student within the first three weeks of the semester, the student should immediately contact the Dean and submit a written appeal consisting of a statement containing the factual reasons, and basis for the complaint, accompanied by any supporting documentation. In the College of Science and Health, the Dean will direct the appeal to the Student Academic Performance, Promotion and Judiciary Committee (SAPPJC) for a decision. The student has the right to appear before the committee, which includes student representation. The committee’s decision must be submitted to the Dean within the first five weeks of the semester. If the Dean does not favor the committee’s process or decision, an ad hoc committee can be appointed by the Dean to review the appeal and arrive at a decision. The ad hoc committee must reach a decision within one week of receipt of the appeal. Its decision is final.

Mervyn M. Dymally School of Nursing
The purpose of the procedures for Academic Grievances is to find an equitable solution to a problem at the lowest possible level. It is to everyone’s advantage to keep the proceedings as respectful and confidential as possible.

Academic Grievance Process
An academic grievance relates to academic issues associated with course, classroom or clinical instruction during the course of the semester. As a prerequisite to filing a grievance, a student must meet with the involved faculty member within three (3) school/business days after an incident occurs. The student and faculty member shall discuss the dispute in an attempt to resolve the matter. The student must represent himself/herself during the grievance process.

If following the discussion with the faculty member, the student continues to believe that the student has not been dealt with fairly; the student may submit a written statement of the complaint to the Chair of Student Affairs Committee of MMDSON.

To prepare a written grievance, the student shall:

(It is the responsibility of the student to move the process forward through each step)
1. Identify the exact nature of the complaint and provide dates and locations of relevant incidents.

2. Identify the names of the witnesses or persons who have personal knowledge relating to the complaint.

3. Submit grievance along with any available written documentation or evidence that is relative to the complaints/grievances to the student affairs committee.

4. The student will meet with the faculty member and/or Course Coordinator and the Chair of Student Affairs Committee within three (3) school/business days of submission of the written grievance. If the grievance is not resolved, the grievance moves to step 5. The Chair of Student Affairs Committee will notify the Dean/Associate Dean of MMDSON of the student’s decision to move the grievance forward to the ad hoc committee appointed by the Dean/Associate Dean.

5. The Dean/Associate Dean will appoint an ad hoc committee made up of one administrator, two-four (2-4) faculty members (one serving as chair), and one (1) student member of the Student Affairs Committee to hear the grievance and make a recommendation. The ad hoc committee will meet within five (5) school/business days of the request for the hearing. The committee chair will notify the Dean/Associate Dean of the committee’s decision. The Dean/Associate Dean will notify the student and the involved faculty of the decision.

6. The student or the involved faculty member may appeal the decision of the ad hoc committee in writing to the Dean within two (2) school/business days following notification of the decision of the ad hoc committee. The Dean will render a decision on the appeal within three (3) school/business days from receipt of the appeal. The grievance process ends with the decision of the Dean of MMDSON.

The academic grievance process is generally instituted before end of the semester; therefore, every effort should be made to complete the grievance process prior to the start of the next semester.

Non-Academic Grievances (from students)

Non-academic grievance is defined as a general complaint that does not involve academic matters.

Preliminary Steps in Non-Academic Complaint/Grievance
The student will meet with the Chair of Student Affairs to discuss the grievance within five (5) school/business days. If the Chair of Student Affairs is the source of the grievance, then the Dean/Associate Dean will assign another person to the committee.

If the grievance is deemed to be legitimate, the Chair of Student Affairs and the Dean/Associate Dean will discuss a resolution with the student within five (5) school/business days of meeting with the Chair of Student Affairs.

Formal Steps in Filing Non-Academic Complaint/Grievance
Within five (5) school/business days of meeting with the Chair of Student Affairs, the student will submit documentation in writing of the unresolved complaint to the Chair of Student Affairs who will inform the Dean/Associate Dean.

The Dean/Associate Dean will appoint an ad hoc committee with one administrator and two to four (2-4) faculty members to hear the case and make a decision to remedy the complaint. The ad hoc committee will meet within seven (7) school/business days of the request for a hearing. The committee will either meet with the student or respond in writing, advising the student of the decision.

The student shall have the right to appeal the decision in writing to the Dean within two (2) school/business days of the decision. The dean will render a decision on the appeal within ten (10) school/business days from receipt of the appeal.

The grievance process ends with the decision of the Dean, which will be final.

Confidentiality
Throughout the entire procedure, from the filing of a formal complaint to final resolution, all information related to a grievance must be kept confidential. Once a final decision has been made and implemented, the original copy of the Grievance Form will be placed in the official, confidential Grievance File in the Office of MMDSON and will be maintained for a minimum of five (5) years.

Grade Change
Once a grade has been submitted to the Office of
Registration and Records, it can be changed only by the instructor of record, and only if the change is due to miscalculation or error, within one semester of initial grade submission. The change must be initiated by the instructor of record, using the Change of Grade form. The form must be signed by both the instructor and the Program Director, and submitted to the Office of Registration and Records by the instructor. If the instructor of record is no longer employed by the University, the Program Director may act on his/her behalf. The change will be recorded on the student's official academic record.

**Grade Point Average (GPA)**

The GPA is the total number of grade points earned divided by the total number of units attempted. Grades A through F and U are included in the computation of the GPA. Only coursework earned at Charles R. Drew University is included in the semester and cumulative GPAs.

**University Grading System**

The University generally uses a letter grade evaluation and reporting system based on a 4.0 grade point formula. Earned grades and grade points are awarded according to the following schedule:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Grade Points</th>
</tr>
</thead>

**Grade Definitions**

A, A+: The highest academic grade is reserved for accomplishment that is truly distinctive and demonstrably outstanding. It represents a superior mastery of course material and is a grade that demands a very high degree of understanding as well as originality or creativity as appropriate to the nature of the course. The grade may indicate that the student works independently with unusual effectiveness and often takes the initiative in seeking new knowledge outside the formal confines of the course.

B+, B, B-: A grade that denotes achievement considerably above acceptable standards. Good mastery of course materials is evident and student performance demonstrates a high degree of originality, creativity, or both. The grade may indicate that the student works well independently and often demonstrates initiative. Analysis, synthesis, and critical expression, oral or written, are considerably above average.

C+, C, C-: Indicates a satisfactory degree of attainment and is the acceptable standard for graduation from college (see specific program requirements for additional policies). It is the grade that may be expected of a student who gives to the work a reasonable amount of time and effort. This grade implies familiarity with the content of the course and acceptable mastery of course material; it implies that the student displays some evidence of originality and/or creativity, and works independently at an acceptable level and completes all requirements.

D+, D, D-: Denotes a limited understanding of the subject matter, meeting only the minimum requirement for passing the course. It signifies work which in quality and/or quantity falls below the average acceptable standard for passing the course. Performance is deficient in analysis, synthesis, and critical expression; there is little evidence of originality, creativity, or both.

F: Indicates inadequate or unsatisfactory attainment, serious deficiency in understanding of course material, and/or failure to complete requirements of the course.

**Other symbols which may appear on official transcripts:**

U: Unofficial withdrawal. Assignment of an unauthorized incomplete indicates that an enrolled student did not officially withdraw from a course and failed to complete course requirements. It is used when, in the opinion of the instructor, completed assignments, or course activities, or both were insufficient to make normal evaluations of academic performance possible. The “U” grade is equivalent to an “F” and will affect a student's G.P.A. as such. For a credit/no credit course, a grade of “NC” will be applied.

AU: Auditing a course means that the course
instruction is undertaken but not for credit or a grade. Students auditing a course will receive “AU” (Audit) on the transcript only if they have attended regularly and participated according to the prior agreement with the instructor.

**W:** Approved withdrawal with penalty. A notation of “W” is entered on the academic record of the student who withdraws from a class within the time period specified in the Academic Calendar at the end of this Catalog. A “W” grade is not counted in GPA calculations.

**I:** Incomplete: course work not completed. An incomplete grade indicates that course credit has been delayed. Please see the “Incomplete Policy” for further details.

**Credit/No-Credit Courses (CR/NC)**  
Upon successful completion of a credit/no credit course, the student earns the specified number of units and the transcript will show “CR” (which indicates a “C” grade or better). If the student’s work is unsatisfactory, the transcript will show “NC” (which indicates a “D” grade or below). All units of “CR” will be counted curriculum requirements, but will not be used in computation of GPA.

**SP:** A grade of SP indicates work is in progress. The SP grade is only to be utilized for clinical, thesis and practicum courses where the requirements for the course cannot be completed within one semester. For all other courses, if a student requires additional time to complete work, they will be required to qualify for and adhere to the Incomplete Grade Policy. For nursing clinical and practicum courses, SP grades not resolved after 4 weeks of grade posting will convert to “F”. For the Urban Public Health (UPH) program, SP grades not resolved within the program’s maximum time frame to completion will convert to “F”. The “SP” grade is not included in calculations of grade point average. Please see the Director of the UPH program for clarification of maximum time allowed before an SP converts to an F.

**RD:** Report Delayed is an interim designation used only by the Registrar when a delay in the reporting of a grade is due to circumstances beyond the control of the student. The “RD” must be replaced by the appropriate grade within 4 weeks. RD grades not resolved after 4 weeks of grade posting will convert to “F”. The “RD” is not included in calculations of grade point average.

**Credit by Examination (CE) / No Credit by Examination (NCE)**  
For a student in good academic standing (cumulative G.P.A. 2.00) to receive credit for certain courses without registering for the course, the student, upon approval of the instructor and Program Director, must successfully pass the challenge examination for the course. This is done without enrolling in the course. If the student earns less than a “C” on the examination, a mark of “NCE” (no credit by examination) will be placed on the student’s academic record. The student will be required to enroll and take the course in a subsequent semester if it is a required course.

To be eligible for “CE”, students must have completed a minimum of nine units at Charles R. Drew University. The student applies for credit by examination during the first two weeks of the semester. Program courses are not subject to “CE”. A maximum of three units for certificate programs, six units for associate programs, and nine units for bachelor’s programs can be taken for “CE”. “CE” courses are not eligible for financial aid. Courses previously taken or audited cannot be challenged, nor may a student challenge the same course more than once. No credit is given when the purpose of an examination is to determine the proper level at which students should begin their academic studies (e.g., foreign language or mathematics assessment). Students who satisfy a course by challenge will receive the approved unit credit on their academic record and a mark of “CE”. Letter grades and grade points will not be given. Students who unsuccessfully challenge a course will receive a mark of “NCE” on their academic record, but “NCE” will not affect the G.P.A. A $35 administrative fee is payable to the Finance Office for taking the challenge examination.

**Graduation Requirements**  
Undergraduate students must receive a grade of C or better in all major courses to remain in good academic standing. A grade of C- is unsatisfactory for financial aid and program promotion. Although grades of C- and lower are included in the GPA, some programs may not allow courses to satisfy degree requirements in which the student receives a grade below C. See the program pages in this Catalog for specific program policies.

All undergraduates must meet the minimum GPA requirement of 2.0 in order to earn a degree. Some programs have higher GPA requirements. See the program requirements in this Catalog.

All graduate students must meet the minimum GPA requirement of 3.0 in order to earn a degree. Some programs have higher GPA requirements. Graduate students should refer to the graduation requirements for their program as published in this Catalog.
Incomplete Grades
The designation of Incomplete (I) is to be used only when the student has not completed course requirements for a specific course. Extenuating circumstances (e.g., illness, accident) must exist which have made the student unable to finish course requirements and documentation of such circumstances must be attached to the Contract for Assignment of Incomplete Grade. Completion of the course is determined by the instructor of record following discussion with the student. Only students in good academic standing and without professional issues can be awarded an incomplete grade for a course.

Instructors may assign an Incomplete grade only if the following conditions apply:

a) A student is justifiably unable to complete a defined portion of coursework after 75 percent of the course has been completed (documentation of extenuating circumstances must be submitted with the Contract for Incomplete Grade),

b) A student has made satisfactory progress in the class up to that point, and
c) The student has made prior arrangements with the instructor and signs an Incomplete Contract form.

The instructor must submit the Contract for Assignment of Incomplete Grade and documentation of mitigating circumstances to the Registrar’s Office within 5 days of approving the Contract for Assignment of Incomplete Grade. All portions of the form must be complete before submittal, including the student signature agreeing to comply with the terms of the Incomplete. Requests will not be processed until the completed form is submitted. An Incomplete, not removed within one academic semester, will be converted to an “F.” Exceptions to this rule due to serious, protracted illness or other documented extenuating circumstances may be granted by the Dean’s Office upon petition by the student prior to the end of the academic semester in which the Incomplete record should have been reconciled.

Independent/Directed Study
Independent/directed study allows individualized coursework to be designed and tailored to meet a student’s particular needs. Enrollment in independent/directed study courses requires prior program approval. The student may not be required to be on campus while completing the work. Independent/directed study courses involve supervised independent study and/or research in a subject area proposed for in-depth study. Courses may comprise special study, directed readings and/or directed research structure as determined by the instructor and student at the time of initial proposal.

Independent study courses are open to eligible students. A maximum of eight units are permitted, unless individual program guidelines specify otherwise. Permission of the instructor is always required.

Maximum Time to Degree Completion
Charles R. Drew University requires students to complete all degree requirements or certificate program requirements within specific time limits in order to be eligible to graduate. Students who do not complete degree or certificate requirements within required time limits, which are based on their degree or certificate level, will be administratively dropped or withdrawn from the University.

The University maximum time frame to completion is 200% of normal time to program completion. However, in order to remain eligible for federal financial aid programs, the maximum time frame for completion is 150% of normal program time to completion. If a student has not successfully completed program requirements within the federal 150% maximum timeframe, they will be permitted to remain enrolled up to the 200% limit; however, the student will not be eligible for financial aid after the 150% maximum time limit has been reached.

These time limits to do not supersede the obligation to maintain satisfactory academic progress throughout the student’s program of study. Time limits for degree and certificate program are as follows:

<table>
<thead>
<tr>
<th>Degree/Certificate</th>
<th>University Maximum Time to Completion</th>
<th>Maximum Time To Remain Federal Aid Eligible</th>
</tr>
</thead>
<tbody>
<tr>

Course Repeat Policy
Graduate students may repeat courses in which they did not achieve a passing grade for their specific program. All courses attempted and grades earned at Charles R.
Drew University will appear on the student’s permanent academic record and all grades will be averaged for cumulative GPA calculations.

Undergraduate students may repeat courses in which grades of less than C were earned. All courses attempted and grades earned at Charles R. Drew University will appear on the student’s permanent academic record and all grades will be averaged for cumulative GPA calculations.

School of Nursing
A maximum of two courses may be repeated. Students may repeat courses in which substandard grades (less than a B) were earned.

Transfer Credit
Charles R. Drew University awards transfer credit earned at regionally accredited colleges and universities. Transfer credit is accepted only when the course is applicable toward academic program requirements for a Charles R. Drew University degree.

Transfer units earned at other colleges and universities are not included in the Charles R. Drew University grade point average (GPA) computation. However, transfer units will be counted in the total units earned to meet academic program requirements.

Only courses with a “C” grade or better are transferable to undergraduate degree programs. For graduate programs, only courses with a “B” or better are transferable. Official transcripts are required.

A maximum of 63 units can be transferred from a regionally accredited institution toward a Charles R. Drew University’s bachelor degree. The maximum transfer credit acceptable for the associate degree is up to 50% of the total units required for the program. A maximum of 12 units can be transferred toward the Master of Science degree in Nursing, and a maximum of 6 units can be transferred to the Master of Public Health degree in Urban Public Health.

### Admission Procedures & Policies

#### Application Deadlines Policy
Applications for admission are reviewed on a rolling basis. Priority and recommended application deadlines are provided in the University policy on Deadlines Regarding Application for Admission and Financial Aid.

By submitting an application for admission to Charles R. Drew University of Medicine and Science, the student agrees that all the information provided on the application is complete, factually correct and accurate.

Furthermore, the student agrees that falsification, misrepresentation or omission of information on the application, supporting documents, transcripts or credentials may result in the denial or revocation of admission, and if enrolled, will result in disciplinary action including dismissal from the University. This policy will also apply to transcripts submitted for the purpose of obtaining transfer credit at the University.

#### Deadlines for Admission and Financial Aid
Charles R. Drew University of Medicine and Science encourages prospective students to adhere to the following application deadlines which were established to support financial aid processing in a timely manner for new incoming students.

<table>
<thead>
<tr>
<th></th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Priority Deadline</td>
<td>December 1st</td>
<td>August 1st</td>
<td>January 2nd</td>
</tr>
<tr>
<td>Recommended Deadline</td>
<td>March 1st</td>
<td>September 1st</td>
<td>February 1st</td>
</tr>
</tbody>
</table>

**NOTE:** CDU programs offer rolling admissions and applications are considered after the recommended deadlines and until the class is filled.

Note: The Entry Level Master’s (ELM) program in the Mervyn M. Dymally School of Nursing does not offer rolling admissions. The Fall application deadline is March 1st and the Spring deadline is September 1st. Rolling admissions are offered in the Family Nurse Practitioner (FNP) and Advanced Nurse Educator (ANE) tracks.

1. Prospective students submit appropriate application for admission in accordance with the priority deadline or recommended application deadline published in the CDU Catalog, on the CDU website and/or print media.

2. All applicants are encouraged to apply for federal financial aid at the time they apply for admission to an academic degree program or as early as January 1st of each year.

3. To be considered for federal financial aid, applicants must submit a FAFSA (Free Application for Federal Student Aid) online at [www.fafsa.gov](http://www.fafsa.gov). In order to access personal information on the [www.fafsa.gov](http://www.fafsa.gov) site and to sign the FAFSA online, applicants must first obtain a PIN# (a 4-digit number that is used in combination with the Social Security number for the purpose of verifying the identity and eligibility of each person who applies for a Federal Student Aid Program.)
Security Number, name and date of birth to identify the applicant as someone who has the right to access his/her personal information on www.fafsa.gov.

4. Timeline for federal aid processing of prospective students who submit an Application for Admission to CDU by the priority deadline for fall enrollment.

December 1st: Priority Deadline for Submitting Application for Admission

February 1st:
- Office of Admissions mails early acceptance letters for fall semester of the same calendar year.
- Student applies for federal financial aid online at www.fafsa.gov. The priority deadline to apply for federal financial aid is April 1st. Students who submit a FAFSA and all required documents, and meet the eligibility criteria, by April 1st will be considered for SEOG and CDU Scholarships.

March 1st: Deadline for returning Intent to Enroll and Commitment Deposit

Note: Financial Aid award letters will be mailed within 2 to 3 weeks from receipt of all required financial aid documents.

5. Timeline for federal aid processing of prospective students who submit Application for Admission to CDU by recommended application deadline.

March 1st: Recommended Deadline for Submitting Application for Admission to CDU by recommended application deadline for fall enrollment:

April 1st:
- Office of Admissions mails acceptance letters for fall semester of the same calendar year.
- Student applies for federal financial aid online at www.fafsa.gov. The deadline to apply for federal financial aid is July 1st. Students who submit a FAFSA and all required documents, and meet the eligibility criteria, by July 1st will be guaranteed a financial aid award in time for the start of classes.

May 1st: Deadline for returning Intent to Enroll and Commitment Deposit.

Note: Financial Aid award letters will be mailed within 2 to 3 weeks from receipt of all required financial aid documents.

Note: All applications for admission received after the recommended application deadline will be considered on a rolling admissions basis.

6. Only complete application files will be forwarded to the academic department for admission consideration.

a. Application files completed after the published deadline will be forwarded to the academic department as they are completed and will be considered for acceptance on a space-available basis. If the cohort is filled, accepted applicants will be placed on a wait list.

b. Applicants who do not complete their application file within the one-year application period will be required to re-apply by submitting updated application materials along with the required non-refundable application fee. Incomplete applications are discarded after one year.

7. The academic department’s admissions review committee will have up to three (3) weeks to review application files and conduct interviews (if applicable).

8. Once the review process is completed, the admissions decision will be communicated to the Office of Admissions with a completed Admissions Decision Form.

a. For applicants who are accepted or provisionally accepted to an academic degree program, the Office of Admissions will mail acceptance letters, along with the Intent to Enroll form, information regarding financial aid and orientation, and
any other documents required by the academic department. Acceptance packets will be mailed within 4 to 5 business days of receiving admissions decisions from the academic department.

b. For applicants who are denied, the Office of Admissions will mail letters of denial within 4 to 5 business days of receiving decisions from the academic department.

c. For applicants who are placed on a wait list, the Office of Admissions will mail letters regarding the status within 4 to 5 business days of receiving decisions from the academic department.

Admission to undergraduate and graduate programs at Charles R. Drew University is competitive, thus, meeting the minimum requirements for admission does not guarantee acceptance to a program. The number of students admitted and enrolled every year is determined by approved enrollment levels as well as the capacity of the University and each academic department.

Each student's entire application packet is reviewed individually. Some academic departments require an interview as part of the admissions process, and candidates must be available for an in-person interview (or a phone interview if the candidate is out-of-state). In selecting students, each program considers evidence of the applicant’s integrity, discipline, compassion and academic ability. Documentation of academic preparation, personal achievement and recommendations are given careful consideration in the determination of an applicant's eligibility. Additionally, each program’s admissions committee takes into consideration all evidence to suggest that applicants are capable of completing the curriculum in the specified time and will be able to achieve the programs required levels of competence.

Prospective students are encouraged to contact or visit the campus for admissions and academic program information. The Office of Admissions offers information sessions, campus tours and individualized counseling appointments. For more information, contact:

Office of Admissions
Charles R. Drew University of Medicine and Science
1731 East 120th Street
Los Angeles, CA 90059
Tel. No. 323-563-4839
E-mail: admissionsinfo@cdrewu.edu

Application Requirements
All applicants to Charles R. Drew University must submit the following documents to satisfy minimum admission requirements:

1. Application for Admission, which is available online at www.cdrewu.edu/apply.
2. Non-refundable Application Fee
   a. $35 for Associate and Bachelor Degree Programs
   b. $75 for Master of Public Health (MPH)
   c. $100 for Master of Science in Nursing (MSN)
3. Official high school transcripts as evidence of high school graduation, or official GED high school equivalency certificate (for undergraduate programs).
4. Official college transcripts as evidence of a Bachelor degree (for graduate and post-baccalaureate programs).
5. Official academic transcripts from all colleges or universities attended. This requirement applies to undergraduate transfer students and applicants to graduate programs.
6. Personal Goal Statement (Does not apply to Bachelor degree programs).
7. Three (3) Recommendations (Recommendation form is required).
8. Official SAT/ACT test scores (for undergraduate programs, if Associate Degree has not been earned).
9. Official GRE test scores (for graduate programs).

Note: Transcripts are considered official if forwarded directly to the University by the institutions attended. Official transcripts can also be delivered in person in an unopened envelope marked official across the seal of the envelope by the previous institution’s Registrar’s Office. All official documents become the property of Charles R. Drew University and cannot be re-issued to applicants. Incomplete applications and supporting documents are retained for only one year from the date of submission.

Program-Specific Requirements
Some academic programs may call for additional...
application materials and have additional admission requirements. Refer to the program section of this Catalog for additional admission requirements specific to each degree program.

Pre-enrollment Examinations
Applicants who are offered admission to undergraduate degree programs in the College of Science and Health are required to take examinations in three fundamental academic skill areas: writing, reading and mathematics.*

* Results from these tests are used for placement. Applicants who have completed equivalent coursework to satisfy the general education requirement for college mathematics and English with a “C” grade or better must submit official transcripts for evaluation and approval of course equivalency.

Applicants who are offered admission to the Mervyn M. Dymally School of Nursing graduate degree program are required to take examinations in several fundamental academic skill areas: writing, reading, science and mathematics.**

** Results from the HESI test are used for assessment and evaluation of student academic ability and level of achievement.

College Level Examination Program (CLEP)
Charles R. Drew University accepts credit by examination from the College Board via the Advanced Placement Examinations (AP) and the College Level Examination Program (CLEP). Scores must be sent directly to Charles R. Drew University Office of Admissions in order to be evaluated for credit. A total of 20 units can be granted for successful performance on CLEP examinations.

Admission Process
Request for information and application forms (by mail, telephone, website or walk-in):

- Applications, correspondence and requests for general information about the College of Science and Health and the Mervyn M. Dymally School of Nursing will be processed by the Office of Admissions.

  Office of Admissions
  Email: admissionsinfo@cdrewu.edu
  Tel: (323) 563-4839

- For admission to the joint CDU/UCLA MD program, please refer to the College of Medicine Admissions’ section of this Catalog.

  Completed applications must be submitted prior to or on the final filing date along with required supplemental application materials and non-refundable application fee. Applications are accepted online only.

Many programs have rolling admissions deadlines. Please contact the Office of Admissions for details.

Note: Applications received without appropriate fee(s) and/or required documentation are not official and will not be processed. Such applications are considered incomplete and are retained for only one year from the date of submission.

Notification of Admission
Candidates will be evaluated for admission after all of the required application materials have been submitted. Each candidate will receive notification in writing of the admissions decision.

Conditional Acceptance
Conditional admission may be granted on a case-by-case basis to a limited number of applicants. Conditionally admitted students must satisfy the terms of their admission by the end of their first term or admission may be rescinded and further registration prohibited.

Conditionally admitted students are eligible for a one-term disbursement of financial aid.

Waitlisted
Admission to Charles R. Drew University academic programs is competitive, and occasionally, students are waitlisted. If waitlisted, candidates are notified in writing of their status and are informed of a confirmed slot as soon as the Office of Admissions receives an update from academic departments regarding available seats.

Appeal of Admissions Decision
Every application goes through extensive reviews, and the University regrets that we are unable to offer admission to all qualified applicants. For an appeal to have merit, it must bring to light new information that was not present in the application—information that clearly shows the candidate to be stronger overall than had been earlier evidenced in application materials.

Submitting an Appeal
- Candidates seeking to appeal their admission decision should submit a letter requesting that their application be reconsidered. The letter must be written by the applicant.
  - Email or fax submissions will not be reviewed.
  - The letter must state the applicant’s reasons for appealing the initial decision. The letter should
not simply repeat information that had already been presented in the application.

- If the basis for the appeal is a changed grade or an incorrectly reported test score, the candidate should provide documentation (e.g., a transcript or a revised score report) in the same envelope as the letter of appeal.
- Include copies of all high school and college transcripts (recommended).
- Letters of recommendation are not required. If letters are included, the limit is two.

Mail documents in a single envelope to:

Office of Admissions
Charles R. Drew University of Medicine and Science
1731 E. 120th Street
Los Angeles, CA 90059

- Appeals documents will be forwarded to the Dean of the respective academic program. Upon receipt of an appeals decision, the Office of Admissions will notify the candidate accordingly.

Commitment Deposit
Students accepted to undergraduate and graduate degree or certificate programs in the College of Science and Health are required to submit a $250 non-refundable commitment deposit to reserve a seat in the incoming class by May 1, or within two (2) weeks of receiving the acceptance letter (if accepted after May 1st).

Students accepted to the Mervyn M. Dymally School of Nursing graduate degree or certificate programs are required to submit a $300 non-refundable commitment deposit to reserve a seat in the incoming class by May 1, or within two (2) weeks of receiving the acceptance letter (if accepted after May 1st).

The commitment deposit is non-refundable and is applied toward the student’s tuition upon registration in classes.

Deferment of Enrollment
Students who wish to defer their enrollment must request deferment in writing by returning a completed Intent-to-Enroll form along with the required tuition deposit. Deferred enrollment may only be granted for one year to officially admitted students who have paid the non-refundable confirmation deposit (see Commitment Deposit section of this catalog). If the deferred student does not enroll at Charles R. Drew University within the deferral period, the student must reapply. Conditionally admitted students are not eligible for deferment.

Readmission of Former Students
Readmission will be based on the current admissions policies. Candidates for readmission must meet current Program requirements. Policies related to the readmission of former students are outlined below:

Students seeking readmission should contact the Office of Admissions at least one semester prior to their intended return. Students dismissed from the University for academic reasons must re-apply and receive approval from the Dean’s Office. Students participating in an approved planned educational leave do not have to re-apply for readmission.

Students who have been withdrawn from the university must apply for readmission unless they are on an approved leave of absence. Returning students will be subject to all the requirements and regulations printed in the Catalog for the year of readmission.

Former Students in Good Standing
With approval of the Dean or Admissions Committee, students who previously left the University in good standing may be readmitted, provided that academic work in the interim period has not altered the student’s scholastic status. If a student has attempted coursework at another institution during his/her absence from Charles R. Drew University, official transcripts of that coursework must be submitted to Charles R. Drew University Office of Admissions for consideration in the readmission process.

Former Students on Probation
Students on probation at the close of their last semester remain on probation if readmitted. If a student has attempted coursework at another institution during his/her absence from Charles R. Drew University, official transcripts of that coursework must be submitted to Charles R. Drew University Office of Admissions.

Former Students Who Were Dismissed
The readmission of a previously dismissed student is by special action only. The University will not consider a student for readmission until one semester of non-attendance has passed and all recommended conditions of readmission have been fulfilled. Readmission action is based upon evidence that the causes of previous low achievement have been removed. This evidence may include grade reports or official transcripts of work completed at other institutions during the student’s absence. Students who have been dismissed for ethical or behavioral reasons will generally not be readmitted. Special conditions may apply.
To re-apply, students should:

1. Complete and submit a Readmission Application (available in the Office of Admissions).
2. Include a non-refundable application fee of $50 made payable to Charles R. Drew University.
3. Include official transcripts of any coursework attempted during absence from Charles R. Drew University.

Non-Matriculated Enrollment
A Non-Matriculating Student is a student who enrolls in a course offered by Charles R. Drew University without being accepted into a degree program in order to:

- Meet credentialing requirements of a state licensing agency
- Meet graduation requirements for another University or for continuing education
- Take course(s) for general interest
- Meet prerequisite course requirement(s)

Enrollment as a non-matriculated student is contingent upon space availability and scheduling, and is limited. To enroll as a non-matriculated student, prospective students must complete the Application for Non-Matriculated Enrollment and pay the appropriate application and student activities fee. Specific course approval must take place prior to the beginning of each semester. A maximum of 12 semester units of undergraduate coursework may be earned as a non-matriculated student.

A maximum of 9 semester units of graduate coursework may be earned as a non-matriculated student.

Students must submit additional application requirements as specified by respective academic programs before being considered for non-matriculated enrollment.

Clinical courses are not available for non-matriculated enrollment.

International Students
Charles R. Drew University is approved by the US Department of Homeland Security to admit International F-1 visa students. The University welcomes applications from international students.

1. International students must submit an application for admission, application fee and all requisite supplemental application documents. See Requirements for Admissions section of this Catalog.
2. Applicants must present documentation of academic preparation equivalent to that of a U.S. high school diploma (for undergraduate degree programs) or U.S. baccalaureate or higher degree (for graduate degree programs). The documents must be official and authentic, signed and sealed by the respective institutions from which the applicant received the graduation certificate or degree.
3. Applicants must present an official transcript of all post-secondary work; including year-by-year records for each college or university attended (indicating the number of lecture and laboratory hours per week for each course), grades received for each subject and official documents that indicate the degree awarded with the title and date conferred.
4. International transcripts must be translated and evaluated for U.S. equivalence by one of the approved organizations listed below:
   a. World Education Services (WES)
   b. International Education Research Foundation (IERF)
   c. American Association of Collegiate Registrars and Admission Officers, International Education Service (AACRAO IES)
5. Applicants whose native language is not English must present evidence of competency in English by taking the Test of English as a Foreign Language (TOEFL). Official TOEFL results must be sent directly to the Office of Admissions.
6. International students are ineligible for federal financial aid and are required to present proof of financial support along with the Confidential Financial Statement available in the Office of Admissions.
7. Form I-20 will be issued by the Office of Admissions once the student has been accepted and the Intent to Enroll form submitted along with the Commitment Deposit.
8. Conditional Admission is not available for international students.

Discover CDU - New Student Orientation
The orientation program acquaints students with University and college/school programs, services, facilities and grounds, academic expectations and institutional procedures. All students entering the
University are required to participate in Discover CDU. The University will make reasonable efforts to ensure that all students are provided with the opportunity to participate in Discover CDU before their first semester of enrollment.

Catalog Rights
Students pursuing a degree or certificate must meet the curriculum requirements for the program as outlined in the Catalog in effect at the time of admission or re-admission to Charles R. Drew University. Students are responsible for knowing program requirements. Students may graduate under the general education requirements and graduation requirements in effect at the time of their admission as long as they have maintained continuous enrollment, or under the requirements in effect from the time continuous enrollment is established and maintained. Continuous enrollment is defined as enrollment in the fall, spring and summer (where applicable) semester of each academic year.

Course Numbering System
Courses in the College of Science and Health and Mervyn M. Dymally School of Nursing are numbered according to the following system:

- 000-099 Academic Enhancement Courses (No baccalaureate credit toward degree or certificate)
- 100-199 Lower-division courses of freshman level
- 200-299 Lower-division courses of sophomore level
- 300-399 Upper-division courses of junior level
- 400-499 Upper-division courses of senior level
- 500-699 Graduate level courses

Disability and Accommodations
Charles R. Drew University of Medicine and Science (CDU) provides equal access and opportunity to its students and does not discriminate on the basis of disability in all of its courses, programs and activities. CDU is committed to providing appropriate services and reasonable accommodations for students with disabilities consistent with the requirements of Section 504 of the Rehabilitation Act of 1973, Title III of the Americans with Disabilities Act and the Americans with Disabilities Amendments Act of 2008.

Drug-Free Workplace and University
Charles R. Drew University of Medicine and Science recognizes drug dependency (including addiction to controlled or prescription drugs, over-the-counter medications, alcohol or tobacco) as an illness and a major health problem. The University also recognizes drug dependency as a potential health, safety and security problem within the campus environment.

The objective of the University’s policy is to provide a drug-free, healthful, safe and secure campus and work environment.

Each new employee and student is provided a copy of this policy during initial orientation, and a written reminder of this policy is distributed annually to each employee and student. All employees and students are required to abide by the terms of this policy.

Students requiring assistance are encouraged to use Student Affairs services and health plan referral services, as appropriate. All students are expected to be aware of the information contained in this policy. For further information and/or to seek assistance for drug and alcohol related problems through confidential counseling, students should contact the Assistant Provost for Student Services. Substance abuse information is available on campus in the form of brochures, pamphlets and other handouts and on the website.

Students employed by the University as regular or temporary part-time or full-time employees or as part of the Federal Work Study Program are expected to abide by the University’s Drug and Alcohol Free Workplace Policy (CDU Policy I.E.00420), a copy of which is provided to them during new employee orientation.

Financial Aid & Scholarships

Charles R. Drew University is committed to providing information and guidance in obtaining financial aid resources. Financial aid includes grants, scholarships, loans, and part-time employment. The University offers a combination of these types of aid from various sources in an award package. Financial aid is awarded based upon financial need. Eligibility for financial aid is established through the Free Application for Federal Student Aid (FAFSA). An application for financial aid does not affect a student’s eligibility for admission.

CDU and External Scholarships
CDU Scholarships are designed to help alleviate the financial burden of a health professions education. Students are encouraged to apply for both CDU and external scholarships and are encouraged to keep in mind that even though some of the deadlines for the scholarships have passed, many of them are annual.
awards with the same deadline each year. If the scholarship is a good fit for them, they should make note of its deadline so they can apply the following year.

For CDU scholarships, students must complete and submit the CDU Scholarship Application and additional requirements as detailed within the eligibility requirements section of each scholarship listed below.

A complete list of CDU scholarships is available to students on the CDU website, www.cdrewu.edu/scholarships.

How to Apply for Financial Aid
There are just a few easy steps to follow when applying for financial aid for the 2015-2016 academic year.

Complete the 2015-2016 Free Application for Federal Student Aid (FAFSA) or a Renewal FAFSA. The FAFSA must be completed online at www.fafsa.gov. Students must ensure that they enter the Charles R. Drew University Federal School Code 013653. The FAFSA is a FREE application. Students should NOT PAY to have their FAFSA completed.

The Office of Financial Aid and Scholarships maintains the right to request additional information as required to process student applications, including income verification, tax returns, non-taxable income certification, verification of non-filing of tax returns, verification of household size, number of family members in college, amongst others. Specific questions about financial aid should be referred to the Office of Financial Aid and Scholarships. If additional information or documentation is required applicants will be contacted in writing.

The Office of Financial Aid and Scholarships will process awards for all student applications upon successful acceptance to the University and students will be contacted for an appointment to discuss financial aid packages and to sign the Award Letter.

Eligibility
In order to receive federal financial assistance, students must meet the following criteria:

- Student must be enrolled as a matriculated student in an eligible academic program.
- Student must be a United States citizen, a permanent resident, eligible non-citizen, a citizen of the Federated States of Micronesia, the Marshall Islands or a permanent resident of the Trust Territory of the Pacific Island (Palau)

Verification
Federal verification requirements apply to the following programs:

- Federal Pell Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Federal Work Study Program
- Federal Student Loan Programs

Applications selected for verification by the federal process will require additional documentation.

The institution will continue to verify information believed to be inaccurate and maintain the flexibility to select additional information from applicants for verification. If further documentation is required to complete the financial aid application process, the Office of Financial Aid and Scholarships will contact students.

Types of Financial Aid Available
Federal Pell Grant: To be eligible, an applicant must be an undergraduate student and demonstrate financial need. The amount of the award, as determined by the Federal Pell Grant Program, is in most cases based on previous year’s income and current asset information provided in the application.

Federal Supplemental Educational Opportunity Grant (FSEOG): To be eligible, an applicant must be an undergraduate student and demonstrate exceptional financial need. Pell Grant recipients with the lowest Expected Family Contribution (EFC) will be considered first for a FSEOG. Just like Pell Grants, the FSEOG does not have to be repaid.

Federal Work Study Program (FWSP)
The FWSP is a federal program that enables students to earn part of their financial aid award through part-time employment. To be eligible, a student must meet the eligibility requirements for federal financial aid and must maintain good academic standing while employed under the program. This program allows students to work a maximum of 20 hours per week. An academic year’s work-study award is $4,000 per academic year.

Federal Direct Loans: Subsidized loans are based on financial need, and interest accrued while the student is in school is paid by the federal government. Unsubsidized loans are available to students regardless of income and assets and interest starts to accrue immediately. Accrued interest on the unsubsidized loan is the student’s responsibility and can be paid while in attendance or postponed until after attendance has ended. Students are advised to speak with the financial
aid office before applying for a subsidized and/or unsubsidized loan.

For any specific guidelines, students are encouraged to contact the Office of Financial Aid and Scholarships at 323-563-4824.

Federal Direct Parent PLUS Loans for Undergraduate Students (FPLUS): These loans are government-insured loans that are made to parents of dependent students. Parents may borrow FPLUS up to the cost of education minus other financial aid received during the years the dependent student is an undergraduate. Variable interest rate is adjusted annually. There is no interest subsidy for this loan. Repayment begins within 60 days after the last date of attendance.

Federal Direct Graduate/Professional PLUS Loans for Students (Grad PLUS): Graduate and professional degree students are now eligible to borrow under the Grad PLUS Loan Program up to their cost of attendance minus other estimated financial assistance. The terms and conditions applicable to Parent PLUS loans also apply to Graduate/Professional PLUS loans. These requirements include a determination that the applicant does not have an adverse credit history; repayment begins 60 days after the last date of attendance.

**New Student Loan Interest Rates**

**For Loans Borrowed**
July 1, 2015 – June 30, 2016

**Loan Type**
Subsidized and Unsubsidized Borrower
Undergraduates: 4.29%
Graduate/Professional: 5.84%

**Loan Type**
PLUS Borrower
Grad or Parent: 6.84%

Private Loans: These loans are privately funded and are not based on need, so no federal formula is applied to determine eligibility. However, the amount borrowed cannot exceed the cost of education minus other financial aid. Interest rates and repayment terms vary and are generally less favorable than those provided through the federal lending program. Private loans are used to supplement the federal programs when the cost of education minus federal aid still leaves unmet need.

**Loan Notification/Right to Cancel**
Except in the case of loan funds made as part of a Post- withdrawal Disbursement, when Direct or Direct Parent PLUS or Federal Direct Grad Plus loan funds are being credited to a student’s account, the school must also notify the student or parent in writing of the:

- Anticipated date and amount of the disbursement;
- The student’s (or parent’s) right to cancel all or part of the loan or disbursement.

This notification must be sent no earlier than 30 days before, and no later than 30 days after crediting the student’s account.

If the student, or parent, wishes to cancel any portion of the loan or the disbursement, he/she must notify the Office of Financial Aid and Scholarships within 14 calendar days from the date of notification.

If the student wishes to cancel or return any portion of the loan after the 14 days the student must return the funds directly to the Department of Education (DOE) Direct Loan Servicing Center at (800) 848-0979.

**Loan Repayment**
Repayment of Federal Direct Loans (subsidized and unsubsidized) begins six months after either graduation or student’s last date of at least half-time attendance. Repayment of Federal PLUS loans begins within 60 days of the last date of at least half-time attendance. Borrowers have the right to prepay their loans without penalty. Please check with the Department of Education (DOE) for any specific repayment plans.

**Deferring Repayment:** To defer repayment, students may:

- Study at least half time at an eligible school
- Attend an approved graduate program or rehabilitation training program
- Participate in a medical internship or residency program
- Be unemployed (up to three years)
- Show economic hardship (up to three years)

During periods of approved deferment, a Federal Direct Subsidized Loan borrower does not need to make payments of principal, and the interest does not accrue. For the Federal Direct Unsubsidized, FPLUS or Grad PLUS borrower, principal repayment may be deferred but interest continues to accrue and is capitalized or paid by the borrower during that time.

**Forbearance:** A loan borrower or endorser may receive forbearance from the Department of Education (DOE). The DOE decides whether the borrower is willing but
unable to make scheduled loan payments. Forbearance is the temporary cessation of payments, an extension of time for making payments, or the temporary acceptance of smaller payments than previously scheduled. Forbearance is granted to medical or dental interns or residents for limited periods of time.

Entrance and Exit Counseling
First-time subsidized or unsubsidized Federal Stafford Loan borrowers must complete entrance counseling. Shortly before graduating from or terminating enrollment at Charles R. Drew University, borrowers must complete exit loan counseling. The Financial Aid Office collects information about the borrower's permanent address, references, expected employment, and driver's license number. This information is forwarded to the DOE. Both are to be completed online at www.studentloans.gov.

Refunds and Repayment
Students who withdraw from the University may be expected to repay a portion of their financial aid. According to a formula prescribed by state and federal regulations, any refundable amount used to pay tuition and fees is returned to the appropriate financial aid sources. Students may also be required to pay the unjustified portion of assistance that was directly disbursed to them.

Debt Management and Default Reduction
Charles R. Drew University is committed to helping students achieve sound financial planning and debt management. Information about loans, repayment options and debt management strategies are available in the Office of Financial Aid and Scholarships.

Financial Aid Disbursements
All financial aid is awarded for the academic year. It is applied for the semester for which the student has registered. If the student does not register, financial aid will be cancelled for the semester.

Return to Title IV Funds (R2T4) Policy
Federal regulations prescribe the calculation of a student’s eligibility for federal financial aid funds when the student completely withdraws (officially or unofficially) from the University during the semester.

Students who withdraw from all classes prior to completing more than 60% of an enrollment term will have their eligibility for aid recalculated based on the percentage of the term completed.

Example: A student who withdraws completing only 30% of the term will have “earned” only 30% of any Title IV aid received. The remaining 70% must be returned by the school and/or the student. The Office of Financial Aid and Scholarships encourages students to read the R2T4 policy carefully when thinking about withdrawing from all classes PRIOR to completing 60% of the semester. When a student has completed MORE than 60% of a term, 100% of Title IV funds are earned.

The Office of Financial Aid Office and Scholarships will:
1. Run a bi-weekly R2T4 report to determine students that may be subject to an R2T4 calculation.
2. Utilize the R2T4 on the web calculator to calculate and manage the treatment of Title IV funds.
3. Make all adjustments to student disbursements in the Department of Education’s Common Origination and Disbursement (COD) system and the CDU Student Billing System (PowerCampus) via the CDU Financial Aid System (PowerFAIDS).
4. Communicate program refunds and amount to the Finance Office via the “R2T4 on the Web” worksheet.
5. Provide written notification to student as well as maintain documentation within the students file.

After calculating the amount the student earned, there are 3 possibilities:
1. The amount disbursed = the amount earned
   • No further action necessary.
2. The amount disbursed exceeds the amount earned
   • The unearned portion must be returned to the federal aid programs.
3. The amount disbursed is less than the amount earned
   • Post-withdrawal disbursement

Unearned Title IV aid shall be returned to the following programs in the following order:
1. Unsubsidized Direct Loans (other than PLUS)
2. Subsidized Direct Loans
3. Direct Parent PLUS Loans
4. Direct Grad PLUS Loans
5. Pell Grants
6. SEOG

Written Notifications
The University will notify students as follows:
• Any credit balances
• The obligation to repay student loan(s)
• Must be completed as soon as possible, and no longer than 30 days from date of determination

Satisfactory Academic Progress (SAP)
To be eligible for Federal Financial Aid funds at Charles
R. Drew University, a student must be making satisfactory academic progress toward a degree or certificate. In order to maintain eligibility for funds, students must maintain both quantitative (number of credit hours) and qualitative (grade point average) standings.

Financial Aid Satisfactory Academic Progress is defined as:

1. Maintaining a 2.0 semester and cumulative Grade Point Average (GPA) or higher (a qualitative measure) for undergraduate students and 3.0 semester and cumulative GPA for graduate students.
2. Successfully completing at least 67% of the course load (credit hours) taken in a semester (a quantitative measure). Successful completion of a class or course is defined as earning a grade of A, B, C, or D. Unsuccessful grades are W, F, I or RD.
3. Completion of a program of study within 150% of the average published program length.

Failure to meet ANY of the above standards will result in a student being placed on financial aid warning, probation or deemed ineligible.

When is Academic Progress Evaluated?
A student’s satisfactory academic progress is evaluated at the end of each semester (i.e., fall, spring or summer semesters).

GPA Requirements
All students must maintain a cumulative GPA of 2.0 or higher for undergraduate and a cumulative GPA of 3.0 or higher for graduate. Failure to meet this requirement will result in either Financial Aid probation or a SUSPENSION notice being issued. If a student who was on probation status fails to meet the standards, he/she will be placed on financial aid suspension and will stay on suspension until the required cumulative GPA is achieved.

Course Completion Requirements
A minimum of 67% of the credit hours taken must be earned. For example:

<table>
<thead>
<tr>
<th>If you enroll in:</th>
<th>You must complete:</th>
</tr>
</thead>
<tbody>
<tr>
<td>15 Units</td>
<td>10 Units</td>
</tr>
<tr>
<td>12 Units</td>
<td>8 Units</td>
</tr>
<tr>
<td>9 Units</td>
<td>6 Units</td>
</tr>
<tr>
<td>6 Units</td>
<td>4 Units</td>
</tr>
</tbody>
</table>

Note: An F will not count as a completed course, but it will be calculated in the semester GPA.

Example:
Student is awarded funds for 12 credit hours for the fall semester:
1. He/she must complete 8 credit hours and maintain the required GPA to be making satisfactory academic progress.
2. If the student completes only 6 credit hours and maintains the required cumulative GPA, he/she would be placed on financial aid probation or suspension if a prior probation has been issued. To re-establish eligibility, the student must enroll, and successfully complete the required units for the semester and maintain the required cumulative GPA.
3. If the student completes all 12 credit hours, but the cumulative GPA is less than 2.0, he/she would be placed on financial aid probation or suspension if a prior probation has been issued. To re-establish eligibility, the student must enroll, and successfully complete the required units for the semester and a cumulative GPA of 2.0 or better at his or her own expense.

Complete Withdrawal: Automatic Ineligibility
If during a semester as student completely withdraws from the University or receives grades of W, F, or all Incompletes, he/she will be placed on automatic financial aid ineligible status. To re-establish eligibility, the student must enroll and successfully complete the required units for the semester and achieve the required cumulative GPA.

Program Completion Timeframe
Students cannot receive financial assistance for periods of enrollment beyond 150% of the average published program length (to be measured by all CDU credit hours attempted), including any transfer work.

Example: Life Sciences BS degree program is 120 units. The maximum timeframe to complete the program would be 180 units attempted.

Students who cannot complete the program within the maximum timeframe will no longer be eligible to receive financial assistance.

Notice
Failure to meet any of the Financial Aid Satisfactory Academic Progress (SAP) standards will result in one of the following notices being issued. Please remember that all periods of enrollment must be measured, including ones where the student may not have received financial aid.

Warning
A status a school assigns to a student who is failing to make satisfactory academic progress. The school reinstates eligibility for aid for one payment period and may do so without a student appeal. This status may only be used by schools that check SAP at the end of each payment period and only for students who were making SAP in the prior payment period.
Probation
A status a school assigns to a student who is failing to make satisfactory academic progress and has successfully appealed. Eligibility for aid may be reinstated for one payment period.

Ineligible
Status of student that has failed a warning period and has not appealed his or her status to be placed on probation.

Automatic Ineligibility
At the end of each semester, a review will be made to determine if a student completely withdrew, or received grades of all W’s, F’s or all Incompletes. These students will be automatically deemed ineligible and will be given a written notice. A student placed in Ineligible status may not receive further financial assistance until he or she meets the minimum standards under the Financial Aid Satisfactory Academic Progress Policy. A student who has been deemed ineligible has the right to submit an appeal. Please reference the appeals section below for more information.

How to Re-Establish Eligibility
Students must enroll and successfully complete the required Units for the semester and achieve the required cumulative GPA for their level of study.

Coursework earned at other institutions cannot be considered for the purpose of removing an ineligible status.

Once the required hours have been completed, and the student has earned the required cumulative GPA or higher, the ineligibility can be removed. Students should contact the Office of Financial Aid and Scholarships to request a review of the course work.

Appeals
A student who has been denied financial aid because of a failure to meet the Financial Aid Satisfactory Academic Progress Standards may petition the Financial Aid Appeals Committee (FAAC) to consider mitigating circumstances. The student’s appeal must be in writing, and supporting documentation regarding special circumstances must be provided. Student appealing the maximum timeframe (attempting more than 150% of the published degree plan or having a prior degree) must attach a degree plan completed by a CDU Academic Advisor.

Appeals will be reviewed in approximately two to three weeks after the submission of all grades for the current term. Students are responsible for all educational expenses while ineligible. The decision of the Financial Aid Appeals Committee is FINAL.

Payment Periods and Disbursements
Award limits are generally connected to a period of time and to units attempted. For instance, all of the programs except Federal Work-Study (FWS) have a maximum amount that can be awarded for an academic year or award year. In most cases, awards from the Federal Student Aid (FSA) programs must be paid in at least two installments. For most programs, the amount and timing of the payments is based on the academic terms or payment periods in the program.

FSA program disbursements (except FWS payments) must be made on a payment period basis.

Timing of Disbursements
Funds are applied after the end of the term’s Census date. If a student’s award creates a credit balance on the student’s account, the student will be given a tuition credit balance check 7 - 14 days after the funds have been applied.

Tuition Credit Balances
A credit balance occurs whenever a student has funds credited to his/her account, which exceeds the total amount of the student's direct charges. Credit balances are given directly to the student or parent in the form of a check as soon as possible but no later than 14 days after the date the funds were applied to a student's account. Regulations stipulate that a student's unpaid charges on their student account must be satisfied before a “Credit Balance check” can be processed.

Federal Regulations also require the University to document that a student has begun attending classes in order to be eligible for a credit balance check. For this reason, the Finance Office begins processing checks once the Census date has passed.

Credit Balance from PLUS Loans
Regulations require that any excess PLUS loan funds be returned to the parent, if the PLUS loan funds created the credit balance. The Finance Office determines which funds create a credit balance on a student's account. In the case where the PLUS loan is the only loan on file or exceeds the total aid for a student, any resulting credit balance will be refunded to the parent who took out the loan. If a parent wishes to have the funds proceeds from a PLUS loan to be given directly to the student the parent must authorize the Finance Office, in writing, to transfer the proceeds of a PLUS loan directly to the student. In cases where the student's non-tuition specific financial aid exceeds the amount of a parent PLUS loan, all resulting credit balances will be refunded to the student.

Credit Balances from Educational Loans
All payments that are applied to a student account are applied by priority based on the type of payment that is
received. Most scholarships and grants including University aid are tuition specific, therefore, will be applied to the student's tuition charges before any educational loans.

Students are encouraged to contact the Finance Office at (323) 563-5824 concerning any of the following:

- Credit Balances from Monthly Payment Plans
- Credit Balances from Personal Checks
- Credit Balances from Credit Card Payments
- Credit Balances from Third Party Payments

Other Sources of Financial Aid
Additional kinds of aid are available from other sources, including, but not limited to:

- **Veterans Educational Benefits**
  Matriculated veterans may be eligible for Veterans Educational Benefits. Veteran students should contact the Office of Registration and Records for details.

  Under Title 38 of the US Code, Charles R. Drew University is approved for the training of veterans and other eligible persons. Information regarding eligibility for these programs may be obtained by calling (888) 442-4551 or by visiting [www.gibill.va.gov](http://www.gibill.va.gov). The Office of Registration and Records serves as the certifying official for Charles R. Drew University. Students should contact the certifying official prior to their first enrollment certification.

- **Vocational Rehabilitation Assistance**
  For details, please contact the Office of Registration and Records.

Students eligible for any of these benefits are encouraged to apply early, as funds are limited. Contact the appropriate off-campus agency for more details.

Registration and Records
The Office of Registration and Records manages registration via MyCDU, the University’s self-service student information system. Procedures are explained to students during orientation and in materials supplied by the Office of Registration and Records. Students who register late will incur a late fee. Students are encouraged to be familiar with MyCDU self-service system in order to reach their academic goals with ease and efficiency. The following is the Registration Sequence:

- Submit a tuition deposit. (New Students)
- Meet with your advisors to select the appropriate courses (new students are registered during Discover CDU new student orientation).
- Register for courses during the Registration Period (see Academic Calendar).
- Pay tuition and all other fees for the semester.

Registration is complete when all financial obligations are satisfied.

Adding/Dropping Courses
During the academic semester, students may add or drop courses within the Add/Drop periods detailed in the Academic Calendar. Courses may not be added or dropped after the Add/Drop deadline. To add or drop a course, the student must use MyCDU, the online Student Portal, and the change must be approved by the Academic Advisor. If a student is unable to submit registration changes online, s/he must visit the Office of Registration and Records to add or drop a class. Students are responsible for managing their registration within published deadlines. Failure to drop a course in the manner outlined will otherwise result in a failing grade.

Course Withdrawal
It is the student’s responsibility to withdraw from courses. Students may withdraw from a course until the published deadline to withdraw (see Academic Calendar). When students withdraw from a course within the time period specified in the Academic Calendar, a grade of “W” will be entered. Course withdrawal will not be official until the completed Add/Drop has been processed by the Office of Registration and Records. The withdrawal must be processed by the Registrar by the published deadline. It is recommended that student meet with their Academic Advisor prior to withdrawing from a course. Failure to complete the withdrawal process will result in the assignment of a failing grade. Withdrawal forms are available from the Office of Registration and Records.

University Withdrawal
Under exceptional and documented circumstances, a student may request a complete withdrawal from the University. If approved, the student will receive a grade of “W” for each course after the withdrawal date and before the last day of the term (see Academic Calendar). Questions about the academic impact of withdrawal should be directed to the Program Director or Department Chair.

Students who seek withdrawal from the University must complete the formal withdrawal process. A petition
form must be initiated in the Office of Registration and Records and the process completed before leaving the University. This initiation of withdrawal in the Office of Registration and Records will serve as official notification that the student is withdrawing from the University. From this point, students will have 48 hours to rescind, in writing, the withdrawal request. After 48 hours, the Office of Financial Aid and Scholarships will be notified to begin the withdrawal process. Once a student is withdrawn from the University, he/she will need to follow the readmission application procedure to apply for reentry. It is recommended that students review this policy prior to withdrawing from school.

Students who withdraw, or drop all courses during a semester, will be withdrawn from the University using an Administrative Drop Form due to non-attendance, unless a Leave of Absence has been approved.

Students enrolled in a program that does not require continuous enrollment and who wish to not register for a semester will need to request a semester of non-enrollment by submitting a Request of Semester of Non-Enrollment form. This form must be received by the Office of Registration and Records prior to the beginning of the semester for which the student is requesting to not register. If the Request of Semester of Non-Enrollment form is not received, the student will be withdrawn from the University. If the student does not register for the semester immediately following the semester of approved non-registration, he/she will be withdrawn from the University.

When a student who received Federal Title IV financial aid withdraws from the University, the unearned portion of these awards may be returned to Federal Title IV financial aid programs. Charles R. Drew University returns any unearned portion of financial aid in accordance with Department of Education federal guidelines. See the Office of Financial Aid and Scholarships for more information.

Students who withdraw from the University and decide to return at a later date must reapply for admission under the degree requirements in effect at the time of readmission. See Readmission policy.

Medical Withdrawals
Permission to drop courses for health reasons must be requested in writing and supported by the student's physician and Program Director. Requests of this nature must be presented to the student's Program Director prior to the final examination. Under no circumstances will a medical withdrawal be considered after the final examination has been taken.

Auditing Courses
Students must file an application in the Office of Registration and Records to obtain permission to audit a course. All audit requests must be filed by the Add/Drop Deadline as published in the Academic Calendar and students must submit the audit fee. No credit or grade will be given for audited courses. Audited courses cannot be repeated for a grade by registering for the course in a subsequent semester and paying the full tuition and fees. Auditor status cannot be changed to credit status. Non-matriculated students may audit courses with approval of the Program Director or Department Chair and the instructor. Non-matriculated students are required to pay the corresponding tuition and fees.

Cancelled Courses
Courses may be cancelled at the discretion of the University. Students enrolled in a cancelled course will be permitted to enroll in other open courses. Cancellation of courses can occur through the end of the second week of the term. Students who have a course(s) cancelled by the University because of low enrollment are eligible for a full refund of tuition paid for those courses.

Concurrent Enrollment
Petitions for concurrent enrollment are available in the Office of Registration and Records. Petitions must be authorized by the student’s Program Director or Department Chair and are subject to the University Transfer, Residency and Academic Load policies. Students who register at other institutions and who have not obtained advance approval may not be able to receive credit for the concurrent enrollment.

Enrollment Certification
Certification of Enrollment letters will be provided to students who do not have an outstanding financial obligation to the University upon the student’s written request. Forms are available in the Office of Registration and Records. Issuance of Certifications of Enrollment may take up to five business days and typically longer at the beginning of a term.

Academic Advising
Students are encouraged to seek academic counseling services from their faculty academic advisor. As a fundamental and integral part of the educational process, emphasis is placed on assisting students to grow and to accept responsibility for their own actions.

Recognizing that each academic program is unique, the primary responsibility of the counseling service is to respect students’ individuality, ensure confidentiality,
encourage development and foster an environment in which students can attain academic success.

The overall goal of academic advising is to promote personal, educational and professional growth to individuals within the student body and the surrounding community.

Graduation Process
Students who expect to receive degrees and/or certificates must file an Application for Graduation with the Office of Registration and Records. Filing deadlines are published on the Registration and Records web page. A Graduation Check will be performed to identify program completion. The Graduation Check will be provided to the student and the student’s program so that advising can take place leading to successful program completion.

Graduation Clearance
All graduating students must complete a Graduation Clearance form and obtain appropriate departmental signatures before receiving any degrees or certificates. Furthermore, students who received financial aid must participate in exit counseling prior to obtaining a clearance signature from the Office of Financial Aid and Scholarships. For more details about exit counseling, see Financial Aid section of this Catalog. This clearance procedure should be initiated 90 days prior to the last day of school before graduation. Students who have outstanding financial obligations to the University will not receive degree or certificate verification until the obligations have been satisfied.

Commencement
The annual Commencement Ceremony is held at the end of each Spring in celebration of the achievements of our graduates. For more information, see the University website at www.cdrewu.edu.

Transcripts**
Unofficial Transcripts: Students have access to their unofficial transcript via the University’s Self-Service student information system, MyCDU.

Official Transcripts: Official transcripts can be ordered online at www.iwantmytranscript.com/cdrewu. Standard processing is five business days. Expedited processing (next business day) is available for an additional fee. Overnight shipping via FedEx is also available for an additional fee.

Transcript Fees*
Each Request ..............................................$2.25
Each Transcript .............................................$2.00
Rush Processing ..................................................$9.00
FedEx Overnight Shipping ..................................$30.00

*Fees subject to change.

College of Medicine students enrolled in the Drew/UCLA Medical Education Program are enrolled at UCLA and may request official transcripts from UCLA Registrar’s Office.

Note: No academic records will be released to any CDU student or alumnus who has an outstanding financial obligation to the University.

Family Educational Rights and Privacy Act (FERPA)
Charles R. Drew University of Medicine and Science is committed to meeting the provisions established in the Family Educational Rights and Privacy Act (FERPA), which protects the rights of students who are enrolled or who were previously enrolled in the University. This policy also applies to prospective students who intend to enroll and have initiated the application process.

Definitions
For purposes of this policy only:

Student – Any person who enrolls or has been enrolled at Charles Drew University.

Prospective Student – Any person who has initiated an application or admission and intends to enroll as a student.

Third Parties – Non-university persons or entities.

University – Hereafter in this document, a reference to Charles R. Drew University of Medicine and Science.

University Official – University employees who have a legitimate educational interest in the records.

Education Records – Any record (in handwriting, print, tapes, film or other medium) maintained by Charles Drew University, or an agent of the University, which is directly related to a student, except:

1. A personal record kept by a staff member, if it is kept in the personal possession of the individual who made the record, and information contained in the record has never been revealed or made available to any other person except the maker’s temporary substitute.

2. An employment record of an individual whose employment is not contingent on the fact that he or
she is a student, provided the record is used only in relation to the individual’s employment.

3. Records maintained by the University’s Student Health Services, Personal Counseling Services or Disability Resource Programs offices if the records are used only for treatment of a student and made available only to those persons providing treatment.

4. Alumni records, which contain information about a student after he or she is no longer in attendance at the University and the records do not relate to the person as a student.

Legitimate Educational Interest – a school official has a legitimate educational interest in the protected education records, a legal “right to know” if the official is:

1. Performing a task that is specified in his or her position description or contract agreement related to a student’s education; or related to the discipline of a student.

2. Providing a service or benefit relating to the student or student’s family, such as health care, counseling, job placement or financial aid.

3. Maintaining the safety and security of the campus.

The custodian of record as designated in the “Accountability” section, above, will determine whether a legitimate educational interest exists, whether the school official has a legal right to know, on a case-by-case basis. When the custodian has any question regarding the request, the custodian should withhold disclosure unless the custodian obtains written consent from the student or the concurrence of a supervisor or other appropriate official that the record may be released.

Annual Notification
The University will notify currently enrolled students of their rights under FERPA by publishing a notice in the University Catalog and on the Charles R. Drew University website.

Disclosure of Education Records to Student
A. Procedure of Students to Inspect Their Education Records

To inspect or review an education record, a student must submit a written request to the Registrar. If students wish to inspect their student conduct records, the written request must be submitted to the Dean of their respective college or school. The student must sign the request; describe the specific records to be reviewed; and must set forth the name under which the student attended the University; the student’s ID number; and the student’s last date of attendance. Proper picture identification must be presented before the documents may be reviewed. The custodian of record, or designee, may waive the requirement for a written request. For example, the custodian of record for the student account may waive the requirement for a written request when the student requests a copy of the current statement of tuition and fees.

Some student records may no longer be retained and therefore, the file may not exist for the student to inspect.

B. Right of University to Refuse Access

The University reserves the right to refuse permission to the inspection and review of:

- Financial statements of the student’s parents;

- Confidential letters and confidential statements placed in the education record after January 1, 1975 for which the student has waived the right of access in writing for admission, employment or receipt of an honor or honorary recognition, except when these documents have been used for any purpose other than that for which they were originally intended; and

- Documents excluded from the FERPA definition of education records (such as those listed in the “Definitions” section above.)

C. Refusal to Provide Copies

The University reserves the right not to provide copies of transcripts it has received from other education institutions. It also reserves the right to deny copies of the Charles R. Drew University transcripts if the student has an unpaid financial obligation to the University.

D. Request for Copies

If health reasons or extreme distance from the University prevents the student from inspecting the education record in the office of the respective custodian of record, then copies of the specific education record requested will be mailed to the student. The student must pay all copying expenses in advance of the release of the record. The requirement of a written request will not be waived in these circumstances.

Disclosure of Education Records to Individual/Agency Other Than the Student to Whom the Record Pertains
A. Disclosure of Education Records to University Officials

The University will disclose information from a student’s education records to University officials who have a legitimate educational interest in the records.

A University official has a legitimate educational interest if the official is:

- Performing a task or service specified in the official’s position description or contract;
- Performing an instructional task directly related to the student’s education;
- Performing a task related to the discipline of a student;
- Performing as a faculty advisor, Program Director, Department Chair or Dean; (this pertains exclusively to access to the student’s academic records);
- Providing a service or benefit relating to the student, including, but not limited to, health care, counseling, job placement, financial aid or health and safety emergency.

B. Disclosure to Others

Charles R. Drew University may disclose information from a student’s education records to other than University officials only with written consent of the student, except:

a. To officials of another school where the student seeks or intends to enroll;

b. To certain authorized government representatives;

c. In connection with the student’s financial aid request or award and the information is necessary for certain purposes set forth in the regulations;

d. To organizations conducting studies for or on behalf of the University;

e. To accrediting organizations to carry out their accrediting function;

f. To comply with a judicial order or lawfully issued subpoena and the University has made reasonable effort to notify the student of the order or subpoena in advance of compliance;

g. To appropriate parties in a health or safety emergency;

h. To victims of crimes of violence or of a non-forcible sex offense who requests the final results of a disciplinary review process held by the institution against the perpetrator on account of the crime or offense; or

i. In connection with the University’s obligation to respond to a request from military recruiters made under the Solomon Amendment.

C. Records of Requests for Disclosure to Individuals Other Than the Student or University Officials

A record will be maintained of all requests for access to and disclosures of information from the education records of each student except as stated below. The record will indicate the name of the party making the request, any additional party to whom it may be disclosed and the party’s legitimate interest in requesting or obtaining the information. The record may be reviewed by the student. A record of disclosures does not need be kept if those disclosures were made to the student, a University official with legitimate educational interests, a party with written consent from the student, or a party seeking directory information.

D. Directory Information

The University designates the following items as directory information:

- Student’s name
- University assigned e-mail address
- Major field of study
- Dates of attendance
- Full-time or part-time status
- Degrees, awards and honors received
- Dates degrees conferred
- Participation in officially recognized activities.

Directory information may be released without prior written approval unless notified in writing by the student that all information is to be held in confidence by the University. Requests to withhold
directory information should be sent in writing to the Registrar. The student’s records will be kept confidential until the student requests in writing that the confidentiality hold may be removed.

E. Challenge and Correction of Education Records

Students have the right to ask to have education records corrected that they believe are inaccurate, misleading or in violation of the privacy or other rights of the student. The following are the procedures for correcting the records.

a. The student must request an informal discussion of the questionable item with the custodian of record, who will determine whether to comply.

b. If the student is not satisfied with the result and still wishes to have the record corrected, the student must submit a written request for a change in the education record. This written request must state why the education record is inaccurate, misleading or violates the privacy or other rights of the student. This request must be given to the Provost. The Provost will then forward the request to the appropriate University designee for review.

c. Upon receipt of the request, the University designee shall obtain a written statement from the records custodian that explains why the request for the change in the education record was denied at the informal stage.

d. After a review, the University designee will notify the student whether or not the University will comply with the requested change. If not, the designee will notify the student of the right to a hearing to challenge the information believed to be inaccurate, misleading or in violation of the student’s rights. A copy of this communication will be sent to the Provost.

e. Upon receiving a written request for a hearing, the Provost, or designee, shall arrange for a hearing within thirty (30) working days after receipt of the request. The student shall be notified at least fifteen (15) working days in advance of the date, time and place of the hearing. The right to a hearing does not include any right to challenge the appropriateness of a grade determined by an instructor. The Provost’s Office can apprise students of the appropriate process for challenging a grade.

f. The Provost shall appoint a hearing officer to conduct a hearing. The hearing officer shall be a disinterested party; however, the hearing officer may be an official of the University. The student will be afforded a full and fair opportunity to present evidence relevant to the issues raised in the original request to amend the student’s education records. In accordance with University policy, attorneys will not be permitted to attend the hearing.

g. The hearing officer will submit a written decision to the Provost based on the evidence presented at the hearing. The Provost’s Office will communicate the decision in writing to the student within fifteen (15) days after the hearing.

h. If the University’s decision is that the challenged information is inaccurate, misleading or otherwise in violation of the privacy or other rights of the student, the record will be amended accordingly and the student will be notified in writing of the amendment by the Provost.

i. If the University’s decision is that the challenged information is not inaccurate, misleading or in violation of the student’s right of privacy, the Provost will inform the student of the right to place a statement in the record commenting on the challenged information and/or a statement setting forth reasons for disagreeing with the decision. This statement will be maintained as part of the education record as long as that record is maintained, and the statement will be disclosed whenever the University discloses the portion of the record to which the statement relates. The hearing officer’s decision is final.

F. Compliance with FERPA

A student has the right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address for the office that administers FERPA is:

Family Policy Compliance Office
Student Conduct

Sexual Harassment
Charles R. Drew University views sexual harassment as a violation of Title VII of the Civil Rights Act of 1964. Sexual harassment will not be tolerated at the University. Such conduct is outlined as follows:

- Unwanted or offensive sexual flirtations, touching, advances or propositions.
- Verbal abuse of a sexual nature.
- Unwanted or offensive graphic or suggestive comments about an individual’s dress or body.
- Sexually degrading words to describe an individual.
- The display of sexually suggestive objects or pictures in the workplace.

If any student or employee encounters conduct believed to be inconsistent with University policy, he or she is urged to report the information immediately to the University’s Title IX Coordinator at (323) 563-5827.

The University’s policy also prohibits all forms of harassment which are based on a person’s ethnicity, age, physical or mental disability, sexual orientation or any other basis prohibited by federal, state or local law.

Policy on Bullying and Anti-Harassment
The University has a zero tolerance policy for harassment, bullying, violent acts or threats of violence against staff, students, faculty or visitors. The University is committed to providing a workplace, learning, study and social environment free of harassment and bullying which is healthy, conducive to productivity, comfortable and where the rights and dignity of all members of the campus community are respected. This includes staff, students, faculty and visitors to the University.

The University expects all members of the university community to treat each other with respect, courtesy and consideration. All members of the university community have the right to expect professional behavior from others, and a corresponding responsibility to behave professionally towards others.

A. DEFINITIONS

Bullying is defined as mistreatment of a person that is deliberate, violates another person’s dignity, creating an intimidating, hostile, degrading, humiliating, or offensive environment for someone, hurtful and repeated, repeated oppression, usually psychological of a less powerful person by a more powerful person or group of persons and that prevents the person from performing his or her job (refer also to CDU – APM I.E. 00410 Violence in the Workplace and CDU – Faculty Manual Revised 2011 I. Workplace Violence).

Harassment is when a person subjects another to or engages in unwanted and unwarranted conduct which has the purpose or effect of violating that other’s dignity, or creating an intimidating, hostile, degrading, humiliating or offensive environment for that other person. Harassment may involve repeated forms of unwanted and unwarranted behavior, but a one-off incident can also amount to harassment (refer also to CDU – APM I.E. 00410 Violence in the Workplace and CDU – Faculty Manual Revised 2011 I. Workplace Violence).

Harassment on the grounds of sex (including gender reassignment), race, religion or belief, disability, sexual orientation or age may amount to unlawful discrimination. Harassment may also breach other legislation and may in some circumstances be a criminal offence, e.g. under the provisions of the Protection from Harassment Act 1997.

Reasonable and proper management instructions administered reasonably, or reasonable and proper review of a member of staff’s or a student’s work and/or performance will not constitute harassment or bullying.

Behavior will not amount to harassment if the conduct complained of could not reasonably be perceived as offensive. The intention or motives of the person whose behavior is the subject of a complaint is not conclusive in deciding if behavior amounts to harassment or bullying. Bullying can take many forms and can include but are not limited to:

- Slander
- Offensive comments or body language
- Name Calling
- Yelling
- Comments about appearance or lifestyle
- Insulting, abusive, embarrassing, teasing or patronizing behavior or comments
- Verbal threats or intimidation
- Unfair, humiliating, intimidating and/or demeaning criticism
- Ignoring
- Open hostility and/or aggression
- Physical threats/assaults
- Hitting, punching shoving
- Deliberately undermining a competent person by overloading with work
- Unreasonable work assignments
- Menial task assignments
- Gossiping
- Spreading rumors
- Leaving people out on purpose; isolating from normal work or study place, conversations or social events
- Publishing, circulating or displaying pornographic, racist, sexually suggestive or otherwise offensive pictures, language or other materials
- Unwanted physical contact, ranging from an invasion of space (personal or otherwise) to a serious assault
- Breaking up friendships
- Cyberbullying: using the Internet, mobile phones or other digital technologies to harm others

Many of these examples of behavior may occur through the use of the Internet, email, social networking sites or telephone. All of the examples above may amount to bullying, particularly when the conduct is coupled with the inappropriate exercise of power or authority over another person. Being under the influence of alcohol, illegal drugs or otherwise intoxicated is not an excuse for harassment, and may be regarded as an aggravating feature.

B. RETALIATION

Charles R. Drew University prohibits retaliation against any employee or person for bringing a complaint of discrimination, bullying or harassment pursuant to this policy. This policy also prohibits retaliation against a person who assists someone with a complaint of discrimination, bullying, or harassment, or participates in any manner in an investigation or resolution of a complaint of discrimination, bullying or harassment.

Retaliation occurs where a person is subjected to detrimental treatment because she or he has, in good faith, made an allegation of bullying or harassment, or has indicated an intention to make such an allegation, or has assisted or supported another person in bringing forward such an allegation, or participated in an investigation of a complaint, or participated in any disciplinary hearing arising from an investigation.

The University seeks to protect any member of the university community from retaliation arising as a result of bringing a complaint or assisting in an investigation where they act in good faith. Retaliation is a form of misconduct, which may itself result in a disciplinary process.

C. COMPLAINTS

Information regarding applicable policies and procedures for resolving complaints of discrimination, bullying and harassment and for pursuing available remedies is available in HR, Students Affairs or Academic Personnel.

D. CONFIDENTIALITY

All information concerning allegations of bullying and harassment must and will be treated in the strictest confidence and breaches of confidentiality may give rise to disciplinary action. All parties involved in a complaint (including any witnesses who may be interviewed as part of any investigation) should maintain the confidentiality of the process.

PROCEDURE

For the purposes of this procedure, “harassment” is taken to include bullying and victimization. Incidents of harassment that occur within the University environment will normally be dealt with under the appropriate University procedure.

The references in this procedure to the “Department Head” should be taken to mean the head of the department, department chair, head of division, head of a school, or their equivalent or the person to whom any of these has formally delegated his/her responsibility.

A. COMPLAINTS INVOLVING STUDENTS

1. Complaints of bullying or harassment against students, which arise within the University environment, will normally be dealt with under the appropriate University and student policy and procedures.
2. Other complaints of bullying or harassment against students may be considered by the Provost’s Office.
3. Advice may be sought from the Provost’s Office if the subject of the complaint is a student.

B. COMPLAINTS INVOLVING UNIVERSITY STAFF

1. Any complaints against University staff
relating to supervision will be dealt with under University policy and procedures.

2. The procedure below applies in all cases where the person who is the subject of the complaint is a member of University staff on campus (refer to CDU – APM I.E. 00640 Grievance and Complaint Process).

C. COMPLAINTS INVOLVING VISITORS TO CAMPUS

1. Any complaints against University visitors will be dealt with under University policy and procedures.
2. The procedure below applies in all cases where the person who is the subject of the complaint is a University visitor on campus.

D. INITIAL ACTION

An individual who feels that she/he is being harassed in the course of their University activities such as work, studies or University leisure activities may feel able to approach the person in question to explain what conduct she/he finds upsetting, offensive or unacceptable and ask that person to refrain from that behavior. Such an informal approach may be all that is required to resolve the issue. The University does not wish to be prescriptive as to the form of any such action that the complainant or the person who is the subject of the complaint may wish to make.

If the complainant is unable or reluctant to approach the person complained against, she/he may approach his/her immediate supervisor, departmental administrator, department head or equivalent to ask for help in achieving a resolution of the problem. Human Resources, Students Affairs, Provost’s Office, Office of the Dean, Academic Affairs or Public Safety will also be available to advise and assist.

E. COMPLAINTS PROCEDURE

1. If informal action does not succeed in resolving the situation, or would not be appropriate given the nature of the complaint, the complainant should make a written complaint to his/her department head.
2. If the complainant feels it is not appropriate to approach that person, the relevant head of division,
3. If any of the parties considers that the department head has a conflict of interest in the complaint, the complaint may be referred to the head of division.

4. In cases where it is not immediately clear to whom a complaint should be addressed, advice and/or complaint filed with:
   a. Human Resources
   b. Student Affairs
   c. Office of the Dean
   d. Provost’s Office
   e. Academic Personnel
   f. Public Safety

5. The complainant should set out as clearly and succinctly as possible:
   a. The nature of the behavior that she or he is concerned about;
   b. The effect of this behavior on him/her;
   c. The resolution she/he is seeking.
   d. Dates and details of any witnesses to any incidents referred to in the complaint, together with any documentary evidence;
   e. Explain what attempts, if any, have been made to resolve the difficulties and the outcome she/he is seeking.

6. A copy of all written complaints should be sent to the Chief Human Resources Officer, Public Safety and the Risk Manager for information.

Every effort will be made to achieve a prompt resolution to the complaint – the aim being to conclude the complaint within a reasonable period of time. Both the complainant and the person who is the subject of the complaint will be expected to cooperate with the University in achieving that result.

There may be circumstances in which an aggrieved party is not willing, or able, to make a formal complaint but the department head considers that the implications for the aggrieved person or others actually or potentially affected are serious. In this case, the department head will consult the:

1. Chief Human Resources Officer in the Department of Human Resources (Staff and Faculty),
2. President in the Office of the President (Staff, Faculty, Students and Visitors), or
3. Provost in the Office of the Provost (Students and Faculty)

who may initiate an investigation and make a decision of further action on the basis of such evidence as is available.

F. ACTION BY THE DEPARTMENT HEAD ON
RECEIPT OF A COMPLAINT

On receipt of a complaint, the department head (or his/her designee) will in consultation with Human Resources or Office of the Provost take such steps as she/he thinks necessary or appropriate to understand the nature of the complaint and the outcome sought including:

1. Informing the person against whom a complaint has been made of the allegations against him/her;
2. Meeting separately with the complainant and the alleged;
3. Speaking to other relevant people on a confidential basis; and/or
4. Obtaining further relevant information.
5. The department head will then decide how to proceed and will inform the parties in writing.
6. She/he may make such enquiries as are necessary to determine the complaint, or may commission an investigation.

G. INVESTIGATION

The purpose of an investigation is to establish the relevant factual evidence in connection with the allegation(s) made by the complainant. As a general rule, the investigator should not have had previous involvement with the issues in the case. The investigation should be concluded as soon as is reasonably practicable.

1. The investigator will prepare a report and make recommendations on possible courses of action.
2. The department head will inform the complainant and the person who is the subject of the complaint in writing of the conclusions she/he has reached having reviewed the evidence, including any investigation report of the action the department head intends to take; and of the reasons for any such action.
3. The head of department will also inform any other parties who have been asked to participate in an investigation that the investigation has been concluded.

H. POSSIBLE OUTCOMES OF A COMPLAINT

Depending on the nature of the complaint and the evidence found, including the findings of any investigation report, the department head, in consultation with Human Resources or the Provost’s Office, will either:

1. Take no further action, other than, where appropriate, implementing or suggesting steps that would help to restore reasonable working relationships between the parties. This approach will usually be appropriate where the claim(s) of bullying or harassment are considered to be unfounded and where there is a continuing relationship between the parties.
2. Initiate resolution of the issues (e.g. by requiring that certain individuals undergo specific training or implementing practical arrangements to improve working relationships).
3. If a successful resolution is achieved the case will be closed, but the situation will be monitored for an appropriate period. This approach will usually be appropriate where the evidence does not support a claim of harassment but it is clear that either party has demonstrated behaviors that are likely to lead to further issues between them if unresolved or, alternatively that there are structural issues within a department that require management attention.
4. Institute disciplinary proceedings where the department head is reasonably satisfied that there is sufficient evidence to support allegations of bullying or harassment of a sufficiently serious nature as to merit disciplinary action. Such proceedings may include paid or unpaid investigatory leave, suspension, termination, and/or expulsion from the University.
5. In rare cases disciplinary action may be instituted against the complainant if the department head is satisfied that the complaint of bullying or harassment is unfounded and not made in good faith.

Disciplinary Procedures

When students register for classes at Charles R. Drew University, they are agreeing to abide by University, College and Program regulations. Although many of these regulations are set forth in this University Catalog, more information may be obtained from the program offices and the Office of Registration and Records.

Student Code of Conduct

The primary concern of Charles R. Drew University of Medicine and Science (CDU) are the students, their growth and development, and their experience while enrolled at the University. CDU attempts to provide for all students a campus environment that is conducive to academic achievement as well as social and individual growth. To that end, rules, regulations, and guidelines
governing student behavior and the student’s relationship with the University have been formulated into a student code of conduct.

The CDU Student Code of Conduct is established to foster and protect the core mission of the University, to foster the scholarly and civic development of the University’s students in a safe and secure learning environment and to protect the people, properties, and processes that support the University and its missions. All students are expected to conduct themselves in behaviors that contribute toward this end.

Enrollment at Charles R. Drew University of Medicine and Science is considered implicit acceptance of these and other policies applicable to students, all of which are educational in nature and designed to help students understand expectations and accept responsibility for their own actions. The code applies to the on-campus conduct of all students and registered student organizations, including conduct using university computing or network resources. The code also applies to the off-campus conduct of students and registered student organizations in direct connection with:

A. Academic course requirements or any credit-bearing experiences, such as internships, field trips, study abroad, or student teaching;
B. Any activity supporting pursuit of a degree, such as research at another institution or a professional practice assignment;
C. Any activity sponsored, conducted, or authorized by the university or by registered student organizations;
D. Any activity that causes substantial destruction of property belonging to the university or members of the university community, or causes or threatens serious harm to the safety or security of members of the university community; or
E. Any activity in which a police report has been filed, a summons for conduct or indictment has been issued, or an arrest has occurred for a crime of violence.

Students should also consult with their respective academic department for conduct expectations specific to their academic program.

Student behavior that is not consistent with the Student Code of Conduct is addressed through the Student Code Procedures that are designed for the fair and equitable investigation and resolution of formal complaints.

The University reserves the right to administer the code and process with the hearing process even if the student withdraws from the university, is no longer enrolled in classes, or subsequently fails to meet the definition of a student while a disciplinary matter is pending.

Students are subject to city, state, and federal laws while at the University, and violations of those laws may also constitute violations of CDU’s Code of Conduct. In such instances, the University may proceed with university disciplinary action under the Code of Conduct independently of any criminal proceeding involving the same conduct and may impose sanctions for violation of the code even if such criminal proceeding is not yet resolved or is resolved in the student’s favor.

Any student found to have engaged, or attempted to engage, in any of the following conduct while within the University’s jurisdiction will be subject to disciplinary action the University. Attempt shall be defined as conduct that, if successful, would constitute or result in the prohibited conduct. Any student who abandons an attempt or prevents the prohibited conduct from occurring under circumstances that demonstrate a complete and voluntary renunciation of the prohibited conduct will not be subject to disciplinary action the University.

1. Any activity that compromises the academic integrity of the University or disrupts the educational process. Examples of academic misconduct include, but are not limited to:
   a. Cheating, plagiarism, or other forms of academic dishonesty that are intended to gain an unfair academic advantage, including violations defined within the University’s Academic Dishonesty Policy.
   b. Furnishing false information to a University official, faculty member, or campus office.
   c. Forgery, alteration, or misuse of a University document, key, or identification instrument.
   d. Misrepresenting oneself to be an authorized agent of the University or one of its auxiliaries.

2. Unauthorized entry into, presence in, use of, or misuse of University property.

3. Willful, material, and substantial disruption or obstruction of a University-related activity, or any on-campus activity.
4. Participating in an activity that substantially and materially disrupts the normal operations of the University, or infringes on the rights of members of the University community.

5. Willful, material, and substantial obstruction of the free flow of pedestrian or other traffic, on or leading to campus property or an off-campus University-related activity.

6. Disorderly, lewd, indecent, or obscene behavior at University-related activities/events and/or directed toward a member of the University community.

7. Conduct that threatens or endangers the health or safety of any persons within or related to the University community, including physical abuse, threats, intimidation, harassment, or sexual misconduct. See also the Policy on Bullying and Anti-Harassment.

8. Hazing or conspiracy to haze. Hazing is defined as any method of initiation or pre-initiation into student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university, or other educational institution in the state of California (CA Penal Code 245.6), and in addition, any act likely to cause physical harm, personal degradation or disgrace resulting in physical or mental harm, to any former, current, or prospective student of any school, community college, university or other educational institution. The term “hazing” does not include customary athletic events or school sanctioned events.

9. Use, possession, manufacture, or distribution of illegal drugs or drug-related paraphernalia (except as expressly permitted by law and University regulations) or the misuse of legal pharmaceutical drugs while on campus or at a University-related activity.

10. Use, possession, manufacture, or distribution of alcoholic beverages (except as expressly permitted by law and University regulations), or public intoxication while on campus or at a University-related activity.

11. Theft of property or services from the University community, or misappropriation of University resources.

12. Unauthorized destruction or damage to University property or other property in the University community.

13. Possession or misuse of firearms or guns, replicas, ammunition, explosives, fireworks, knives, other weapons, or dangerous chemicals (without the prior authorization of the campus president) on campus or at a University-related activity.

14. Unauthorized recording, dissemination, or publication of academic presentations (including handwritten notes) for a commercial purpose.

15. Misuse of computer facilities or resources, including:
   a. Unauthorized entry into a file, for any purpose
   b. Unauthorized transfer of a file
   c. Use of another’s identification or password
   d. Use of computing facilities, campus network, or other resources to interfere with the work of another member of the University community
   e. Use of computing facilities and resources to send obscene or intimidating and abusive messages
   f. Use of computing facilities and resources to interfere with normal University operations.
   g. Use of computing facilities and resources in violation of copyright laws.
   h. Violation of a CDU computer use policy.

16. Violation of any published University policy, rule, regulation, or presidential order, or federal, state and local laws.

17. Failure to comply with directions, interference with any University official or public safety officer while acting in the performance of his/her duties.

18. Any act chargeable as a violation of a federal, state, or local law that poses a substantial threat to the safety or well-being of members of the University community, to property within the University community or poses a significant threat of disruption or interference with University operations.

19. Inciting or participating in riotous behavior with the purpose to commit or incite action that presents a clear and present danger to others, causes physical harm to others or damages University property or property of University community members.

20. Using electronic or other means for recording images without others’ prior knowledge and in a location where there is a reasonable expectation of privacy. The storing, sharing and/or distribution of such unauthorized images
is also prohibited.

21. Violation of the Student Conduct Procedures, including:
   a. Falsification, distortion, or misrepresentation of information related to a student discipline matter.
   b. Disruption or interference with the orderly progress of a student discipline hearing.
   c. Initiation of a student discipline proceeding in bad faith.
   d. Attempting to discourage another from participating in the student discipline matter.
   e. Attempting to influence the impartiality of any participant in a student discipline matter.
   f. Verbal or physical harassment or intimidation of any participant in a student discipline matter.

22. Failure to comply with the sanction(s) imposed under a student discipline proceeding.

23. Encouraging, permitting, or assisting another to do any act that could subject him or her to discipline. See also the policy on Bullying and Anti-Harassment.

Student Responsibility

Students admitted into Charles R. Drew University assume an obligation to behave in a manner compatible and consistent with the function of the University as an educational institution. The following sections outline the University’s expectations relating to student responsibility and performance, which should be taken to include academic integrity as well as professional and ethical behavior.

- Students must uphold the University and/or College/School rules and regulations regarding examination behavior, fabrication of information, plagiarism and other types of academic dishonesty as described above.

- Students must refrain from obstructing or disrupting teaching, administration or other University activities, including the work of the University's public service functions.

- Students must work with the institution in discouraging negative behavior among peers by informing classmates of appropriate conduct and behavior.

- Students must conduct themselves with the professionalism expected of clinicians dealing with patients, families, colleagues other health care workers and the public.

Student Life

The University strives to satisfy the needs and interests of its students by ensuring that the learning atmosphere is conducive to their social, cultural and spiritual growth. The University endeavors to serve the educational and personal needs of its students by committing to the concept that an educational institution exists for the purpose of assisting the individual student in the learning process. The realization and development of a sense of local community, state, national and international responsibility is also central to student life at Charles R. Drew University.

Charles R. Drew University offers a variety of campus opportunities for student involvement and leadership development, ranging from informal groups in which students share common interests to formal and organized participation in elective government.

Student Government

Charles Drew Student Government (CDSG) – College of Science and Health (COSH)

The Charles Drew Student Government (CDSG), in the College of Science and Health, provides opportunities for students in social, service, curricular and special interest programs. CDSG elects officers each year to serve on the Executive Council to represent the general student population. Enrolled students of the University are encouraged to participate.

The CDSG Executive Council consists of nine elected student leaders: President, Vice-President, Secretary and Treasurer, as well as 5 additional members from the student body and Student Affairs committee. The nine-member CDSG Executive Council and each program’s two student representatives make up the Legislative Council for the Charles Drew Student Government.

CDSG Elections

The Charles Drew Student Government (CDSG) sponsors a campus-wide student government election during the Spring Semester for the upcoming school year. All enrolled students in COSH who are in good standing are eligible to participate in the CDSG election.
Eligibility Requirements for CDSG Executive Council
Candidates for an elected office must complete the required nominating application and meet the eligibility requirement as stated in the CDSG Bylaws before candidacy is approved by the Office of Student Education and Services.

Student Government Association – School of Nursing (SON)
The purpose of the Student Government Association (SGA) of the Mervyn M. Dymally School of Nursing is to promote awareness of the University’s nursing graduate program among academic and local communities. It serves as a means of communication between students, faculty and administration and endeavors to augment student understanding of graduate opportunities. Student leaders collaborate with other CDU student organizations to achieve mutual goals and to take action to enhance student services, academic programs and the overall experience of graduate nursing students.

All student nurses enrolled in the CDU Mervyn M. Dymally School of Nursing are, by virtue of enrollment, members of the Student Government Association. Members remain in good standing by obeying the rules and regulations governing the School of Nursing and its students. There are no dues and all activities of the Association are open to any enrolled nursing student.

SGA Elections
Only active members of SGA shall be eligible for nomination to seek or hold office, and they must be officially enrolled in the CDU Mervyn M. Dymally School of Nursing. To be elected, it is necessary for a member to be nominated and thereupon receive majority approval of those active members present to vote. Election dates shall be set by the current administration of officers, and all voting shall be by secret ballot.

Clubs and Organizations

California Student Nurses Association (CSNA)
The primary goals of CSNA are to assume responsibility for contributing to nursing education in order to provide for the highest quality of health care, to provide programs representative of fundamental interests and concerns to nursing students, and to aid in the development of the whole person, including his/her professional role, his/her responsibility for health care of people in all walks of life.

CEAL (Critical Exploration of Academic Literature)
CEAL was established by CDU students to facilitate a safe and active environment for students who are interested in gaining exposure to scientific literature while promoting critical thought. The organization’s goal aims to show the importance of being knowledgeable about the evolving medical field while also providing a platform for students to discuss and critically analyze articles amongst their peers.

Charles R. Drew University Alumni Association
All graduates of Charles R. Drew University of Medicine and Science are members of the CDU Alumni Association. The CDU Alumni Association aims to ensure that CDU continues to be an educational support and networking resource after graduation. Alumni may share their experiences and enjoy the benefits of membership by joining the alumni online community at www.cdrewu.edu/alumni.

Chosen Bible Study
The purpose of CHOSEN is to provide and promote a Christian community of one accord on CDU’s campus, in order to discuss and study the Holy Bible with the hope of building strong character and values for the benefit of oneself and others. We desire to produce individuals that are spiritually equipped and prepared for the current and future seasons of life through the application of the Christian livelihood as expressed in the commandments and life of our Lord and Savior, Jesus Christ.

Delta Epsilon Iota - Alpha Kappa Delta Chapter
Delta Epsilon Iota is an academic honor society. Founded in 1994 at the University of Georgia, Delta Epsilon Iota is the nation’s first and only academic honor society structured around career development. We work with University Career Centers nationwide to develop local, student-led and career-minded organizations. Our mission is to encourage academic excellence, educate our members about career development, and promote the principles of Dedication, Enthusiasm and Initiative in all aspects of campus life. Eligible students must have a minimum GPA of 3.30 and have a minimum of 30 completed semester hours.

Delta Omega Honor Society
The Gamma Phi Chapter of Delta Omega is the honor society in public health. The organization’s goals are to engage in mentorship opportunities, to contribute to academic scholarship, to present research at journal clubs, conferences and other events, and to promote student success. Core values include leadership, mentorship, scholarship and community responsibility.

Global Health Initiative
The mission of CDU Global Health Initiative is to serve underprivileged populations from a global
perspective by improving patient centered care and individualizing patient needs. We seek to ensure health advocacy, provide culturally sensitive health care, and to use evidence based practice as a means to promote health and educate communities in hopes of preventing disease.

**Master of Public Health Student Association (MPHSA)**
The MPHSA is a graduate student-led organization comprised of leaders from the Urban Public Health program, which promotes public health on campus and within the surrounding communities in South Los Angeles. The MPHSA promotes academic success and career development to contribute to the University’s mission.

**Men in Nursing**
The primary mission of the Chapter is to be the acknowledged local and regional organization for men in nursing. The purpose of the organization is to provide a framework for nurses, as a group, to meet, to discuss and to influence factors which affect men as nurses.

**Pre-Health Society**
The Pre-Health Society is an organization with the purpose of helping students become better candidates for advanced studies in professional health programs. The Pre-Health Society hosts workshops focused on writing personal statements, MCAT preparation and preparing for medical school interviews, and provides resources for research and volunteering opportunities focused on community outreach in accordance with the CDU’s mission statement.

**Student Ambassador Leadership Program**
CDU Student Ambassadors are an enthusiastic group of student leaders from diverse backgrounds that are dedicated to providing excellent service to the University through on and off-campus initiatives. They serve as a resource for current students as well as for prospective undergraduate and graduate students. Student Ambassadors benefit from opportunities for leadership development, personal growth, networking and resume building.

CDU Student Ambassadors must be currently enrolled part-time or full-time students in good academic standing. All Student Ambassadors must complete an interest form; attend extensive training about the University and pass the training quiz with 90% or higher. Upon completion of the required training and quiz, Student Ambassadors must be enrolled and remain in good academic standing to remain active members.

**Student Alumni Network**
The CDU Student Alumni Network (CDU-SAN) is designed to enhance a student’s educational experience and provide them with opportunities for personal growth. As a member of the CDU-SAN, students have the opportunity to interact with alumni, connect in one-on-one mentoring relationships, participate in and attend special events thus enhancing their student life. The CDU-SAN is their first step in a lifelong relationship with CDU. It is also an opportunity to provide them with a first glimpse of the benefits that the CDU Alumni Association offers.

**Student Leadership Council**
The Student Leadership Council (SLC) is comprised of the student leaders across all three colleges including: the Student Representative—Board of Trustees, and Presidents from all CDU chartered organizations.

Each month, these student leaders meet to communicate with one another key issues affecting students in hopes of finding solutions to student concerns. In addition, the students collaborate in generating campus interests related to CDU such as Unity Day and the annual “Spring into Health” Fair. SLC is a campus organization founded to improve the communication between three colleges and administration.

**Yoga Health and Fitness**
Our purpose of the Yoga Health and Fitness organization is to promote the importance of fitness, health and wellness. Our club offers current CDU students the opportunity to learn and practice physical activities, such as Yoga, Pilates and Aerobics.

**ZIMA**
ZIMA is a community volunteer student organization. ZIMA means whole, complete and healthy in Swahili. The organization aims to extend the mission of the University by being the bridge between CDU students and the surrounding Los Angeles community through engagement in activities that support the promotion of health for underserved communities.
Tuition and Fees
Tuition and Fees will vary with the particular College, curriculum, and courses in which a student enrolls.

Students can expect to pay the following tuition and fees established by the institution*:

**Tuition** (Per Unit)

<table>
<thead>
<tr>
<th>Undergraduate Programs</th>
<th>(Per Unit)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Associate Degree Programs</td>
<td>$426</td>
</tr>
<tr>
<td>Bachelor Degree Programs</td>
<td>$535</td>
</tr>
<tr>
<td>Post-Baccalaureate Certificate(Undergraduate)</td>
<td>$535</td>
</tr>
</tbody>
</table>

**Graduate Programs**

- $855
- Post-Baccalaureate Certificate (graduate course)…$855

**University Fees**

**Application Fees**
- Undergraduate and Post-Baccalaureate Programs...$35
- Graduate Urban Public Health Program...........$75
- Graduate Nursing Program.........................$100
- Non-Matriculated Enrollment........................$50
- Readmission.............................................$50

**Registration Fees**
- One-time Student Activities Fee...................$100
- Late Registration Fee (per occurrence)...........$50
- Installment Financing Fee.........................$150
- Course Audit Fee (per class)........................$35
- Student ID Card Replacement Fee...................$10
- Petition to Challenge Nursing Prerequisite........$180
- Challenge Exam Fee.......................................$35

- Student Health Insurance..............................See Below
- Official Transcripts.................................See Official Transcripts

**Program–Specific Fees**

**College of Science & Health**
- Laboratory Fee (per lab class).....................$200

**Radiologic Technology**
- Annual Clinical Fee.....................................$1,000
- Equipment & Supplies Fee (one-time)...............$300

**Mervyn M. Dymally School of Nursing - Professional Education Fee** (per semester)**
- MSN - Entry Level Track...............................$2,700
- MSN – Family Nurse Practitioner Track.............$2,600

*All Tuition and Fees are subject to change.

** The Mervyn M. Dymally School of Nursing
administration has studied professional fees for nursing schools – including the nature of supplies and services needed, the overall level of professional fees and what other institutions charge – and has determined a single fee per semester. The fee enables the School of Nursing to provide applicable uniforms, equipment, and third-party services, including professional liability insurance; maintain a state-of-the-art simulation center, including software enhancements; and ensure that students receive a thorough and positive clinical site experience.

Student Health Insurance Fee
In keeping with the University’s mission to eliminate health care disparities by providing access to and delivery of healthcare services, Charles R. Drew University requires that all full-time students maintain adequate personal health insurance coverage during their entire educational career at the University. Optional coverage for part-time enrollees and for student spouses and families is also available.

Students who maintain adequate healthcare insurance through other sources may apply for a waiver of CDU’s Student Health Insurance from the University’s insurance provider.

Payment and Financial Aid
Students are solely responsible for payment of University Tuition and Fees by the due dates described above and are encouraged to make arrangements for Financial Aid loans and awards early in order to ensure those payments are available prior to the due dates. Students experiencing delays in Financial Aid awards must pay out of pocket or (if eligible) apply to the Installment Payment Plan prior to the close of the Add/Drop period.

Should subsequent Financial Aid awards exceed the current balance on a student’s account, the University will promptly refund the excess in accordance with the requirements of the award source.

The University’s Office of Financial Aid and Scholarships recommends application and documentation be submitted 60 days prior to the start of instruction.

For calculation purposes only, the University will apply certain estimated financial aid to student accounts in advance of actual receipt of those funds. Students remain responsible for these payments should the actual aid be cancelled or received in an amount less than expected.

Federal Direct Subsidized and Unsubsidized Loans
Anticipated Loan amounts will be applied to student accounts for calculation prior to the first day of instruction, provided all applications and supporting documentation have been received and reviewed by the Office of Financial Aid and Scholarships.

Federal Grad Plus and Parent Plus Loans
Anticipated Loan amounts will be applied to student accounts for calculation prior to the first day of instruction, provided confirmation of the award has been received by the funding agency and the student has signed the Master Promissory Note.

Other Financial Aid Programs
Actual loan or award amounts will be applied when funds are disbursed to student accounts.
Payment of Tuition and Fees

Charles R. Drew University currently accepts the following forms of payment directly from students:

- Cash
- Checks (with appropriate identification)
- Cashiers’ Checks
- Credit Cards (Visa, MasterCard, American Express)
- Financial Aid Awards
- Bank Wire Transfers can be accepted in some cases. (Please contact the Finance Office for assistance at (323) 563-5820.)

Refund Policy and Procedure

Courses Dropped on | Expected Refund:
--- | ---
Week 1 — Week 2 | 100 percent refund
Week 3 — Week 7 | Based on days attended
After the 7th week | No refund

Refunds and Repayment: Students who drop below half-time enrollment may be expected to repay a portion of their financial aid. According to a formula prescribed by state and federal regulations, any refundable amount used to pay tuition and fees is returned to the appropriate financial aid sources. Students also may be required to pay the unjustified portion of assistance that was directly disbursed to them.

Students who completely withdraw from the University must give written notification to the Registrar, Program Advisor and Office of Financial Aid and Scholarships, and must complete all withdrawal procedures to be eligible for any refunds.

A refund, if applicable, will be calculated based upon the Federal refund methodology also known as the Return to Title IV (R2T4). Financial aid refunds are calculated on a per diem basis (days attended at time of withdrawal) for withdrawals up through the 60% point in time for each semester. After 60% of the semester has elapsed, there is no refund calculation for federal aid programs. Non-refundable fees are excluded from the refund calculation. Calculated refunds are returned to the appropriate aid programs. Students should contact the Office of Financial Aid and Scholarships to discuss the impact of withdrawing from courses on their financial aid eligibility.

If a student has been awarded financial aid, the financial aid programs from which the funds are disbursed will be refunded in accordance with federal regulations.

Refunds will be mailed to the student’s permanent home address as soon as the required withdrawal forms have been processed. It is the student’s responsibility to ensure that the University has a current address on file for them at all times.

The refund amount is apportioned back to the individual financial aid programs in a priority sequence, paying back all that was disbursed from one program before paying back the next program.

Tuition Installment Plan

Students with a current term balance of greater than $500 and in good financial standing may request to pay the current term’s Tuition and Fees over the course of that term by applying to the University’s Tuition Installment Plan. Under this plan, students may divide the current term’s financial obligation over three predetermined payments. Students carrying any past due balance are ineligible to participate in this program.

Students participating in the University’s Tuition Installment Plan will be assessed an Installment Financing Fee of $150 for each term of participation. The Installment Fee plus the first payment (1/3 of student’s account balance) are due upon application to the installment program. There is no interest charge for this program provided all payments are made as scheduled.

The Tuition Installment Plan may be used concurrently with external Financial Aid programs, provided all Plan requirements are met. Incoming Financial Aid funds must be used to retire the installment agreement prior to disbursing payment to the student.

Applications to the CDU Tuition Installment Plan must be received in the Finance Office prior to the Add/Drop deadline to avoid removal from class rosters. Please contact the Student Finance Office for application and full details.
University Services

Campus Alert System (Everbridge)
Charles R. Drew University’s alert system enables emergency response team members to communicate with students, staff and faculty in minutes by sending a message via a number of contact methods—including email, text messaging and cell phones. Everbridge Aware for Campus Alerts will only be used during emergencies and for system testing. This is a free service to members of the Charles R. Drew University’s community. Standard rates apply for cell phone and SMS messages. To receive emergency alerts from the University’s Everbridge Aware for Campus Alerts system, students are required to sign up by following these instructions:

1. Access any internet browser on any computer.
2. Go to https://www.everbridge.net
3. Enter your authorization code
4. Follow the simple instructions to enter your contact information

Campus Safety
Safety for faculty, staff and students is provided by the University’s Office of Campus Safety. For additional information, students are encouraged to contact the Office of Campus Safety, located in the lobby of the Cobb Building or by dialing 323-563-4918. After hours and on weekends, dial 323-326-4859.

Crime Statistics – Clery Report
Under the Federal “Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act,” the Charles R. Drew University Campus Safety Unit must distribute statistics annually on the reported occurrences of the following offenses:

- Murder
- Sex Offenses
- Non – Forcible (incest and statutory rape)
- Aggravated Assault
- Burglary
- Motor Vehicle Theft
- Arson
- Hate Crimes, including larceny, theft, simple assault, intimidation and destruction of property (where there is evidence of victim selection base on actual or perceived race, gender, sexual orientation, ethnicity or disability)
- Arrests or persons referred for campus disciplinary action for liquor violations, drug abuse violations and weapon possession

*Larceny is a non-Clery statistic, therefore it must be listed in a table separate from other Clery crimes.

**Evening Shuttle Service**
Shuttle service is available from the security booth located at the CDU Parking Lot on 118th Street to the Rosa Parks Transit Station (Metro Blue and Green lines). For current shuttle schedule, see Campus Safety and Security.

**Lost and Found**
The University’s Lost and Found is located at the Information Booth in the lobby of the Cobb Building. Found items may be turned in to the on-duty safety and security officer for safekeeping.

Officers will return lost articles to those who can describe the article and are willing to sign a receipt. Items will be held for a minimum of 90 days.

**Parking**
Conveniently located parking lot and parking structure adjacent to the campus on 118th Street provides parking for students and visitors.

**Student Health**
Students are responsible for their own routine health maintenance and chronic health care. For medical emergencies, service is available at the MLK-Multi-Service Ambulatory Care Center (MACC):

12021 Wilmington Ave.
Los Angeles, CA 90059
(310) 668-4321

**Student Health Insurance**
Charles R. Drew University of Medicine and Science requires all full-time undergraduate, graduate and post-baccalaureate students to maintain adequate health insurance that covers them every day of their higher education career at CDU. Adequate health insurance coverage for students is important, and CDU’s health insurance plans offer a quality alternative to more expensive, traditional comprehensive plans. The primary purpose for providing a student health insurance plan is to help students stay on track for completing their academic program and realizing professional career goals. Without health insurance, one accident or serious illness could jeopardize academic plans.

All full-time undergraduate, graduate and post-baccalaureate students attending Charles R. Drew University must enroll in, or waive, the health insurance coverage offered by the University. Students who wish to waive the University’s health plan must confirm by established deadline dates that their existing coverage is at least equal to the health plan offered by the University. Students who do not provide the necessary proof to waive the insurance by the established deadlines will be automatically enrolled in the University’s health plan. See Tuition and Fees section of this Catalog for program costs.

**Student ID Badges**
Photo identification badges are issued to enrolled students by Student Enrollment Services during Discover CDU new student orientation. Students must wear the University ID badges while on campus. In clinical settings, students should refer to the specific requirements of their academic program. Duplicate identification badges will be provided to students for a $10.00 replacement fee.

**Transportation**
The Los Angeles Metropolitan Transit Authority (MTA) has routes throughout the entire Los Angeles metropolitan area during the day and evening. Registered students showing proof of enrollment can obtain student bus and Metrolink passes at a discount rate.
Library and Learning Resource Centers

Health Sciences Library

The Health Sciences Library, located on the first floor of the W. Montague Cobb Medical Education Building, is a 6,600 sq.ft. information and study center. The library maintains a comprehensive specialized collection of materials in the health sciences, including print and electronic journals, print and electronic books, non-print media and electronic databases for University students, faculty, staff and community patrons.

The library is the primary information resource for the University and supports students, faculty and staff by providing materials, access to resources, instruction in the use of these resources and an environment that fosters teaching, research and life-long learning.

Mission Statement

Our mission is to provide exemplary health information resources and services that are essential for the provision of quality educational, research and clinical services for students, faculty, staff, the community and its affiliates. Further, the library is charged with the constant re-evaluation of its holdings and services to ensure that it meets the mission of the University.

The Collection

The scope of the library’s collection supports the educational programs in the College of Medicine, the College of Science and Health and the School of Nursing. The CDU Health Sciences Library collection contains over 7,000 print and access to over 100,000 electronic books, and more than 42,000 volumes of bound journals. The library currently subscribes to over 10,000 electronic journals, 38 health sciences resources and access to over 2,000 audiovisual resources.

Services

Reference Services: Librarians are available to assist patrons Monday-Friday from 8:00 a.m. – 6:00 p.m.

Information Literacy Classes: The librarians are available to consult with instructors and provide in-class training sessions on how to use specific health information resources. Contact the Library Director at 323-563-9340 for more information.

Literature Searches: The librarians will consult with patrons on how to locate needed information from the health sciences literature. Librarians can also assist with citation verifications for manuscripts.

Educational Programming: The library is involved in a number of University educational events including: CDU Author’s Tea, Black History month, Cesar Chavez day and Cinco de Mayo. In addition, the library hosts a number of traveling exhibits, which are created by the National Library of Medicine.

The Library’s Web Pages: The library’s Web pages host a number of health information resources, including PubMed, CINAHL, DynaMed, STAT!!Ref, Clinical Key, Access Medicine, PsycINFO, SPSS, Endnote and ExamMaster. In addition, each educational program has a subject specialized section on the library’s web page. The website also provides access to the electronic health sciences journals, electronic books, clinical decision support tools, including Evidence Based Medicine resources and bibliographic software. The electronic resources on the library’s website are available on the University campus by using wireless connections and also available off campus by using remote access. The library website is located at http://library.cdrew.edu.

Remote Access (Off campus): Library users can access the library’s resources off campus by placing the CDU username and password in the Login box located at the top of the library’s web page. The Library website is http://library.cdrewu.edu. For more information, please contact the Health Sciences Library at (323) 563-4869.

Interlibrary Loan: The library can obtain books and copies of articles from other libraries as needed for registered users. A request form is available online or at the circulation desk. Users are encouraged to check the library’s online catalog prior to submitting a request.

Library Computers: Seventeen computers are available featuring the Microsoft Office software, Endnote citation management software, statistical software and access to the library’s electronic resources.

Photocopy and Printing: Printing and photocopying are
available in the library using the Print Management System. The cost for black and white photocopying and printing is $0.15 cents per page. Students may also photocopy in color; the cost for color photocopies is $0.50 cents per page. Print cards may be purchased from a venda-card machine using dollar bills only and the initial cost for the card is $1.00.

Audio/Visual Collections: The library has access to the Films on Demand collection of videos in the health sciences. In addition, the library has an extensive collection of physical audiovisual materials. For more information please contact the Health Sciences Library at 323-563-4869.

Presentation Equipment: Laptops are available for same day use; contact the library for more information. Additional audiovisual equipment is available for use by registered borrowers, including digital and video cameras, and LCD projectors. Please contact the library to reserve the equipment in advance by calling (323) 563-4869.

Quiet Study Room: The library has a quiet study room for student use. It contains 9 individual study areas with wireless connectivity and is open from 8:00 a.m. – 8:45 p.m., Monday-Friday. Please contact Campus Safety for weekend hours, (323) 326-4859.

Wireless Access (WiFi): The library is equipped with wireless access for students, faculty, staff and guests. Instructions on how to connect to the wireless network are available at the library’s Information Kiosk.

Group Study Rooms: The library houses 2 group study rooms that can be reserved at the circulation desk. Study cubicles are also available throughout the Library for student use.

Patrons
The library extends borrowing privileges to the students in the College of Medicine, the College of Science and Health, the School of Nursing, faculty, administration and staff of Charles R. Drew University. In addition, it is a Resource Library for healthcare providers in the community, high school and college students, and community residents who need access to health information.

Honor System
All books and journals checked out from the library are given a due date. Patrons are subject to a three-week suspension if library materials are overdue.

Circulation

Library patrons may borrow books (limit: 4) for 21 days, bound journals (limit: 4) for 14 days, videos (limit: 2) for 7 days and audio materials (limit: 4) for 7 days.

Renewals
For each item checked out from the library, patrons are permitted one renewal, either in person or by telephone on or before the due date. To renew materials by telephone, please call (323) 563-4869.

Hours
Monday- Thursday..........................8:00 a.m. – 9:00 p.m.
Friday........................................8:00 a.m. – 6:00 p.m.
Saturday.................................9:00 a.m. – 4:45 p.m.
Sunday.....................................10:00 a.m. –3:00 p.m.
Extended hours during Final Exam weeks will be posted.

University Learning Resource Center
The Charles R. Drew University Learning Resource Center (LRC) is the focal point for the University's educational technology programs. The LRC facilities include a computer lab, educational technology classrooms and a variety of classroom and meeting spaces. The LRC is equipped with computer and media hardware, and a variety of software for education, research and scholarly publication. Blackboard 9.1 is the Learning Management System that is used at CDU and it is administered through the Library; the Student Education Service Center (SESC) Manager is the Blackboard Administrator.

Learning Resource Centers
There are three Learning Resource Centers (LRC) at CDU. The LRCs are located in the Keck, Life Science Research and Nursing Education (LSRNE) and Cobb buildings. These sites are used for instruction, online examinations, independent study and workshops.

The LRC staff provides assistance with password resets, audiovisual setups, educational technology assistance, Blackboard assistance, software installation and poster printing. In addition, training on the use of health information resources is available to all students, faculty and staff. Please call the circulation desk (323-563-4869) to schedule an orientation or information literacy session.

The Cobb building LRC facilities include:

- 38 computers
- Computer Laboratory (Cobb 183): State of the Art computer lab that includes video conferencing equipment, SmartBoards, SmartTVs and lecture equipment. A general computer lab with 16 workstations, laptop connections, a laser printer and SmartBoard
LCD projection system.

- Educational Technology Classroom (Cobb 185): A computer classroom with 22 computer workstations, SmartBoard, SmartTV, video conferencing equipment classroom control software.
- Cobb 187 is a Small Group Study Room that is shared space. Please contact the Library for more information, 323-563-4869.

The LRC computers have a variety of medical education software, including basic science tutorials, case-based learning, patient simulation, exam preparation, statistical software and bibliographic citation software. For further information, call (323) 563-4869.

Student Education and Services Center
Learning resources in the College of Science and Health are located in the Student Education and Services Center (SESC) in the Keck building. The SESC offers help to any student or staff member who desires to improve and build his/her academic skills.

The SESC offers:

- Computer-assisted instruction in mathematics, writing, reading and other curriculum supported subjects;
- Tutoring in most subjects for both individuals and small groups;
- Academic skills building workshops scheduled throughout the academic year;
- Instructional materials that are available for use in the center and select resources from home;
- Wireless access and Web-based learning programs.

Computer Assisted Instruction (CAI)
The SESC utilizes Plato, a program that helps students improve proficiency in mathematics, reading, English grammar and in a number of other general education subject areas. Plato provides a series of lessons that specifically address individual needs. Students may be referred by instructors, or they may use the Plato Program diagnostic tools to determine which of their skills require work. Also, the Library and LRCs provide access to LearningExpress Library, an online resource that can be used to build educational and career skills.

Additional supplemental instruction programs are available to accompany courses that are taught in the College of Science and Health. Students enrolled in the Medical Spanish classes use audiotapes and videos on a regular basis to accompany their classroom assignments. The SESC also has a variety of media in various subject areas, including study skills techniques, available for student use. College of Science and Health faculty members also place materials on reserve for students in specific classes.

Study Skills Workshops
Study Skills Workshops are available for students, faculty, and staff and are scheduled throughout each semester. Goal Setting and Time Management, Memory and Concentration, Note-Taking Systems and Test-Taking Techniques have been the subjects of recent workshops.

Tutoring
Tutoring services are available. Contact your academic advisor for more information.

One-on-one tutoring is available when the need has been determined by the faculty and/or student of the respective program. The Student Education and Services Center consists of:

- 25 workstations in the learning center, state of the art SmartBoards, SmartTV’s, videoconferencing and lecture capture equipment is available for classroom instruction, testing, workshops and individual use
- A small collection of reserve books and media
- 8 computers located in the Testing/Career Center
- 3 group study rooms with computer access
- Computer software programs that accommodate varying study needs
- Photocopying and printing is available, the cost for this service is $.0.15 per page.
- The SESC also houses the Charles R. Drew Student Government (CDSG) Office.

The Student Education and Services Center hours are:
Monday – Friday....................8:00 a.m. to 5:00 p.m.
Saturday and Sunday........................Closed

SESC staff can be contacted by visiting the center or by calling (323) 563-5934 during office hours.
A Message from the Executive Vice President for Research and Health Affairs

Dear CDU Faculty, Staff, Students and Community,

As the Interim EVP for Research and Health Affairs, I warmly welcome you all. Over many years of significant effort from talented faculty, dedicated staff, aspiring students and incredible community champions, CDU’s research enterprise has grown to address several areas of health disparities through a multi-pronged translational research approach.

In our short history, our research teams have made a difference in our community in areas ranging from Cancer Health Disparities research, HIV/AIDS research, and Cardiometabolic research to name a few. In addition, CDU has trained and will continue to train highly competitive and award winning students and trainees; including undergraduate, graduate, medical students, as well as fellows and junior faculty in performing multi-faceted translational research on health disparities. The efforts of our research have garnered numerous national and international recognition, awards and competitive grant funding from National Institutes of Health (NIH), the Department of Defense (DOD) and other national sources.

I invite you to spend some time learning about our research accomplishments, training and research opportunities, and on-going research activities. Our overarching goal is to create programs aimed at understanding behavioral, ethnic, cultural and scientific reasons that contribute to health disparities and how it impacts our underrepresented and underprivileged populations. I am very proud of our numerous accomplishments and look forward to future success in addressing the needs of our community. I warmly welcome you all and strongly encourage you to become engaged in one of our research centers, and join the CDU team in our mission to eliminate health disparities.

Sincerely,

Jay Vadgama, PhD
Vice President for Research and Health Affairs
Charles R. Drew University of Medicine and Science
University Research
Charles R. Drew University of Medicine and Science performs high quality research that focuses on key health disparities issues. The University has had tremendous growth in research with an increase in its annual research funding. Charles R. Drew University now ranks in the top 50 Private Research Universities as rated by the Center for Measuring University Performance. NSF analysis reported US scientific publishing was flat from 1992-2001 despite increased research funding. The #1 institution in the country in publication growth over this period among the top 200 institutions by level of NIH funding was Charles R. Drew University with a 127% increase (the U.S. average is <1%). Since 2011, the top American research universities, are defined as those with at least $40 million in annual federal research expenditures, and these tend to sustain high levels of performance and maintain their relative position within the marketplace over time (The Top American Research Universities, 2011). CDU has earned the honor of being in this group. Furthermore, among the the group of HBCU’s and minority institutions across the US, CDU is the leading minority serving institution with the most federal funding. CDU is the only HBCU/Minority serving institution listed under top universities with over $40M in federal funding. In 2009, CDU ranked 146 among all universities with federal funds over $40 million per year. Currently CDU boasts over $57 Million in federal funding. The current endowment assets from research is over $70M.

Among all institutions with over $40M in Federal Research, CDU showed a 30.8% increase in constant dollars from 2000 to 2009. In this regard, CDU has performed better than many larger institutions including several top rated private and public institutions.

The Charles R. Drew University Research Enterprise is dedicated to closing the gap on health care disparities among underserved and ethnic minority populations and so much more. The important work done by our researchers brings attention to health issues and diseases that disproportionately affect minorities and the poor. Diabetes, hypertension, cancer, reproductive health, chronic kidney disease, neuropsychiatric disorders and HIV/AIDS are just a few of the areas where Charles R. Drew University researchers, faculty and staff members make a difference. Our nationally and internationally renowned researchers are breaking new ground, integrating research advances into the basic sciences and setting new standards in healthcare disparities research for underserved communities.

Research Centers and the Life Sciences Institute
The various research centers play an important role in the growth and development of medical research with a focus on health disparities at Charles R. Drew University. These center grants funded for research, education and training, treatment and community partnerships in Cancer, Cardio-Metabolic, HIV/AIDS and provide excellent opportunities for all of our students to engage in state-of-the art research studies and thereby enrich their career growth while at CDU. The Life Sciences Institute (LSI) formally known as MSI (Medical Sciences Institute) was established in 2005, it now boasts an endowment of over $70 million and continues to serve as a major resource for recruitment and retention of outstanding research faculty while sustaining research infrastructure. In partnerships with research centers, the LSI provides new pathways to research discoveries at Charles R. Drew University through creating innovative research teams and re-engineering the clinical research enterprise in a highly structured system. Doing so improves opportunities for the recruitment and retention of junior and senior researchers who pursue NIH funding for desperately needed research that has the greatest potential for reducing health disparities throughout the world.

Research Partnerships
University of California, Los Angeles (UCLA) – Since its inception, the University has conducted numerous collaborative research projects with UCLA.

• NCI – funded CDU-UCLA Cancer Center Partnership to Eliminate Cancer Health Disparities in Minority and Underserved Populations. Our mission is to design and conduct basic, clinical, applied, translational and prevention research programs directed toward reducing cancer incidence, morbidity and mortality in the underserved communities, which face cancer health disparities in Service Planning Area (SPA) 6 region of Los Angeles.

• The Center to Eliminate Cancer Health Disparities was established through the Division of Cancer Research and Training in 2009 through a grant from the National Institute of Health. Numerous research projects are currently being conducted by the Center’s faculty and staff, including basic laboratory research, community outreach and engagement and clinical trials activities.

• RAND – Both RAND and UCLA are strong research partners with the University. The depth and breadth of these collaborations have accelerated during the last 10 years, with most activities focused on health disparities work. Additionally, these collaborations have created an environment where senior scientists have committed to supporting the development of junior faculty at Charles R. Drew University.

• RCMI-funded Institutions – The RCMI Translational Research Network (RTRN), led by Charles R. Drew University, represents a groundbreaking effort to integrate clinical, biomedical and behavioral researchers with providers and community leaders into novel geographic and ethnically diverse research partnerships.

• Community Ties and Partnerships – The University has a number of strong partnerships and collaborations with community organizations and successfully engages surrounding communities in participatory-driven research. This work includes over 100 ongoing partnerships including programs to communicate research-based information to increase public awareness of health issues; efforts to improve the transfer of evidence-based knowledge to community-based healthcare providers; supporting, enhancing and actively engaging in ongoing and new community-based participatory research efforts, with a range of partners, including the South Central Family Health Center, the Nickerson Gardens Housing Project and the Oasis HIV Clinic, among others. Several of the Research Centers, including the CDU/UCLA Cancer Center Partnership, AXIS and CTSI have dedicated Cores/Units for community partnered research and activities.

College of Science and Health

History
The first allied health programs at Charles R. Drew University preceded the establishment of the current College of Science and Health with the implementation of MEDEX physician assistant and radiologic technology programs in cooperation with UCLA and Harbor General Hospital. Creation of a College of Science and Health (then the College of Allied Health) was first proposed in 1975 when a number of allied health programs were being developed in response to expanded clinical needs of the surrounding urban population. In 1983, Charles R. Drew University’s Board of Directors consolidated existing programs and authorized creation of the College of Science and Health.

In 1987, the State of California’s Office of Private and Post-Secondary Vocational Education granted Charles R. Drew University’s College of Science and Health a license to offer a Bachelor of Science for primary care physician assistants and an Associate of Science degree in medical record technology. Since 1988, a wide range of programs have been added and that year Charles R. Drew University conferred the first Bachelor’s degree for the physician assistants. Charles R. Drew University conferred the first bachelor’s degree for the physician assistants. In 2011 Charles R. Drew University completed the teach-out phase of the bachelor’s degree physician assistant program. In 2014 Charles R. Drew University started the process of developing a Master of Health Science in Physician Assistant Studies program. The Charles R. Drew Physician Assistant (PA) Program has applied for Accreditation-Provisional from the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA). The PA program anticipates matriculating its inaugural class in August 2016, pending achieving Accreditation-Provisional status at the March 2016 ARC-PA meeting. Accreditation-Provisional is an accreditation status for a new PA program that, at the time of its initial accreditation review, demonstrated its preparedness to initiate a program in accordance with the accreditation Standards. In the event the program is not granted provisional accreditation, a full refund of the program seat deposit will be issued to applicants offered admission for August 2016. The CASPA application fee is non-refundable.

In April 2005, the College was renamed the College of Science and Health to reflect these and future additions.

Director, Physician Assistant Program
A Message from the Dean

Dear CDU Family,

As we embark on another academic year, we hold dear our mission of engaging in education and research to prepare students to transform health in underserved communities.

It is in the spirit of collaboration, across diverse disciplines and academic backgrounds, that the College of Science and Health faculty and staff prepare our graduates to address the health and healthcare challenges of the 21st Century. We embrace the opportunity to contribute to the improvement of health in this and other similarly underserved communities through our current programs and course offerings in Urban Public Health, Life Sciences, Radiologic Technology and General Studies. Our commitment to health disparities research fosters an environment of scientific inquiry and scholarship necessary for students to excel in their chosen discipline. Service enriches the academic experience for our students, better preparing them to become the next generation of healthcare professionals, scientists and faculty. In these capacities, our graduates contribute to improving health with compassion and excellence, and thereby, perpetuate the legacy of our namesake, Dr. Charles Richard Drew.

Sincerely,

Ronald A. Edelstein, Ed.D
Interim Dean
College of Science and Health
College of Science and Health

The College of Science and Health at Charles R. Drew University of Medicine and Science offers undergraduate degree programs leading to an associate or baccalaureate degree. A Master of Public Health (MPH) degree with emphasis in Urban Public Health is also offered. Additional Health Profession programs include: Master of Health Science in Physician Assistant Studies (now in the planning stages), Bachelor of Science in Life Sciences, Associate of Science in Radiologic Technology, Post Baccalaureate Certificate in Pre-Medicine and Graduate Certificate in Public Health Concepts.

The College of Science and Health provides students a solid science and liberal arts background, which enables graduates to bring a rich and informed sense of public responsibility to their careers as health care professionals or biomedical scientists. The educational experience is intended to produce first-rate clinicians, public health professionals, managers and scientists who will commit to life-long learning.

In keeping with the Charles R. Drew University’s mission, the goal of the College of Science and Health is to foster a dynamic educational climate that provides students with relevant educational experiences leading to both personal and professional growth. This environment is designed to enable students to attain their academic and professional goals, become competitive in the job market, and to become leaders in transforming the health of their communities.

Each of the College’s undergraduate degree programs consists of a general education component, elective courses and specified courses in the program. The general education component provides a base of knowledge in the fields of communication, humanities and arts, natural and social sciences, and citizenship responsibilities. Elective courses provide opportunities for students to gain additional exposure to a variety of fields.

The College of Science and Health aims to be recognized not only as a leader in the educational preparation of health professionals and scientists, but also as a catalyst for public policy reforms in the healthcare system. Toward this end, the academic curricula of the College emphasize clinical and preventive medicine, competency-based education and community-based practice. Its clinical programs are designed to graduate excellent and compassionate urban specialists who provide primary healthcare services to culturally-diverse, medically-underserved populations.

The College of Science and Health is committed to educating students who have grown up in medically underserved communities.

Academic Community

Students

Charles R. Drew University of Medicine and Science current student population reflects the shifts that have taken place in the community at large over the years. The University includes students from various areas of California, the United States and nations around the world. These students represent various ethnic groups and speak many different languages. The University unequivocally supports equal access for students of all backgrounds.

Many are first generation college students and come from underprivileged communities. Because of their commitment to the University’s mission, most of the University’s graduates return to those communities to serve and to work.

Faculty

The Charles R. Drew University faculty are diligent in their commitment to providing quality education to their students and adjusting their teaching methods to accommodate diverse learning styles as well as the learning styles of the millennial learner. The College strives to recruit and retain faculty who appreciate the value and benefits of our student body’s diversity. Faculty and students will be able to take advantage of the latest in technology to deliver a dynamic curriculum in an environment that encourages critical thinking, self-reflection, and continuous analysis.

Community Service and Service Learning

The College's community service and service learning requirement is to provide students with an opportunity to apply the theories and competencies learned in their core and program courses to the real needs of the community, through service and service learning activities.

To facilitate achievement of these community service goals, learning experiences must be conducted in a setting or with a population that meets at least one of the following criteria: 1) low income; 2) medically disadvantaged, underserved or under-represented; or 3) other special populations or communities as defined by course requirements (e.g., hospice patients, victims of domestic violence, students with special learning needs, etc.). College programs ensure that proposed community service assignments are consistent with Charles R. Drew University’s mission. Therefore, all students are to provide verification of the approved
community service and service learning activity to the Service Learning Coordinator.

Students enrolled in the College of Science and Health are required to complete a minimum number of community service hours. Prior to graduating, students in certificate programs must complete at least 25 hours of service; associate degree students must complete at least 50 hours of service; and bachelor degree students must complete 100 hours of service. The College and programs retain the authority to establish requirements for completion of the community service and service-learning component of the curriculum.

Community service and service learning hours are fulfilled when the fieldwork component and the appropriate coursework that accompany this area of study are completed.

**Student Awards**

The College of Science and Health (COSH) has established the following standards for recognizing the achievement of its students with honors and awards. At the end of each fall, spring and summer semester, the Office of Registration and Records recognizes matriculated students in excellent academic standing.

- **Dean's List:** Undergraduate degree seeking students enrolled in 12 or more credit units in a semester, or graduate students enrolled in 9 or more credit units in a semester with a grade point average of 3.50 or better in completed coursework are cited on the Dean’s List.

- **Honor Roll:** Undergraduate degree seeking students enrolled in 12 or more credit units in a semester, or graduate students enrolled in 9 or more credit units in a semester with a grade point average between 3.00 and 3.49 and no grade lower than a C are eligible for the University Honor Roll. The student’s 12 units may include a grade of Credit.

- **Graduation with Honors:** The College of Science and Health recognizes academic accomplishments by awarding graduating degree seeking students honors according to their cumulative grade point average. A designation of Cum Laude (with honors) indicates a cumulative GPA of at least 3.25. A designation of Magna Cum Laude (with high honors) indicates a cumulative GPA of at least 3.5. A designation Summa Cum Laude (with highest honors) indicates a cumulative GPA of at least 3.75.

The following are COSH student awards presented during Oaths and Honors:

- **Dr. Charles W. Buggs Award:** The College of Science and Health’s highest award, named after the prominent microbiologist and first dean of the College of Science and Health at Charles R. Drew University, is presented to the graduate who has maintained the highest GPA throughout his or her training and has exemplified the personal characteristics of excellence and compassion.

- **Dr. Jack Mitchell Award:** Named after a community physician who was an early advocate of allied health education at Charles R. Drew University, this award is presented to the graduate who has demonstrated leadership among his or her peers in college and university activities and in the provision of health care to community residents.

- **Dr. Raymond Kivel Award:** This award, named for the medical director whose leadership garnered nationwide prominence for the MEDEX Physician Assistant Program, is presented to the graduating senior whose voluntary community service has demonstrated an extraordinary commitment to the delivery of health care in medically-underserved communities.

- **Dr. Mary McLeod Bethune Award:** Named in honor of the outstanding educator whose life and legacy serves as an inspiration to all, this award is presented to the graduating student who has demonstrated the ability to persist in the face of adversity.

**Honor Societies**

The Delta Chapter of the Epsilon Tau Sigma Honor Society of the National Society of Allied Health is located on the campus of Charles R. Drew University. The purposes of the society are:

1. To promote high standards of scholarship, academic achievement and professionalism among allied health students at traditionally and historically Black colleges and universities.

2. To foster service to the masses of people who are ill, underprivileged, ill-housed and impoverished in our communities and abroad through the application of health professions.

3. To strive always to lead lives which exemplify and fulfill the tenets of the legacy of Mary McLeod Bethune.
To become eligible for active membership in the honor society, students must satisfy the following requirements:

1. The student must be an associate, baccalaureate or graduate degree candidate.

2. The student must have been enrolled in an allied health program for at least two consecutive semesters.

3. The student must have an overall cumulative GPA of 3.2 or better.

4. The student must be recommended by his or her Program Director, the Student Academic Performance Committee and the Dean of the College of Science and Health.

5. The student must have shown capacity for leadership or achievement in his/her chosen allied health field.

6. The student must maintain a GPA of at least 3.0 in each semester after induction to the society.

**Delta Epsilon Iota Honor Society**
The Alpha Kappa Delta Chapter of the Delta Epsilon Iota Academic Honor Society was established to promote the ideals of dedication, enthusiasm and initiative at Charles R. Drew University through student leadership, special programs, community service projects and networking opportunities.

Chapter membership is limited to students who are currently enrolled at sophomore status or higher, having earned at least 30 semester hours with a cumulative GPA of 3.3 or higher.

**Delta Omega Honor Society**
The Gamma Phi Chapter of the Delta Omega Society was established to encourage and recognize excellence in practice, research, education and academic achievement in the field of public health.

In order to be eligible for active membership, the student must possess a bachelor degree (or equivalent), complete one full year of academic courses leading to an advanced degree in public health, and intend to pursue a career in public health. No more than 10% of the graduating students can be elected to membership in a given calendar year. Those elected will represent the upper 25% in class standing and who have demonstrated qualities of leadership in public health in addition to academic excellence.

**Note:** Various programs within the College are affiliated with honor societies, which are discipline specific.

**Oath and Honors**
This ceremonial occasion is held every year prior to Commencement for the purpose of recognizing graduation candidates for their academic achievement, clinical excellence, leadership and service while attending Charles R. Drew University.

**Student Life**
The Office of the Dean sponsors and co-sponsors a number of events, activities and services throughout the school year. The purpose of these activities is to provide the students with an opportunity to develop leadership skills, special interests and cultural competency. A typical list of programs for the year might include Student Government Activities, cultural events, Program Awareness Day, Career Day and the Oaths & Honors ceremony.

All student clubs and organizations have oversight through the supporting academic departments or programs. See Student Life in the University section of this Catalog.

**Academic Advising**
Faculty advisors provide academic advice, support and encouragement throughout the duration of the student’s academic program. A faculty member from the student’s designated program serves as the academic advisor throughout the student’s career at the University. Faculty members serve as advisors to provisional students as well. Department of General Studies faculty members advise non-matriculated students.

Academic advising is a service provided to all students who need assistance selecting a program, scheduling classes or seeking tutorial support and guidance in making certain they meet all graduation requirements. Students who utilize academic advisement services usually complete their educational goals in a timely manner and are unlikely to drop out of school.

Students may meet with their academic advisor by scheduled appointment or on a drop-in basis during office hours. Students entering degree programs will be assigned to a faculty advisor within the first week of enrollment. The student and faculty advisor jointly arrange meeting hours. For additional information about faculty advisor arrangements, contact the program of interest.
Student Education and Services Center (SESC)
The Student Education and Services Center is located on
the first floor of the Keck Building. The Center provides
tutoring and other academic support. The Charles R.
Drew Student Government (CDSG), and a fully
equipped computer lab are located in this facility. The
University’s pre-admissions assessment examinations
in reading, writing and mathematics are computer-based
and administered to prospective students at their
convenience. Pre-enrollment advisement and the service
learning program also are administered through the
Center. For additional information, please call (323)
563-5934.

Student Government
Charles R. Drew Student Government (CDSG) is the
official student government organization. CDSG
officers are elected by the current student body and
appointed program representatives. Students participate
in scheduled meetings where they promote unity within
the student body, maintain a forum expressing diverse
views and interests and implement student efforts aimed
at improving student life. The members of CDSG also
sit on various University and College of Science and
Health policy-making committees. All students pay a
one-time student service fee that entitles them to
membership in the CDSG organization. This
membership allows students to participate in all
programs, events and activities that are sponsored or co-
sponsored by CDSG.

Student Government Election
CDSG sponsors a campus-wide student government
election during the Spring semester for the upcoming
school year. All currently enrolled students who are in
good academic standing are eligible to participate in the
CDSG election.

Candidates for an elected office must complete the
required nominating application and meet the eligibility
requirements as stated in the CDSG By-Laws before
candidacy is approved by the Office of the Dean.

CDSG Officers
The CDSG Executive Council consists of nine elected
student leaders: President, Vice-President, Secretary
and Treasurer, as well as five additional members from
the student body and Student Affairs Committee. The
nine-member CDSG Executive Council and each
program’s two student representatives make up the
Legislative Council.

Student Complaints And Grievances
Students who have complaints against other students
should report their complaints to the Program Director,
and if the matter is not resolved at the program level, the
student may then request the Office of Dean to address
their complaint.

Students who have a complaint against a staff member
should report the complaint to the staff member’s
supervisor. If such a report would be uncomfortable for
the student or otherwise inappropriate, the student
should contact the Dean for the College of Science and
Health.

Students who have a complaint against a College policy
or action which is alleged to have violated the students’
rights should first contact the Program Director. If the
student is not satisfied that the matter is resolved at the
Program Director level, the student may then request a
hearing before the Student Academic Performance,
Promotion and Judiciary (SAPPJ) committee. The
request for a grievance hearing should be submitted in
writing to the committee chair within 10 business days
after an initial conference has taken place with the
appropriate Program Director. The student will be
notified by the committee chair in writing of the hearing.
(It usually takes 7 business days after receipt of written
request.) Once a student’s name appears on the
Committee’s agenda and a decision has been rendered,
the student has the right to appeal the decision.

The steps involved in the appeal process are delineated
as follows:

1. The student will have no more than 30 days to
appeal the Committee’s decision. This appeal is
to the Dean of the College of Science and
Health. The Dean may uphold the decision of
the Committee and no further review will be
necessary. If the Dean does not uphold the
Committee’s decision, numbers two (2) and
three (3) below will apply.
2. The Dean may appoint an ad hoc committee to hear the appeal. The members of this committee shall be faculty members who have not been involved in the original decision in question. The chairperson of the SAPPJ committee shall present its findings to the Ad Hoc Appeal Committee but shall not sit as a voting member of said committee. The Ad Hoc Appeal Committee, with the approval of the Dean, may have legal counsel present.

3. The Ad Hoc Committee shall be empowered to call members of the original committee as witnesses and other appropriate members of the faculty, and shall have authority to review records pertaining to the student’s appeal. The Ad Hoc Appeal Committee shall report its decision directly to the Dean of the College of Science and Health, one week after the receipt of the appeal. The Dean will inform the student in writing as to the outcome of the appeal. Students shall have the right to have their academic records treated in a confidential and responsible manner as required by the Family Education Rights and Privacy Act of 1974.

**Degree Requirements**

Each undergraduate program of study leading to a degree includes the College's general education and core curriculum requirements as outlined below. Not all courses may be credited toward fulfillment of the general education and core curriculum requirements. The following restrictions apply to these units:

1. Basic skills courses (developmental level courses, such as pre-algebra and English fundamentals) cannot be applied toward the associate or bachelor degree requirements.
2. No professional course in the student's major program of study may be used to satisfy general education requirements.
3. Courses in which previous credit has been received may not be applied a second time.
4. In some cases, students may satisfy core requirements and general education elective requirements simultaneously, although doubling of credit value is not permitted.

**Associate of Science (A.S.)**

Terms regarding graduation requirements in the Associate of Science program are detailed below:

**Unit Requirement:** Total units required for an A.S. in Radiologic Technology is 84.

**Residence Requirement:** Prior to receiving an A.S., students must have completed at least half of the total units required for degree completion in their program in residence.

**G.P.A. Requirement:** Achievement of a minimum overall G.P.A. of 2.0 on a 4.0 scale.

**General Education Requirement:** Completion of the general education requirements.

**Program Requirement:** Completion of requirements for the major.

**Unrestricted Elective Requirement:** Completion of one lower or upper-division three unit elective course. An unrestricted elective is any course a student wishes to complete for credit toward a degree other than those courses taken that fulfills specific general education, core curriculum and program curriculum requirements. This is a residency requirement and cannot be transferred without prior written consent of the Department Chair or Program Director.

**Bachelor of Science (B.S.)**

Terms regarding graduation requirements in the Bachelor of Science program are detailed below:

**Unit Requirement:** Total units required for a B.S. degree is 120. Students should consult this Catalog for specific degree requirements in the sections concerning general education and the individual programs of the University.

**Residence Requirement:** Prior to receiving a B.S., students must have completed a total of at least 63 units in residence (including at least half of these in the required major).

**G.P.A. Requirement:** Achievement of a minimum overall G.P.A. of 2.0 on a 4.0 scale.

**General Education Requirement:** Completion of the general education requirements.

**Program Requirement:** Completion of requirements for the major.

**Master of Public Health (MPH)**

Terms regarding graduation requirements in the Master of Public Health program are detailed below:

**Unit Requirement:** Total units required for MPH is 42 graduate seminar credit hours.
G.P.A. Requirement: Achievement of a minimum overall G.P.A. of 3.0 on a 4.0 scale.

Program Requirement: Successful completion (i.e., achievement of a grade of 80% or better) of all the required courses for the major.

Residence Requirement: MPH students must complete a total of at least 36 units in residence.

General Education

Department Chair:
Candice Goldstein, PhD CADC-II
Location: W.M. Keck Building
Telephone: (323) 357-3635

General education at Charles R. Drew University is structured to foster an educational climate that provides positive and lifelong educational opportunities for all students entering the University. The General Studies curriculum is designed to provide skills, information,
inquiry methods, and intellectual values, and aims to:

- Introduce students to the richness and diversity of the various academic disciplines;
- Broaden students’ intellectual perspectives as educated members of society; and
- Encourage students to develop commitments to and mutual respect for diverse groups

**General Studies Curriculum**

General Studies courses are approved by the College’s Education and Academic Policy Committee (EAPC) and must satisfy the University’s criteria for general education courses. Consistent with this criteria and the mission of the University, coursework in the general education program is designed to equip students with the fundamental tools for active lifelong learning and full participation in and engagement with their contemporary world. To this end, the intent of the Division of General Studies is to ensure that every student will develop and demonstrate understanding of and/or proficiency in the following areas:

- Written communication skills*
- Oral communication skills *
- Critical thinking*
- Quantitative reasoning *
- Information literacy*
- Scientific knowledge **
- Intellectual perspectives of diverse disciplines **
- Cultural diversity in healthcare **

*WASC 5 Core Competencies
** Breadth Requirements

In realizing the above goals for graduates of the College of Science and Health, the Division of General Studies and College of Science and Health faculty have established program outcomes for the University’s general education curriculum.

**General Studies Program Student Learning Outcomes (PSLO)**

**Area I: Written and Oral Communication, and Critical Thinking**

**Outcomes:**
1. Written Communication
   - PSLO 1. Students can write effectively.
2. Oral Communication
   - PSLO 2. Students can orally communicate effectively.
3. Critical Thinking
   - PSLO 3. Students can think critically to analyze and solve complex problems.

**Area II: Natural & Behavioral Sciences, Mathematics, and Information Literacy**

**Outcomes:**
1. Quantitative Reasoning
   - PSLO 4. Students can use quantitative reasoning to analyze and solve problems.
2. Information Literacy
   - PSLO 5. Students can locate, evaluate and synthesize information.
3. Sciences
   - PSLO 6. Students can recognize and describe scientific concepts and theories.

**Area III: Diversity in Healthcare, Arts & Humanities, Social Sciences and Social/Civic Knowledge**

**Outcomes:**
1. Intellectual Perspectives of Diverse Disciplines
   - PSLO 7. Students can contribute to society through the knowledge and application of diverse disciplines, including civic, historical and creative domains, in a real world setting.
2. Cultural Diversity in Healthcare
   - PSLO 8. Students can describe and compare diverse cultures and societies, within the context of health care.

**General Studies Requirement**

Those students who have tentatively decided on a major or who have declared their major should read the respective program statement to determine any particular general education courses that are required or suggested. Depending on the program of study, students may either take general education courses concurrently with major coursework or complete general education requirements prior to entering the major. Some programs allow a limited number of general education units to also be counted towards a major. Although this does not lessen the total units required for the degree, it allows for those units to be used as electives. Electives are units needed beyond those taken to fulfill general education and major requirements. Students may take any elective courses for which they have the necessary prerequisites. No course may be repeated for elective credit unless stated in the course description.

**Category A: Written and Oral Communication and Critical Thinking**

A1. Written Communication: Courses such as English Composition (ENG 111) and expository writing
focusing on the rhetoric and stylistics of various forms of essays, with emphasis on the development of unified, coherent and clearly composed written discourse.

A2. Oral Communication: Courses such as Public Speaking (COM 111) or interpersonal communication focusing on understanding the process and experience of communication.

A3. Critical Thinking: Courses such as Critical Thinking and Text Analysis (ENG 112), Principles of Argumentation (COM 210) or Logic and Critical Reasoning (PHL 112) emphasize the relationship between logic and language that explore concepts essential to identifying, analyzing and evaluating arguments with attention to deduction, induction and common fallacies.

Category B: Natural Sciences, Mathematics and Information Science

B1. Life Science: Biological science courses such as Introductory Biology (BIO 100) or Introduction to Anatomy and Physiology (BIO 120) and introductory courses in human genetics and physical or biological anthropology with laboratory components that emphasize the observation and description of organisms.

B2. Physical Science: Physical science courses such as Introductory Chemistry (CHM 100) or General Physics I (PHY 250) with laboratory components emphasize analytic, quantitative and qualitative investigation of matter.

B3. Mathematical Concepts and Quantitative Reasoning: Mathematics and quantitative reasoning courses, such as College Algebra (MTH 126), Precalculus (MTH 130) and Calculus I (MTH 230).

B4. Information Literacy and Computer Science: Courses such as:

Information Literacy and Computer Applications (CPU 125) and Information Literacy and Research Methods (ILR 101) provide the foundation and skills in information literacy, research methods and computers via various assignments, problem solving and research, including formulating a research question, locating materials using standardized electronic resources and presentation and spreadsheet applications.

Category C: Arts and Humanities

C1. Fine and Performing Arts: Creative process and artistic activity coursework, such as Health and Creative Arts (ART 131) and other coursework including painting, sculpture, dance, creative writing, theater arts, photography and filmmaking.

C2. Humanities: Courses emphasize the understanding of aesthetic, philosophical and cultural principles, such as Introduction to Humanities (HUM 231) or Cultural Diversity in Contemporary Literature (HUM 233).

C3: Humanities Courses emphasize the understanding of aesthetic, philosophical and cultural principles, such as Medical Humanities I: Philosophy of Health (HUM 330)

Category D: Social and Behavioral Sciences

D1a. Citizenship I: Courses in United States history (HIS 141).

D1b. Citizenship II: Courses in United States political systems (POL 141).

D2. World Societies and International Cultures: These courses consider individual cultures or multicultural experiences in an international context such as cultural anthropology, ethnic studies and cross-cultural communication, such as Cross Cultural Communication in Healthcare (COM 315).

D3. Social and Behavioral Science: These courses emphasize individual and human social behavior, such as courses in General Psychology (PSY 141), Human Development (PSY 351) and Introduction to Sociology (SOC 141)

Category E: Diversity, Service and Community Health:

In Residency Requirement - must be completed within the College of Science and Health

E1 Spanish: Courses in Introductory Spanish (COM 131) and Spanish for the Healthcare Professional (COM 231) that offer vocabulary and practical dialogues needed by people working in healthcare.

E2. Health Seminar and Community Service Learning: These courses involve actual voluntary service learning in underserved communities in an
attempt to create within students a personal commitment to these communities. Community service hours must be completed prior to starting the health seminar. The health seminar portion of this course involves the integration of knowledge and skills to create an awareness, sensitivity and knowledge of the needs of underserved communities, such as Sophomore Health Seminar and Capstone (PHE 255) and Senior Health Seminar and Capstone (PHE 450).

E3. Community Health: Course in Community Health Issues that introduce students to the areas of community health including the medical, legal and social aspects of areas such as substance abuse, communicable diseases, intentional injury and death. Integrates Healthy People 2020 objectives and strategies for promoting health in underserved communities with all course objectives, such as Community Health Issues (PHE 250).

Category F: Interdisciplinary Approaches to Healthcare

F1. Courses emphasize interdisciplinary approaches to understanding how we know the world with special attention to education and health care, emphasizing the human being as an integrated physiological, psychological and social organism, such as Human Development (PSY 351).

Checklist of General Education and Core Requirements for

Associate of Science Degree (30 units)

Category A: Written and Oral Communication in Critical Thinking (6 units required)

Some of the courses in the Program in Life Sciences count towards the G.E. required units, see the corresponding section of the Catalog.

 (*A) Fulfills University GE requirements in Category A
 (*B) Fulfills University GE requirements in Category B
 (*C) Fulfills University GE requirements in Category C
 (*D) Fulfills University GE requirements in Category D
 (*E) Fulfills University GE requirements in Category E
 (UE) Unrestricted Elective

* By permission of the Instructor
**Science majors may complete lab requirement in upper division program science courses in Biology, Chemistry, Anatomy and Physiology or Physics.

General Education Course Descriptions

ANTHROPOLOGY

ATH 142 - Cultural Anthropology

Provides an anthropological perspective of the human species through time and space by focusing on fieldwork studies from a variety of cultures.

Formerly: ANTH 142
Units: 3

ARTS

ART 131 - Health and Creative Arts

Covers creative communication as expressed through poetry, song, drama, and visual media and as related to the influence on people’s perception of themselves and their environment. Explores the extent to which these art forms benefit health and recovery.

Formerly: AH 131
Units: 3

BIOLOGY

BIO 025 - Human Anatomy Review and Medical Physiology

Provides a review of human anatomy from the chemical-cellular level to the formation of complex major organ systems. Provides a comprehensive approach to medical physiology to enhance the student's knowledge of organ system integration. Designed to improve learning skills and developmental review, as well as to prepare students for pathophysiology.

Formerly: AP 025
Units: (None) CR/NC

BIO 100 - Introductory Biology

The course is an introductory survey of modern biological concepts covering the areas of molecular, cellular, and organismic biology, with emphasis on the diversity of life in the underlying framework of evolution. This is a preparatory course for entry into HLS130AL.

Units: 3

BIO 120 - Introduction to Anatomy and Physiology

Covers the origin of human organ systems, homeostasis, the function of major organ systems and selected diseases that affect each system. Equal consideration is given to anatomy and physiology. Covers current issues relevant to designated organ systems to enhance the students’ knowledge of research and basic science contributions.

Formerly: AP 120
Units: 4 (3 lecture units, 1 lab unit)

BIO 124 - General Biology: Principles of Human Biology

Provides a comprehensive study of the human body from the chemical-cellular level to the formation of complex major organ systems.

Units: 4 units (3 lecture units, 1 lab unit)

BIO 320 - Biochemistry

Studies the structure, properties, and metabolism of the
constituents of biological systems (amino acids and proteins, carbohydrates, lipids, nucleic acids, and vitamins), the mechanism of enzyme action, ATP generation, information transfer, and the biochemical basis of disease.

Formerly: BCH 320
Prerequisite(s): BIO 120 or BIO 124
Units: 6 (4 lecture units, 2 lab units)

CHEMISTRY

CHM 100 – Basic Chemistry
Introduction to the fundamental concepts of chemistry, atomic theory, electron configuration, periodicity, bonding, molecular structure, reaction stoichiometry, gas laws, and changes in state in preparation for general and advanced classes in Life Sciences.
Prerequisite(s): H.S. Algebra, passed with a grade of B or better.
Units: 3

CHM 122 - General Chemistry
Considers scientific notation, atomic and molecular structure, the periodic table, ionic and covalent bonds, chemical equations, chemical stoichiometry, mole concepts pH concepts, introduction to organic chemistry, and states of matter, solution, acids, bases, and salts.
Prerequisite(s): MTH 121
Units: 5 (4 lecture units, 1 lab unit)

COLLEGE LEARNING SKILLS

CLS 060 - College Reading and Learning Skills
Designed to teach reading comprehension skills by exploring and organizing information, taking notes to find main ideas and supporting details in textbooks and other reading materials. Study skills include listening, note taking, memory and concentration skills, test taking, and research skills. Progression in the course is through a series of instructor supervised workshops and computer-assisted instructional modules.
Prerequisite(s): Pre-enrollment reading examination.
Units: (None) CR/NC

CLS 300 – Information Literacy Skills for Lifelong Learning
Teaches future healthcare professionals how to identify, evaluate, and synthesize information so that they can remain current with rapidly evolving healthcare practices throughout their careers.
Units: 3

COMMUNICATION STUDIES

COM 111 - Public Speaking
Introduces the fundamental principles, skills, and applications of speaking, preparation for public speaking, organization of materials, and presentation techniques, as well as critical listening skills and speech analysis. Provides students with opportunities to deliver various speech types.
Units: 3

COM 113 - Medical Terminology
Emphasizes etymology of disease terms, nomenclature of medical and surgical procedures, use of prefixes, suffixes, word roots, combining forms, and plurality of medical terms.
Formerly: AH 113
Units: 3

COM 113S - Medical Terminology (Self-Paced)
Provides accelerated review of basic medical terminology with modules available from the instructor and a test at the end of each unit to be completed in one to 12 weeks. Intended to assist those studying medicine and health care and who have a need to review or increase their medical vocabulary. Restricted to students with a previous background in medical terminology. Available only in the summer prior to a student’s fall entry.
Formerly: AH 113X
Units: 3

COM 210 - Principles of Argumentation
Studies argumentation as a form of critical reasoning by examining the nature of propositions, elements and structure of arguments, and forms and types of arguments concerning current issues in bioethics. Integrates these issues with the concerns of the health sciences professions.
Prerequisite(s): COM 111
Units: 3

COM 131 – Introductory Spanish
A comprehensive beginning Spanish course designed for students with no previous knowledge of Spanish or with a previous Spanish course that was taken more than three years ago. This course includes instruction and practice in all four basic languages skills of speaking, reading, writing, and listening. This course is a prerequisite for COM 231 Spanish for Healthcare Professionals.
Units: 3

COM 231-Spanish for Healthcare Professionals
Teaches the vocabulary, grammatical principles, and sentence structure needed by those in the medical field. Focus is primarily on methods to take a medical history, perform physical examinations, and counsel patients in Spanish to enhance the patient-healthcare provider relationship. This course is an in-residency
requirement and must be completed within the College of Science and Health for all undergraduate students. Formerly: COM 233 (2 units) plus COM 234 (1 unit)
Prerequisites: COM 131, one year of high school Spanish/one semester of college Spanish within the last 3 years, or preapproval by Instructor based on passing a competency exam.
In Residency Requirement for COSH Undergraduates: Must be completed within the College of Science and Health.
Units: 3

COM 315 - Cross Cultural Communication in Healthcare
Introduces the concepts and principles of effective communication as they are applied to communication within healthcare contexts. Focuses on interpersonal communication, including patient practitioner interactions, barriers to effective communication, verbal and nonverbal behavior, and ethics of communication, with an emphasis on cross-cultural communication. Course also covers professional presentation methods for academic and healthcare settings.
Prerequisite (S): COM111
Units: 3

COMPUTER SCIENCE

CPU 125 - Introduction to Computer Applications
Designed for students to enhance competency in information literacy and beginning research methods through the use of computers. Students will learn and practice the use of the internet, introductory website development and Microsoft Office applications of Word, Excel, and Powerpoint.
Units: 2

CPU 126 - Computer Theory and Application for Health Professionals
Designed to introduce students to the major concepts and applications of medical informatics. Includes history and evolution of information processing, elements of the computer system, input/output devices, computer files and databases, programming languages, data management, and ethical issues in computer technology. Teaches applications of computer technology in selected areas of study.
Formerly: AH 126
Prerequisite(s): CPU 125*
Units: 3 (2 lecture hours, 3 lab hours)

ECONOMICS

ECN 201 - Macroeconomics
Overview of macroeconomic theory. Examines national accounting, levels of output and employment, money supply, government monetary and foreign exchange, and the international monetary system.
Units: 3

ECN 202 - Microeconomics
Overview of microeconomic theory. Examines pricing, resource allocation, distribution, current domestic economic problems, international trade, and alternate economic systems.
Units: 3

ENGLISH

ENG 024 – Expository Writing Workshop
Intensive review of college-level English writing skills through study and exercises in grammar, syntax, and mechanics; as well as practice in essay writing with a focus on purpose, organization, development and style. This workshop is offered to provisionally admitted students who are required to demonstrate junior-level writing competency for regular admission into the College of Science and Health Bachelor Degree Programs.
Prerequisite(s): Pre-enrollment writing examination
Units: (None) CR/NC

ENG 099 – English Fundamentals for College Writing
This course prepares students for English Composition through intensive review of basic English language skills, including sentence structure and composition, mechanics, and usage, as well as study and exercises in word choice, style, paragraph development, and essay structure.
Units 3
Prerequisite(s)
Appropriate score on English Placement Examination.*

*Students who place into CLS-060 and or ENG-011 on the College Placement Examinations will be required to complete a supplemental CAI
curriculum to receive credit for the course.

**ENG 111 - English Composition**

Introduces the student to written discourse in the form of the essay. Reviews the stages of writing process and the stylistics involved in essay composition. Analyzes texts of various authors and teaches various types of essay composition.  
*Prerequisite(s):* ENG 099 or appropriate score on the pre-enrollment writing examination.  
*Units: 3*

**ENG 112 - Critical Thinking and Text Analysis**

This course is an intensive reading and writing course designed to develop the student’s ability to think critically, analyze, synthesize, evaluate, and draw conclusions from complex information in a variety of forms and contexts. The primary source material for the course will be texts, that is, textual forms, including, but not limited to, written, cultural, artistic, and various media forms. As the advanced semester of composition, this course will allow students to continue to define their academic reading, writing, and research practice, and to expand upon their knowledge and understanding of fundamental communication theory. The course will also offer opportunities for students to work in collaborative settings in order to broaden their experience in determining effective models for critical and creative thinking, and problem solving.  
*Prerequisite(s):* ENG 111  
*Units: 3*

**ENG 314 Writing for Health Care Professionals**

Emphasizes professional writing and research methods for students in allied health. Requires students to select, develop, and produce individual and collaborative writing projects from planning through production. Includes organizational or public document projects, such as journal articles, newsletters, a series of health promotion pamphlets, a set of organizational policies and procedures, or a community-based research project culminating in formal proposals.  
*Formerly: AH 255  
Prerequisite(s):* ENG 111  
*Units: 3*

**HEALTH SERVICES MANAGEMENT**

**HSM 306 – Organization and Management of Healthcare Systems**

Examines the administrative elements of health services management. Provides background, theoretical concepts, practices, and opportunities for the exploration and discussion of issues and problems in health services management. Provides a workable overall knowledge of health services management as well as particular insight into certain types of health systems.  
*Units: 3*

**HSM 311- Introduction to the U.S. Healthcare System**

Provides an overview of the United States healthcare system, including topics in health policy, financing, organization, and the institutions of healthcare systems, medical practice, and access to care. Introduces students to the historical and traditional bases of programs, issues, and aspects of healthcare delivery system in the United States.  
*Units: 3*

**HSM 312 – Introduction to Health Services Management**

Introduces management theories, practices, and organizational dynamics. Emphasizes the application of theories to managing health services and healthcare institutions. Topics include ethical and legal considerations, organizational design and change, strategic planning, marketing, quality improvement, motivation, leadership, communication, and human resources.  
*Units: 3*

**HSM 405 - Critical Health Issues**

Examines and evaluates current issues in the health care industry. Devotes particular attention to issues of community health, minority healthcare delivery, health care for the poor and the aged, the rising cost of health care, current state and federal legislation, and the legislative impact of voluntary and governmental health plans on minorities. Increases understanding of the medical, legal, and social aspects of health care, their impact and influence upon community health care, and particularly the healthcare delivery system for minority groups.  
*Units: 3*

**HSM 410 - Introduction to Managed Care**

Provides an understanding of the health maintenance organization (HMO) under current pluralistic systems of health care and insurance, and the organizational forms
of managed care. Examines the HMO as a health delivery system. Presents an overview of relevant terminology, concepts and issues including benefits packages and health insurance in the United States.

Units:  3

HUMANITIES

HUM 231 - Introduction to Humanities I
Provides an integrated historical, aesthetic, and philosophic perspective on world cultures with readings of primary texts, such as oral traditions from the earliest civilizations, including persistent African traditions, through the European late middle ages.
Prerequisite(s): ENG 111
Units:  3

HUM 232 - Introduction to Humanities II
Provides an integrated historical, aesthetic, and philosophic perspective on world cultures with readings of primary texts from the European Renaissance to the end of the second millennium.
Prerequisite(s): ENG 111
Units:  3

HUM 233 - Cultural Diversity in Contemporary Literature
Surveys the literatures of various cultural groups as expressed through the texts and voices of representative writers and poets. Emphasizes contemporary ethnic literatures, as well as representative writing of diverse cultural and sub-cultural groups. Focuses occasionally on special topics presented by visiting scholars.
Prerequisite(s): ENG 111
Units:  3

HUM 330 - Medical Humanities I: Philosophy of Health
Provides a humanistic study of medicine and health care from the perspectives of traditional and contemporary philosophies. Approaches current medical thought and health care in terms of the historical, cultural, and intellectual formation of such concepts as illness, wellness, methods of discovery and knowledge, mind/body, scientific, and holistic views of reality.
Formerly: AH 330
Prerequisite(s): All GE Humanities requirement.
Units:  3

HUM 335 - Medical Humanities II: Literature & Medicine
Provides a humanistic perspective of medicine and health care revealed through literary studies. Engages students in critical analyses and discussions of literary texts. Develops students’ perspectives on the role of literature in the art of medicine through essays and creative writing. Available to all students to fulfill the upper division unrestricted elective requirement.
Formerly: AH 335
Prerequisite(s): All GE Humanities requirement.
Units:  3

MATHEMATICS

MTH 022 - Pre-Algebra
Reviews the fundamental concepts of arithmetic, geometry, and elementary algebra.
Units:  (None) CR/NC
(no credit toward associate or bachelor degree)

MTH 121 - Elementary Algebra
Designed to develop proficiency with mathematical skills, to expand understanding of mathematical concepts and to improve logical thinking.
Prerequisite(s): MTH 022 or appropriate score on the pre-enrollment mathematics examination.
Units:  3 (cannot be used for bachelor degree requirement)

MTH 125 - Intermediate Algebra
Addresses concepts in Elementary Algebra (MTH 125) at a higher mathematical level. Provides an introduction to matrices and determinants and their applications to solving a system of linear equations, conic sections, nonlinear systems, inverse functions, exponential and logarithmic functions.
Prerequisite(s): MTH 121 or appropriate score on the pre-enrollment mathematics examination.
Units:  3 (cannot be used for bachelor degree requirement)

MTH 126 - College Algebra
Reviews basic algebra concepts, linear and quadratic equations with applications, functions and their graphs, probability, matrices, and determinants.
Prerequisite(s): MTH 125 or appropriate score on the pre-enrollment mathematics examination.
Units:  3

MTH 130 – Pre-Calculus
Elementary function theory with graphing techniques and applications. Polynomials, rational functions, exponential functions, logarithms, and trigonometric functions, arithmetic series, geometric series, and conic sections will be studied in detail. The course provides a solid foundation for the use of scientific and graphics calculators in problem solving.
Prerequisite(s): MTH 126 or appropriate score on the pre-enrollment mathematics examination.
Units:  3
MTH 150 Statistics for Research
This course is an introduction to the fundamental concepts of descriptive and inferential statistics that emphasizes application to the life sciences. Topics include: sampling and measurement, tests of significance, probability distributions, confidence intervals, regression, and correlation.
Prerequisite(s): MTH 130 or instructor approval*
Units: 3

MTH 230 – Calculus I
This course is an introduction to the differentiation and integration of elementary algebraic functions (polynomial, rational, and nth-root) and transcendental functions (exponential, logarithmic, and trigonometric) of one variable and the study of related topics including the fundamental theorems of calculus, maxima and minima, ordinary differential equations, and applications to statistics.
Prerequisite(s): MTH 130
Units: 3

MTH 231 – Calculus II
Continuation of MTH 230 that covers advanced integration techniques, Taylor series, convergence tests for infinite series, and multivariable calculus including: partial derivatives, multiple integrals, gradients and Laplacians, coordinate transformations, and partial differential equations.
Prerequisite(s): MTH 230
Units: 3

MICROBIOLOGY
MIC 223 - Applied Microbiology
Provides an introduction to the biology of microorganisms with emphasis on their roles in infectious disease, production and deterioration of goods in industry, agriculture, waste disposal, and production.
Prerequisite(s): BIO 124
Units: 6 (4 lecture units, 2 lab units)

NUTRITION
NTR 220- Principles of Nutrition
This course will introduce basic concepts of nutrition with an emphasis on methods to improve health through proper nutrition. Principles of digestion and absorption, the function of nutrients, lifecycle nutritive needs, disease prevention, diet modifications, and weight control will be covered.
Units: 3

PHILOSOPHY
PHL 112 - Logic and Critical Reasoning
Introductory course in logic and critical reasoning. Examines basic logical concepts, including formal and informal logic—reasoning, deduction, argument, proposition, induction, truth, and fallacy. Satisfies Division of General Studies critical thinking requirement.
Units: 3

PHYSICS
PHY 126 - Introductory Physics
Emphasizes the presentation of Newton’s laws of motion, work, and energy. Involves understanding of diverse forms of energy, focusing on the motion of particles and waves, electricity, and magnetism.
Prerequisite(s): *
Units: 4 (3 lecture units and 1 laboratory unit)

PHY 250 – General Physics I
Introductory calculus-based physics course. Topics include kinematics, mechanics, work, momentum, rotational motion, elasticity, mechanical waves, thermodynamics, and fluid mechanics.
Prerequisite(s): MTH 230 or instructor approval
Units: 4 (3 lecture units and 1 laboratory unit)

PHY 251 – General Physics II
Calculus based physics course. Topics include wave motion, electrostatics, electromagnetism, AC and DC circuits, optics, quantum theory, atomic and nuclear structure, relativity, and elementary particles.
Prerequisites(s): PHY 250
Units: 4 (3 lecture units and 1 laboratory unit)

POLITICAL SCIENCE
POL 141 - United States Government
This course is designed to explore the foundations and development of American politics and the American political system from its origins in the Western tradition until the present day and focuses on the ways in which various theoretical, philosophical, and historical ideas contribute to and inform the workings and dynamics of U.S. Politics and Government as it exists in the contemporary moment.
Formerly: POLS 141
Units: 3

PSYCHOLOGY
PSY 141 - General Psychology
Introduces psychology, including a brief overview of its history and various schools of thought. Focuses on the basics of human behavior, developmental psychology, personality and adjustment, and social psychology. Includes the application of psychological principles to health and cross-cultural experiences. Provides an introduction to methods of psychological evaluations.
Formerly: PSYCH 141
PSY 351 - Human Development
Describes human development from a physical, psychological, biological, anthropological, and sociological perspective from conception to death. Emphasizes the scientific method to describe and explain human development. Examines the influence of culture and the external environment. Discusses practical implications for allied health professionals.
Formerly: AH 351
Prerequisite(s): SOC 141 or PSY 141.
Units: 3

PUBLIC HEALTH EDUCATION

PHE 143 - Survey of Allied Health Professions
Provides a basic foundation for student inquiries into allied health occupations as career choices for the healthcare labor force. Develops skill in recognizing components of various options in the AHP.
Formerly: AH 143
Units: 3

PHE 250 - Community Health Issues
Discusses issues in community health including the medical, legal, and social aspects of areas such as substance abuse, communicable diseases, intentional injury, and death. Provides an overview of lifestyle behaviors that influence attitudes, services, and personal and social issues related to health. Provides an overview of behavior change strategies to improve health status. Integrates Healthy People 2020 objectives strategies for promoting health in underserved communities. This course is an in-residency requirement and must be completed within the College of Science and Health for all undergraduate students.
Prerequisite(s): None
Units: 2

PHE 255 - Sophomore Health Seminar and Capstone
Students synthesize, integrate, and build upon their academic achievements from their general education coursework and service learning experiences with an emphasis on communication, critical thinking, understanding cultural diversity, and technical skill development. This course is an in-residency requirement and must be completed within the College of Science and Health for all Associate degree students.
Formerly: AH 252 and AH 255
Prerequisite(s): PHE 250
Units: 1

PHE 344 - Educational Methods for Allied Health Practitioners
Provides an overview of theoretical concepts of learning, teaching, planning, implementing, and evaluating education experiences for individuals in various settings and at different stages in the life cycle. Emphasizes the development of lesson plans, usage of audiovisual aids, and application of educational methods in practical settings.
Formerly: AH 344
Prerequisite(s): 3 units in social/behavioral science
Units: 3

PHE 352 - Health Dynamics and Cultural Diversity
Examines cross-cultural views of health, disease, and medicine. Examines health behavior skills intended to facilitate behavior change in cross-cultural groups. Surveys strategies for promoting optimal care for patients and self in the clinical situation, and increasing awareness of health behaviors that can inhibit or enhance behavior change. Provides an overview of four modules: cultural and religious diversity and differences, the dynamics of helping relationships, violence and intentional injury, and interpersonal communication skills. Emphasizes promotion of optimal provider-patient relationships in the clinic and other medical encounters.
Formerly: AH 352
Prerequisite(s): SOC 141 or PSY 141
Units: 3

PHE 450 - Senior Health Seminar and Capstone
Students synthesize, integrate, and build upon their academic achievements from their general education course work and service learning experiences with an emphasis on communication, critical thinking, understanding cultural diversity, and technical skill development. This course is an in-residency requirement and must be completed within the College of Science and Health for all undergraduate Bachelor’s degree students.
Formerly: AH 355 and AH 450
Prerequisite(s): PHE 250
Units: 1

PHE 451 - Research Methods
Presents students with various aspects of health-related research. Focuses on basic research design, proposal construction, data collection, statistical theory, and formal report writing. Aims to develop and/or enhance the student's ability to participate in and conduct basic research.
Formerly: AH 321
Prerequisite(s): CPU 125*
Units: 3

SOCIOLOGY

SOC 141 - Introduction to Sociology
Introduces the study of self, socialization, and social interaction. Explores interpersonal relations, social roles, structure and social change, and culture.

**Units:** 3

**SOC 240 - Urban Sociology**
Examines organization of the modern city with an emphasis on: 1) the social problems of the modern industrial center; 2) comparisons of minority communities across cultures; 3) differential structure and process of minority group life; and 4) analysis of trends in urban and suburban communities.

**Prerequisite(s):** SOC 141*
**Units:** 3

---

**RADIOLOGIC TECHNOLOGY**

**Program Director:** Eugene Hasson, M.S., R.T. (R)

**Location:** W.M. Keck Building

**Telephone:** (323) 563-5835

The Associate of Science degree program in Radiologic Technology serves as the foundation for a Bachelor of Science degree in medical imaging technology and/or health sciences. It is designed to prepare the student for employment as an entry-level radiologic technologist after two years of didactic, clinical and professional education. The program also provides the necessary prerequisite courses for a Bachelor of Science degree in medical imaging technology program.

The primary duties of a radiologic technologist include operating imaging equipment, ensuring radiation safety from unnecessary exposure for the general public and themselves. Technologists perform clinical procedures to produce X-ray studies for the diagnosis and treatment of injury and disease. Other duties include HIPPA compliance, financial stewardship, protection of patient rights and maintaining medical records. Technologist also positions the patients, determining safe technical factors, process images and assist in the performance of advanced imaging procedures and initiating basic life-support techniques as necessary. Radiologic technologists provide patient services using imaging equipment as directed by physicians. Professional competence requires that radiologic technologists apply knowledge of anatomy, physiology, positioning, radiographic technique and radiation protection to produce body images.

Radiologic technologists must exercise independent judgment and critical thinking skills in the performance of imaging procedures and must be able to communicate effectively with patients, other health professionals and the general public. Graduates are eligible to practice as radiologic technologists after successful completion of certifying examinations (ARRT, CRT and Fluoroscopy).

Professional courses are arranged and must be completed in sequence. Progression toward and completion of the Associate Degree requires the attainment of a minimum grade of “C” in all professional courses.

Didactic and clinical professional courses are designed in a manner consistent with the standards and curriculum models outlined by the American Society of Radiologic Technologists (ASRT).

Students are required to wear a regulation uniform during clinical assignments. Students must provide their own transportation to all facilities and must be willing to travel 60 miles each way to the various clinical sites. Clinical site locations currently extend from Los Angeles County to San Bernardino County. Clinical hours vary from 5:00 am to 11:30 pm. Weekends may also be included as part of the clinical experience. A student who misses 10% or more of the clinical portion of the program, in a given semester, is subject to dismissal pending faculty review.

All students are required to pass a physical exam before entering the program. If at any time before or after acceptance into the program the student’s conduct or physical or emotional health is such that there is potential threat to the well-being of patients, fellow students, faculty and staff, the applicant will be denied admission to, or be withdrawn from, the program. In addition to the policies and standards of Charles R. Drew University of Medicine and Science, College of Science and Health, the Radiologic Technology program has policies and procedures based on the professional standards and guidelines of their individual regulating state, accrediting bodies and committees. These additional policies and procedures are listed in the policy and procedure manual handbook and are reviewed each semester with students during all professional courses. All program policies, including the pregnancy and radiation safety and protection policy, are in the Radiologic Technology Program Policies and Procedures Manual, Radiologic Technology Program Clinical Handbook and Radiologic Technology Program Handbook.

**Program Mission Statement**
To educate entry-level radiologic technologists who assist in providing high quality healthcare with excellence and compassion by producing diagnostic images through the knowledge and application of radiologic science while maintaining the patient as their
primary focus, and by administering the necessary radiation protection measures and quality patient care.

Program Goals and Program Student Learning Outcomes

Goal #1: Graduate students who will be clinically competent.

Student Learning Outcomes:
• Students will apply accurate positioning skills.
• Students will select appropriate technical factors.
• Students will use appropriate radiation protection measures.

Goal #2: Graduate students who will be able to demonstrate communication skills.

Student Learning Outcomes:
• Students will demonstrate oral communication skills.
• Students will demonstrate written communication skills.

Goal #3: Graduate students who will demonstrate problem solving and critical thinking skills.

Student Learning Outcomes:
• Students will successfully complete all laboratory experiments.
• Students will adapt to non-routine positioning situations.

Goal #4: Graduate students who are ethical and professional.

Student Learning Outcomes:
• Graduates will demonstrate professionalism upon employment.
• Students will learn how to protect patient information.
• Students will develop a professional portfolio.

Accreditation

The Radiologic Technology program is accredited by:

The Joint Review Committee on Education in Radiologic Technology (JRCERT)
20 N. Wacker Drive, Suite 2850
Chicago, IL 60606-3182
Tel: (312) 704-5300 Fax: (312) 704-5304
Website: www.jrcert.org

Approval

The Radiologic Technology program is approved by:

The State of California
Department of Public Health
Radiologic Health Branch
MS 7610
1500 Capital Avenue, 5th Floor, Bldg 172
Sacramento, CA 95814-5006
Tel: (916) 327-5106
Website: http://cdph.ca.gov/rhb

Program Specific Requirements

• Minimum 3.0 GPA
• Equipment & Supplies Fee $300 (one-time)
• Annual Clinical Fee $1,000
• Parking fees (if any)
• Program admission interview
• Ability to lift 25 pounds without assistance
• Copy of titers showing immunity against measles, mumps, rubella (MMR) and varicella or titers, and tetanus
• Hepatitis B vaccination
• Proof of a negative tuberculosis skin test or Chest X-ray if skin test is positive (Annual Requirement) or QuantiFERON TB Blood Test to avoid x-ray exam.
• Proof of health-care insurance
• Pass a physical examination conducted by a licensed healthcare provider (applicants are responsible for covering any expenses for a physical examination)
• Visual and/or hearing impairments must be correctable with appropriate devices
• Completion of the required college-level courses from a regionally accredited college or university with a minimum grade of “C”
• Completion of Live Scan (Convictions may not disqualify applicant)

It is the responsibility of the applicant to verify receipt of all transcripts and completion of application file. Applications are reviewed in the order they are received.

Admission to the Program

Admission to the program is highly selective and the number of students accepted will depend on the number of clinical site openings. Admission will also depend on an objective and subjective interview.

Appeals

Any applicant who does not meet the entrance requirements may write a letter of appeal to the Radiologic Technology Appeals Committee stating why the applicant feels the application should be reconsidered.

Send the appeal to:

Attn: Radiologic Technology Appeals Committee
Charles R. Drew University of Medicine and Science
1731 E. 120th St.
Los Angeles, CA 90059

Grievance Policy
The grievance policy with a timeline is stated in the University Catalog and is also located in the student policy and procedure manual.

Technical Standards:
Radiography requires proficiency in the application of technical knowledge and operation of specialized equipment in a competent and safe manner. In addition, the technologist must be able to provide physical care and emotional support to patients during the radiographic procedures.

1) Visual acuity
2) Auditory perception
3) Communication
4) Gross and fine motor
5) Intellectual ability to measure, calculate, reason, analyze, and evaluate as required for direct patient care. The applicant must be able to comprehend three-dimensional and spatial relationships
6) Emotional stability
7) Social attributes to allow the development of mature, sensitive and effective relationships with patients, faculty, co-workers and administrators.

The Technical Standards for Admission have been established as a guidance tool for use in realistically informing the student of minimum standards needed to satisfactorily function in the program and ultimately in the profession.

Program Prerequisites (13 Units)
Anatomy and Physiology 4
Elementary Algebra 3
English Composition 3
Medical Terminology 3

Science courses older than seven (7) years will not be accepted.

General Information
All Radiologic Technology courses must be completed with a minimum grade of “C” before the student can enroll in subsequent semester courses. Eighty four (84) units are required to complete the Associate of Science Degree.

Health Insurance and Accountability Act (HIPAA)
Students will learn about the HIPAA’s protection of individually identifiable health information.

Ethics (ARRT)
Ethics are mandatory standards of minimally acceptable professional conduct for all present Registered Technologist and Candidates. The Standard of Ethics can be viewed at www.arrt.org.

**If the transferred computer course does not contain an
Information Literacy and Research Methods component, ILR 101 must be taken at CDU for 1 unit.

For a complete listing of general education requirements, see “General Education” in the Catalog.

Advising
The Radiologic Technology Advisors can assist students in planning course schedules, evaluating previous completed general education courses, etc. Student are encouraged to make an appointment through the Program Office, (323) 563-5835.

Transfer and Returning Students
Please see University Policies section of this Catalog for admission requirements and procedures.

Misdemeanor or Felony Disclosures
In the event that an applicant has been convicted of a crime, licensure may be denied. This is determined by the Ethics Committee of the American Registry of Radiologic Technologists. Information is available at https://www.arrt.org/Ethics/.

Course Descriptions

RAD 102 – Introduction to Radiologic Technology
Provides an introduction to the profession of radiologic technology. Discusses introduction to the clinical setting, radiologic services administration, basic radiation protection, patient interactions, and infection control. Discusses an overview of radiography, its role in the healthcare delivery system, and the history and future of the profession.
Units: 2

RAD 103 - Radiographic Positioning I w/lab
Designed to provide the student with the necessary concepts and practical experiences in basic standardized radiographic positioning of the upper limb, lower limb, and chest. This course also discusses radiographic terminology and considerations related to the production of quality radiographs.
Units: 3

RAD 104 - Radiographic Positioning II w/lab
Designed to provide the student with the necessary concepts and practical experience in basic standardized radiographic positioning of the, pelvic girdle, bony thorax, and abdomen. This course also discusses radiographic terminology and considerations related to the production of quality radiographs.
Prerequisite(s): All RAD course in the first year fall semester
Units: 3

RAD 105 - Methods of Patient Care
Designed to acquaint the student with the necessary concepts of patient care. It includes the consideration of physical and psychological conditions. It describes routine and emergency patient care procedures. It also identifies the role of the radiologic technologist in patient education. This course also discusses aspects of death and dying. It discusses contrast media pharmacology and its practical use and includes certification in basic CPR.
Units: 2

RAD 106 - Radiographic Positioning III w/lab
Provides the necessary concepts and practical experience in basic standardized radiographic positioning of the skull, sinuses, petromastoid, and temporomandibular articulations. Discusses considerations related to the production of quality radiographs. This course also discusses radiographic terminology and considerations related to the production of quality radiographs.
Prerequisite(s): All RAD courses in the first year fall and spring semesters
Units: 3

RAD 107 – Introduction to Radiography Physics
Introduces basic health physics and computational techniques required for further education in the radiologic technology. Topics include atomic physics, quantum mechanics, radioactivity, electromagnetism, X-ray production, X-ray interactions with matter, and a comparative survey of medical imaging techniques.
Units: 3

RAD 112 - Principles of Radiation Exposure I
Provides introductory knowledge and understanding of X-ray exposure technique as correlated with practical application. It provides an introduction to PACS and digital radiography. Develops the capability to devise and revise a technique based on sound principles and practices. It discusses basic math and algebra formulas. Basic fundamentals concerned with the production, analysis, and recording of radiographic images are included in this course. Understanding density, contrast, detail and distortion as well as their interrelationships will be emphasized. Subject matter will include mAs, kVp, distance relationships, geometric image formation, grids, beam limiting devices, filtration, film, intensifying screens, and technique charts. Laboratory assignments are included.
Prerequisite(s): All RAD courses in the first fall semester
Units: 2

RAD 113- Principles of Radiation Exposure II
Continuation of RAD 112. This course continues to provide knowledge and understanding of X-ray exposure technique as correlated with practical application. This course also provides knowledge of factors that govern and influence the production and recording of radiographic images. It provides further knowledge of PACS and digital radiography, and fluoroscopy. It also demonstrates clinical applications of theoretical principles and concepts via laboratory assignments and discussion.

**Prerequisite(s): All RAD courses in the first year fall and spring semesters**

**Units:** 2

**RAD 120 - Clinical Practicum I**

Designed to introduce the student to the clinical setting and exposure to departmental organization; patient flow, analog and digital imaging; observation in various sections of the radiography department. It requires assigned students to assist in various patient care and departmental functions and perform examinations under direct supervision.

**Units:** 2

**RAD 130 - Clinical Practicum II**

Designed to further develop student clinical skills under direct and indirect supervision. This course further develops practical skills in patient care. The student continues to accumulate hours and examinations required by the State of California Department of Health Services.

**Prerequisites:** All RAD courses in the first year fall semester

**Units:** 3

**RAD 140 – Clinical Practicum III**

Second year clinical course designed to continue developing skills in performing examinations under direct and indirect supervision. The student continues to develop positioning skills and making exposures using sound radiation protection decisions. Students must begin to demonstrate developing competency in radiographic procedures of patients with emergent and non-emergent conditions. The student continues to accumulate hours and examinations required by the State of California Department of Health Services.

**Prerequisites:** All RAD courses in the first year fall and spring semesters

**Units:** 4

**RAD 209 - Radiographic Positioning IV w/lab**

Provides study and laboratory demonstration in various anatomical positions necessary to demonstrate specific anatomical parts for diagnostic evaluation with an emphasis on the vertebral column. Discuss medical terminology and considerations related to the production of quality radiographs.

**Prerequisite(s): All RAD courses in the first year**

**Units:** 3

**RAD 215 – Advanced Radiographic Procedures**

Designed to introduce and develop skills necessary to perform special procedures. This course will also develop skills necessary to perform procedures on patients with unusual conditions or pathologies. This course covers the contrast studies of the abdomen, liver, spleen, biliary tract, alimentary canal, and urinary system. It discusses fluoroscopy radiation protection. It also provides study and laboratory demonstration of various positions necessary to demonstrate specific anatomical parts for diagnostic evaluation. This course also discusses radiographic terminology and considerations related to the production of quality radiographs.

**Prerequisite(s): All RAD courses in the first year**

**Units:** 3

**RAD 216 – Principles of Radiation Exposure III**

Designed to further develop theoretical knowledge of studies in X-ray production, emission, and interaction with matter and a recording medium. Introduces advanced fundamentals of radiation and radiation physics as it applies to humans and image receptors. It also provides study in radiation protection, radiation monitoring, and dosimetry. It also introduces the fundamentals of physics in mammography, fluoroscopy, and special procedures.

**Prerequisite(s): All RAD courses in the first year**

**Units:** 2

**RAD 217 – Sophomore Seminar II & Certification Preparation**

Designed for the student to review those subjects necessary for the successful completion of the American Registry of Radiologic Technologists (ARRT) certification examination, fluoroscopy, and/or the California Certified Radiologic Technologist (CRT) certification exams in radiography. Consists of lectures by guest and faculty. This course also permits the student to use simulated testing software to identify and eliminate their own personal areas of academic weakness before taking the certification examinations.

**Prerequisite(s): All RAD courses in the first year and second year fall semesters**

**Units:** 5

**RAD 220 - Clinical Practicum IV**

Designed to continue develop advanced skills in performing examinations under direct and indirect supervision. The student continues to develop
positioning skills and making exposures using sound radiation protection decisions. Students must demonstrate developing competency in radiographic procedures of patients with emergent and non-emergent conditions.

Prerequisite(s): All RAD courses in the first year
Units: 4

RAD 230 - Clinical Practicum V
Designed to continue to develop advanced skills in performing examinations under indirect supervision. The student begins to master positioning skills and making exposures using sound radiation protection decisions. Students must begin to demonstrate mastery competency in radiographic procedures of patients with emergent and non-emergent conditions. This course enhances skills in procedures learned in prior clinical courses. It provides comprehensive experiences in closely related special imaging and therapeutic modalities to broaden knowledge of the profession.

Prerequisite(s): All RAD courses in the first year and second year fall semester
Units: 4

NOTE: This curriculum schedule is a correct representation of the program at the time of publication. The Radiologic Technology program has the right to modify its content at anytime with the approval of the Education & Academic Policy Committee and the Dean of the College of Science and Health. It is the University’s responsibility to provide a curriculum, which fulfills all intra and extra institutional requirements. All potential graduates must pass program completion requirements prior to ARRT testing.

Students must also pass a final written comprehensive examination with a minimum score of 85% as part of the program completion requirements. A total of 50 hours of community service must be fulfilled for graduation. Additionally, 1865 hours of clinical practice are required for program completion and 15 hours of clinical time will be used to complete the fluoroscopy program laboratory experiments. Professional courses from other schools will not be accepted as transfer courses. Charles R. Drew University is in compliance with all Laws and Regulations of The State of California Department of Public Health Radiologic Health Branch.

Bachelor of Science, Life Sciences
Department Chair: Monica G. Ferrini, M.S., Ph.D.
Location: W.M. Keck Building
Telephone: (323) 563-5962

Website: http://www.cdrewu.edu/cosh/prog/LS

The Bachelor of Science (BS) degree in Life Sciences prepares students for entry into graduate and professional programs in medicine, nursing, physician assistant, pharmacy or dentistry, master and doctoral programs in scientific research, in addition to employment in biomedical laboratories.

The program provides the required course, with laboratory training for graduate and professional school admission. Preparation for professional and graduate school examinations and access to relevant extracurricular activities such as community service and research opportunities with faculty mentors is available.

The Life Sciences program offers fundamental knowledge that can be applied to the practice of health professions. They include the multidisciplinary study of health and diseases, and particularly the biological and molecular sciences that constitute the foundation of modern medicine.

The Mission
The mission of the Department of Health and Life Sciences is to provide an integrated program of learning, research, leadership training and community service in order to prepare graduates to pursue their goals for professional and advanced degrees in health care or biomedicine. This will be accomplished by discovery, dissemination and application of knowledge in the Life Sciences, and by educating and training undergraduate, graduate, professional and post-graduate students.

Program Objectives/Student Learning Outcomes
Students are immersed in structured comprehensive curricula that prepare students for careers in health professions by offering course and laboratory work and research opportunities that develop fundamental problem-solving, critical thinking, writing and communication skills. Our students graduate with the scientific knowledge and intellectual abilities to pursue careers or post graduate education in the health professions.

Graduates with a Bachelor of Science in Life Science are able to:

Knowledge:
- Apply STEM science disciplines (biology, chemistry and physics) to solve scientific problems;
- Demonstrate competency in written and oral communication;

Skills:
• Show proficiency to conduct experiments and analyze and interpret results;
• Demonstrate scientific leadership skills.

Attitude:
• Demonstrate ethical judgment in science;
• Demonstrate competency in the use of technology to obtain valid scientific information.

Program Highlights
Small Class Size _ each year a new class of up to 32 students are accepted into the program.

Doctoral Level Instructors – Courses are taught by doctoral level, CDU/UCLA faculty with multiple years of teaching experience who are experts in their fields.

Mentored Research Experience — Students work on independent research projects with faculty skilled in mentoring young scientists. Faculty and students in the Department of Health and Life Sciences use state-of-the-art techniques in microscopy, computer imaging, electrophysiology, biochemistry and molecular biology to investigate important problems in biomedicine.

Development of Strong Ethical and Leadership Qualities — In accordance with the University’s mission, the Life Sciences program fosters and develops strong ethical values in students through leadership training and service to the community.

Preparation for Graduate and Professional School — The Life Sciences degree is designed to prepare students for post-graduate programs in the various health professions.

Individualized Attention/ Curriculum — Students will have the opportunity to work closely with professors and researchers in a small class environment. Students will have ample opportunities to:
• Interact with academic counselors and departmental staff,
• Advance communication skills through special workshops,
• Receive personalized academic advisory, career exploration assistance and graduate school interview preparation with career advisors,
• Students can take upper division courses based on their career interest with emphasis on Pre-Medicine, Pre-Nursing, Pre-Dentistry, Pre-Pharmacy, Pre-Physician Assistant Studies and Life Sciences.

Application
The Department of Health and Life Sciences accepts applications for the Life Science undergraduate program in the Fall and Spring until classes are filled.

See University Policy section in this Catalog for Application Deadlines.

Program Admission Requirements
The Department of Health and Life Sciences accepts applications only from transfer students with 30 or more credit units.

Matriculation Requirements:
• Completion of the Application for Undergraduate Studies
• Minimum grade point average (GPA) of 3.0 (on a 4.0 scale)
• Completion of Math and English placement exams
• Completion of CHM 100 and BIO 100 or equivalent

Life Sciences Program Curriculum

Requirements for the Major (120 units)
Of the 120 units required for the Bachelor of Science degree in Life Sciences, 52 units of general education are required (refer to the General Education section for core requirements for BS degree); the major requires lower and upper division courses and Life Sciences electives. During freshman and sophomore years, students have to take summer semester courses.

52 units General Education
37 units Lower Division
14 units Upper Division
17 units Electives

Total: 120 units

Successful completion of the major requires a minimum C (2.0) overall grade point average.

Prerequisite(s): CHM 100 or instructor approval.
Units: 10

HLS 200 – Leadership Seminar I
This interactive course will explore, both through readings and various activities, the meaning of leadership in today’s scientific enterprise at the service of society.
Prerequisite(s): Sophomore standing.
Units: 1

HLS 210ABL – Organic Chemistry with Lab
Intermediate chemistry course dealing with structural and synthetic concepts of organic chemistry, atomic theory, electron configuration, bonding, molecular structure, stereochemistry, molecular identification by IR, Mass, & NMR spectroscopy, reaction stoichiometry, purification, and reaction pathways.
Prerequisite: HLS 140ABL or equivalent.
Units: 8

HLS 250L – Brain and Behavior
Introduction to neuroscience and multi-level frames of reference that put the brain in context. Cells and molecules, nervous system organization, interactions with other body systems, higher brain functions, health and disease.
Prerequisite(s): BIO 100 or instructor approval
Units: 3

HLS 299 – Independent Study
Provides students an opportunity to apply knowledge and skills obtained in prior courses and to learn skills not specifically presented in the curriculum by working with a mentor.
Prerequisite(s): Approval of Department Chair.
Units: 1-4 units in total

HLS 300L – Biochemistry with Lab
Advanced biochemical course in biological chemistry, cellular metabolism, enzyme protein complexes, peptide bonds, carbohydrates, glycolysis and citrate cycle, respiration, photosynthesis, ATP energy, degradation and biosynthesis of lipids and amino acids, enzyme kinetics.
Prerequisite(s): HLS210BL
Units: 4

HLS 302L – Cellular and Molecular Biology with Lab
This course is intended to help the student to understand how the molecules of the cell cooperate, how the living cells work in their social context. The course provides fundamental and conceptual framework for cell biology and cell signaling to recognize biological and biomedical issues that affect our lives.
Prerequisite(s): HLS 130ABL or instructor approval

Units: 4

**HLS 310 ABL – Anatomy and Physiology with Lab**

Introduction to anatomy and physiology for biomedical science students. Includes overview of all body systems, structure and function of cells, tissues, and organs. Detailed survey of the integumentary, musculoskeletal, digestive, urinary nervous, endocrine, reproductive, circulatory, and respiratory systems.

Prerequisite(s): HLS 130 ABL or instructor approval.

Units: 8

**HLS 320 L – General Microbiology with Lab**

Microbiology provides an overview of the diversity, genetics, physiology, and ecology of micro-organisms, focusing on what sets them apart from the plants and animals studied in most of the biology courses. It will provide the necessary background for upper-level courses such as bacterial genetics or immunology, and issues related to public health.

Prerequisite(s): HLS 130 ABL or instructor approval.

Units: 4

**HLS 330 – Histology and Histopathology**

This course covers the microscopic study of normal tissues and organs using light and electron microscopy. It also provides an introduction to the study of histopathology. Students will develop expertise in basic histological techniques for preparing animal tissue for microscopic study.

Prerequisite(s): HLS 310 ABL or instructor approval.

Units: 3

**HLS 368 L – Fundamentals of Biotechnology w/ Lab**

The course gives an introduction to scientific concepts, laboratory techniques used in biotechnology with emphasis on medical applications. Students develop critical thinking, and communication skills; explore and understand bioethics and explain how it relates to medical biotechnology.

Prerequisite(s): HLS 130 ABL and HLS 300 L, or instructor approval.

Units: 3

**HLS 400 – Leadership Seminar II**

Leadership Seminar II will focus on implementation of skills discovered in Leadership Seminar I.

Prerequisite(s): HLS 200

Units: 1

**HLS 401 – Pharmacology**

An introduction to the structure, mechanisms, pharmacokinetics, pharmacodynamics, therapeutic uses and adverse reactions of prototypic agents from the major categories of drugs.

Prerequisite(s): HLS 210 ABL or instructor approval.

Units: 3

**HLS 402 L – Molecular Biology with Lab**

A course designed to introduce the scientific theory of molecular biology and gene manipulation combined with experimental laboratory practice. The central goal is understanding gene regulation at all levels.

Prerequisite(s): HLS 300 L or instructor approval.

Units: 3

**HLS 405 L – Immunology with Lab**

Immunology is a course designed to introduce the student to the Immune response, cellular and humoral, induction of immunity, detection of antibodies, principal serologic methods evaluation of immune response. It will address three sections: fundamental immunology, serology, and introduction to clinical immunology.

Prerequisite(s): HLS 320 L instructor approval.

Units: 3

**HLS 410 – Human Genetics**

Principles and methods of genetics as they relate to humans as individuals and in populations. This course covers the topics of human disease genes, cytogenetics, medical genetics, cancer genetics, and population genetics. In each section, principles are presented by way of illustration of particular human genetic diseases or conditions.

Prerequisite(s): HLS 130 ABL or equivalent.

Units: 3

**HLS 425 – Human Embryology**

Examining development with emphasis on human embryology. This course examines normal and abnormal human fetal development, birth defects, in vitro fertilization, stem cells, and cloning. Emphasis is put on the mechanisms that underlie development and the effect on the adult. This course is designed for students interested in a career in medicine, biology, research, and allied health sciences.

Prerequisite(s): HLS 130 ABL or equivalent.

Units: 3

**HLS 435 – Neurobiology: Human Neuroanatomy**

This course designed to introduce the student to the gross and microscopic structure of the human nervous system, its organizational aspects, classical lesions and deficits.

Prerequisite(s): HLS 310 AL or instructor approval.

Units: 3

**HLS 444 – Clinical Immunology and Hematology**
This course provides basic knowledge in clinical immunology and hematology as it applies to disease pathogenesis and patient care. It will cover new advances in interventional clinical immunology and hematology, and sections on hematopoietic stem cell origins and immune responses to infectious diseases.

**Prerequisite(s):** HLS 320L and HLS 405L or instructor approval.

**Units:** 3

**HLS 450 – Ethical Issues in Research**

Exploration of ethical issues that arise while conducting biomedical research. Examination of ethical issues such as establishing guidelines for ethical research methods, understanding legal requirements for conducting biomedical research, considering subjects’ cultural and/or religious backgrounds, and citing others’ work. Includes guided practice in moral reasoning as it relates to research.

**Prerequisite(s):** Sophomore standing.

**Units:** 1

**HLS 453 – Biophysics**

An introduction to the physics of living systems including the biological applications of thermodynamics, fluid mechanics, osmosis, diffusion, membrane permeability, molecular mechanics, chemical forces, self-assembly, action potentials, and neuro-electric phenomena.

**Prerequisite(s):** PHY 250L, PHY 251L, HLS 130ABL, or equivalent, MTH 150 or instructor approval.

**Units:** 3

**HLS 460 – Human Parasitology**

This course provides an overview of parasites that affect human health and the diseases they cause. It also includes the mechanisms behind the emergence of new microbial threats, and sections on how human parasites establish themselves within a host to sustain an infection.

**Prerequisite(s):** HLS-320L or instructor approval

**Units:** 3

**HLS 490 – Senior Seminar**

Senior undergraduate students have the opportunity to expose to the important aspects of professional scientific practice before graduation and entry into the workforce. Some of the objectives are: 1) applying the scientific process, including designing experiments and testing of hypotheses; 2) using mathematics and statistics to evaluate scientific evidence; and 3) reading, understanding, and critically reviewing scientific papers and presentations.

**Prerequisite(s):** Senior standing or instructor approval.

**Units:** 1

**HLS 495AB – Capstone-MCAT**

A comprehensive summary course of the four year BS education for a deeper understanding of scientific principles with an emphasis of MCAT exam preparation. The course includes test taking strategy, critical thinking, problem solving elements, overviews the biological and chemical foundations of living systems, and challenges students understanding the psychological, social and biological foundations of behavior.

**Prerequisite(s):** HLS 130ABL, HLS 140ABL, HLS 210ABL, HLS 300L, SOC 141, PSY 141, PHY 250L, PHY 251L or instructor approval

**Units:** 2,2

**HLS 499 – Research Project**

Provides students an opportunity to apply knowledge and skills obtained in prior courses and to learn skills not specifically presented in the curriculum by working with a mentor on a particular research project of the student’s choice.

**Prerequisite(s):** Approval of Department Chair.

**Units:** 1-4 units in total.

**POST-BACCALAUREATE CERTIFICATE IN PRE-MEDICINE**

**Department Acting Chair:**

Monica G. Ferrini, M.S., Ph.D.

**Location:** W.M. Keck Building

**Telephone:** (323) 563-5962

**Website:**

http://www.cdrewu.edu/cosh/programs/graduate

Charles R. Drew University of Medicine and Science belongs to a group of 71 institutions out of 204 in the country and it is one of 8 institutions out of 23 in California offering a post baccalaureate certificate in pre-medicine program (see http://services.aamc.org/postbac/). The certificate program is designed for “career changers” or “career enhancers.” Career changers are individuals who have already earned an undergraduate degree, but lack the requisite science background to pursue matriculation to medical or other graduate health professions schools. Career enhancers are individuals who have the requisite science background, but need to improve the status of their candidacy through improved admissions exam scores, completion of upper division sciences, and enhancing the application packet. Our program gives college graduates and professionals the opportunity to
take courses required for admission to medical, nursing, osteopathic, pharmacy, and dental schools.

The Mission
The mission of the Department of Health and Life Sciences is to provide an integrated program of learning, research, leadership training, and community service in order to prepare graduates to pursue their goals for professional and advanced degrees in health care or biomedicine.

Program Objectives/Student Learning Outcomes
The Charles R. Drew University recognizes that the United States is facing a severe physician shortage: the Association of American Medical Colleges predicts that the deficit in physicians will reach 91,500 by 2020. Moreover, the distribution of physicians relative to the nations underserved continues to be a major concern. Therefore, the Post-Baccalaureate Certificate Program aims to help address the problem of physician demand as well as distribution by increasing the number of those qualified to join the health professions.

In an environment of academic excellence and personalized attention, the Post – Baccalaureate program enables students to competitively apply to health professional schools.

The program aims to develop critical thinking and test-taking skills within a rigorous academic setting. Our program seeks to optimize each student’s likelihood of success through individualized programs of instruction combined with small class sizes and one-on-one attention. Post-Baccalaureate Certificate holders are able to:

- Recognize physical, chemical, biological and biochemical foundations of living systems.
- Synthesize and integrate scientific concepts and principles to develop evidenced based problem solving skills upon completion of the Post Baccalaureate Certificate program.
- Implement verbal reasoning and writing skills to employ test taking strategies in the completion of professional health exams.
- Interpret the social, psychological, and biological foundation of behavior and their impact on society in the context of health and well-being.
- Demonstrate competency in the use of technology to obtain valid scientific information.

Program Highlights
Small Class Size - Each year 45 students are accepted into the program.

Individualized Attention - Students will have the opportunity to work closely with professors in a small class environment. Students will also have ample opportunities to:

- Interact with academic counselors and departmental staff
- Advance communication and test-taking skills through special workshops
- Receive personalized academic advisory, career exploration assistance, and medical school interview preparation with Career Counselors

Application
The Department of Health and Life Sciences accepts applications for the post-baccalaureate program only once a year for the fall semester. However, applications can be reviewed throughout the year. See University Policy section in this Catalog for Application Deadlines.

Program Admission Requirements
The Department of Health and Life Sciences conducts a comprehensive review of all applications for certificate admission, involving an academic review and evaluation of personal achievements and life challenges.

Matriculation Requirements
- A Bachelor degree from a regionally accredited college/university
- Minimum overall grade point average (GPA) of 2.8.
- Completion of Math placement exam.
- Completion of CHM 100 and BIO 100 or equivalent

Certificate in Pre-Medicine Curriculum
The core curriculum represents a logical sequence of science courses necessary for application to medical and other schools of advanced health studies. Nevertheless, the certificate program is flexible and tailored to suit each student's specific goals and background.

Individuals taking all of the basic science courses will usually spend two academic years (four semesters) completing the program. For those taking fewer courses, less time may be required.
Post-Baccalaureate candidates may elect to take only the courses they require to achieve their goal; A Certificate of Completion will be awarded to those students completing a minimum of 24 units. All certificates must achieve a cumulative GPA of 3.0 or above. The maximum number of credits that can be earned in the post-baccalaureate program is 36. The maximum stay in the program is 3 years.

**MCAT Preparation**

A MCAT preparation course is offered by the program as HLS 495AB. All materials, books, and on-line tests are provided. In addition, test-taking seminars are scheduled throughout the year and are designed to reduce test-taking stress.

**Community Service**

President John F. Kennedy once appealed to Americans: "Ask not what your country can do for you, ask what you can do for your country." Inherent in that theme is the idea that we shall all serve each other as fellow citizens. It is in this spirit that the community service requirement was launched. Through service, students will develop an understanding of the needs of the community, and experience the joy of making a difference in the lives of those in need. The minimum graduation service requirement for the Post-Baccalaureate Certificate is 25 hours.

**Course Descriptions**

See the Life Sciences Bachelor degree pages.

**Graduate Programs**

**Urban Public Health, MPH**

**Program Director:** Sondos Islam, PhD, MPH, MS  
**Location:** W.M. Keck Building, Room 225  
**Telephone:** (323) 563-5890  
**Website:**  
Http://www.cdrewu.edu/cosh/prog/UPHP

**Accreditation**

The Master of Public Health (MPH) in Urban Public Health program is accredited by the Council on Education in Public Health (CEPH).

**Program Overview**

Approximately half of the world’s population lives in densely populated urban settings and in the U.S., many of those living in urban settings come from underserved minority groups. For many of the underrepresented minorities living in these areas, the urban setting presents a unique context of particular social and environmental factors informing health disparities. An urban public health program focuses on how health disparities originate and propagate within these settings.

**Program Mission**

The mission of the Urban Public Health Program at Charles R. Drew University of Medicine and Science, College of Sciences and Health (COSH), is

“To improve the health of urban populations through graduate education of future public health practitioners, urban-relevant scholarship, and community service specifically targeting the determinants of health disparities in underserved communities.”

**Program Goals**

1. To provide an exemplary education to public health graduate students from racially/ethnically diverse communities, particularly those from underserved communities, for careers in underserved urban health settings.
2. To promote the participation of MPH students and MPH faculty in health disparities research in urban community health issues.

3. To promote the participation of MPH students and MPH faculty in community health services that address health disparities in urban underserved populations, and to support the development of a well-trained and professional public health workforce.

Program Values
1. Social justice, cultural diversity and the elimination of health disparities
2. Respect for all individuals and the communities in which they live.
3. Evidence-based practice: We value enhancing the curriculum through an active partnership between students, faculty and the community in identifying authentic public health issues where students are involved in assessing and solving problems for the promotion of public health practice.
4. Excellence: We strive for the highest standard of performance by continually monitoring, evaluating and reviewing the program’s goals, objectives and student learning outcomes.

Career Opportunities
Public health professionals have numerous career options within local, state, federal and non-governmental health agencies; academic institutions; research organizations; health services organizations, and community advocacy organizations. Students who choose to pursue graduate education and training in urban public health at CDU will be prepared to address a wide range of urban health problems prevalent among the various ethnic groups, such as violence, substance abuse, mental illness, obesity, HIV/AIDS and cardiovascular diseases, among others.

Program Objectives/Student Learning Outcomes (SLOs)/Competencies
Upon completion of the program, MPH graduates will be able to:
1. Apply core concepts of epidemiology to identify urban community health problems and ethnic/racial health disparities.
2. Apply statistical concepts to the interpretation of health-related data and literature.
3. Identify multi-level risk and protective factors influencing the health status of ethnically diverse urban populations.
4. Apply basic theories, methods and models from a range of social, scientific and behavioral disciplines that are used in public health practice and research.
5. Identify and appraise public health programs, policy and advocacy processes for improving the health status of urban underserved populations.
6. Propose and evaluate culturally appropriate public health programs, interventions and policies that are responsive to urban underserved communities’ needs.
7. Apply principles of leadership and management, including the mobilization of community partnerships, to administer urban public health programs and solve health problems.
8. Demonstrate effective written and verbal skills for public health practice.

Graduation Requirement
Successful completion of all MPH courses with a grade of 80% (B-) or better.

Curriculum
Currently, CDU’s MPH program is a cohort-based, five-semester, sequenced curriculum of 42 competency-based semester units of required courses. MPH classes are offered once a year, and are held in the evenings from 6-9 pm, three days a week (Tuesdays, Wednesdays and Thursdays). The program currently accepts full-time students only for fall semester matriculation.

The MPH curriculum is structured as follows:

Core MPH Courses
1. MPH 511 Principles of Epidemiology
2. MPH 512 Principles of Biostatistics
3. MPH 521 Environmental Determinants of Health
4. MPH 522 Social and Behavioral Theories in Public Health
5. MPH 523 Health Policy and Management

Urban Health Courses
6. MPH 502 Racial and Ethnic Disparities in Health
7. MPH 524 Community Organization in Urban Settings
8. MPH 527 Race, Culture and Public Health

Strategies for PH Improvement Courses
9. MPH 513 Program Planning and Evaluation
10. MPH 520 Public Health Biology
11. MPH 526 Health Education and Communication
12. MPH 581 Research Methods
Competency-Based Courses

13. MPH 590 Public Health Practicum (300 hours)
14. MPH 595 Culminating Experience (CE)

Residence Requirement: MPH students must complete a total of at least 36 units in residence.

Time to Degree
The MPH program is a 5 semester, 42 unit, cohort-based full-time program delivered exclusively in the evening (6-9pm), convenient for working adults. Students receive an MPH degree upon satisfactory (80% score or better) completion of a minimum of 42 semester-credit program as described above (or the latest amendment available from the Program Director and posted on the Program Bulletin Board). Students are admitted to the program in the fall semester under a full-time cohort model.

Requirements for Admission
Admission is a competitive process in which each student’s entire application is reviewed individually. In selecting students, the program carefully considers the applicant’s responses to questions about “why public health as a career,” and “why the Charles R. Drew program specifically,” particularly with respect to the program’s mission of improving the health of underserved populations in urban settings. The applicant’s previous academic record, i.e., Grade Point Average (GPA) and performance on the Graduate Record Exam (GRE), are used to identify the student’s potential in fulfilling the CDU mission.

All applicants to the Urban MPH program must satisfy the following minimum admission requirements.

1. University admissions application.
2. A non-refundable $75 application fee.
3. An earned baccalaureate (or higher) degree from a regionally accredited university.
4. Official academic transcripts from all previous colleges and/or universities attended. Transcripts will be considered official if forwarded directly to the University Admissions Office (do not send to the Department Chair) by the institutions attended or if hand-carried with official seal intact. All official documents become the University’s property. Failure to complete the application or to provide accurate and authentic documents may result in denial of admission.
5. Graduate Record Exam (GRE) taken within last five years of application date. Applicants holding a graduate degree with a graduate GPA of 3.0 or higher and/or applicants who can provide official GMAT or MCAT scores (taken within the last five years of the application date) may request waiver of the GRE requirement.
6. A personal essay describing the student’s motivations and reasoning for applying to the Urban Public Health program at CDU.
7. Three (3) recommendations using the recommendation forms found on the Application website, http://www.cdrewu.edu/Apply
8. Resume or Curriculum Vitae

Transfer Credit
Applicants may petition the transfer of MPH-relevant graduate coursework during the application process, or upon notification of acceptance into the program. Normally, the maximum number of units (Units) from other institutions that students will be able to transfer into the MPH Program is six (6) semester units. MPH courses taken at other institutions must be approved by the Program Director. Only units with a B grade or better will be transferable.

Admission Deadlines
See University Policies section of this Catalog for deadlines regarding Application for Admission and Financial Aid. Class sizes of approximately 15-20 students are admitted each fall semester. Applications for admissions are processed as they are received and applicants are encouraged to complete their application packets as soon as possible and not wait for the final deadline as the class may be filled.

Other Admissions Information
For all other admissions information including international applications, registration, appeal, tuition, financial aid and scholarship, refer to the criteria outlined in the University Policies section of this Catalog.

Course Descriptions
Currently approved courses are listed below. Students should check with the Urban Public Health Program Director to determine availability of additional courses that have been approved and added after the publication of this Catalog.

MPH 502 Racial and Ethnic Disparities in Health
This course offers an analysis and evaluation of various topics and issues on health disparities of underserved racial, ethnic or minority vulnerable populations as well as an analysis of research that describes, explains and examines variables influencing health disparities and intervention strategies to reduce these disparities.

Units: 3
**MPH 511 Principles of Epidemiology**
Principles of Epidemiology focuses on the study of the distribution and determinants of urban health issues through the use of vital statistics data. The course provides students with the necessary skills to investigate the epidemiology of diseases as well as to critique population-based studies in urban public health.

*Units: 3*

**MPH 512 Principles of Biostatistics**
Principles of Biostatistics introduces students to the statistical methods commonly used in public health research, including the appropriate uses and common misuses of health statistics. The course provides the students with the necessary skills to analyze interpret and critique urban public health research studies.

*Units: 3*

**MPH 513 Program Planning and Evaluation**
Program Planning and Evaluation builds on previously-learned skills of epidemiology, biostatistics, and social and behavioral theories in public health. The course provides students with the necessary skills to plan, design, implement and evaluate public health programs for improving health in urban settings.

*Units: 3*

**MPH 520 Public Health Biology**
This course addresses the basic biologic principles in the definition, monitoring and promoting health or preventing disease. It introduces population biology and the ecological principles underlying public health. The course focuses on specific diseases of viral, bacterial, and environmental origin. It uses specific examples of each type to develop the general principles that govern interactions among susceptible organisms and etiologic agents.

*Units: 3*

**MPH 521 Environmental Determinants of Health**
Urban environmental factors, including social, physical and chemical factors are examined as determinants of health, with a particular emphasis on urban communities and strategies for reducing or eliminating ambient, workplace, and residential environmental threats.

*Units: 3*

**MPH 522 Social and Behavioral Theories in Public Health**
This course reviews the social and behavioral theories influencing health-related behavior, and their application in public health programs. Students are provided the skills to apply, critique and recommend theoretically-based public health programs targeting various urban ethnic groups.

*Units: 3*

**MPH 523 Health Policy and Management**
This course examines the political, structural, economic, ethical, and legal framework in which U.S. public health organizations develop, administer, and evaluate PH programs, and the U.S. policy making processes that affect the health of populations.

*Units: 3*

**MPH 524 Community Organization in Urban Settings**
This course provides students with the knowledge and skills to empower underserved urban communities to address health disparities through community organization, capacity and coalition building, community-based participatory research, and transcultural communication.

*Units: 3*

**MPH 526 Health Education and Communication**
The course provides an overview of the development, design, and delivery process for public health education, communications and informatics. It is designed to familiarize students with the process of communicating public health information, goals, and objectives, and the application of both traditional and advanced communication technology into meaningful interventions.

*Units: 3*

**MPH 527 Race, Culture and Public Health**
Working towards “cultural competence,” this course discusses the historical and contemporary ways that race and culture have been measured and understood in public health research and practice. The course examines racial formation, medicalization, biological and cultural determinism, and ways that differences between racial/ethnic groups are central to managing health disparities.

*Units: 3*

**MPH 529 Independent Studies**
Independent studies are used to provide required curricular equivalent coursework when the student is unable to attend a regularly scheduled course, or when the course has to be repeated. The following letter suffixes apply (e.g., MPH 529A):

- A. Racial and Ethnic Health Disparities
- B. Principles of Epidemiology
- C. Environmental Determinants of Health
- D. Principles of Biostatistics
- E. Social and Behavioral Theories in PH
- F. Health Policy and Management
- G. Community Organization in Urban Settings
- H. Research Methods
- I. Program Planning and Evaluation
J. PH Biology
K. Health Education and Communication
L. Race, Culture and PH

Units: 3

**MPH 530 Public Health Seminar**
This course is designed to expose MPH graduate students to the breadth of public health via invited CDU faculty and guest lecturers. Guest lecturers discuss current research in salient public health issues through the lens of health disparities.

Units: 3

**MPH 581 Research Methods (3 hours/units)**
Fundamentals of research study design, methods and data collection are examined. The course introduces quantitative, qualitative and mixed method approaches to research, as well as ethical issues in conducting research.

Units: 3

**MPH 590 Urban Public Health Practicum**
The practicum is a hands-on course which transitions students from an academic to a practice mindset. It requires the completion of 300 hours (100 hours for each credit hour) in a variety of public/private urban health settings. Students start their practicum in the second fall semester after matriculation. The student, in collaboration with the work-site preceptor, identifies the public health skills from the five public health domains, which will be applied during the practicum experience and used for the student’s practicum-performance evaluation.

Units: 3

**MPH 595 Culminating Experience (CE)**
The CE course is offered in the last semester before graduation. Students choose from the following three (3) CE options that stem from research and practice involving a salient urban public health issue:

Units: 3

**MPH 595(a): Capstone Project**
The capstone project provides an opportunity to integrate technical and professional knowledge and management/leadership tools into a comprehensive and written report on prioritized urban public health issues from local and national perspectives. Working as an interdisciplinary team, students prioritize; recommend interventions and evaluation methods to an external decision-making body.

**MPH 595(b): Thesis**
Students apply methods of research to the study of urban public health issues culminating in a monograph embodying public health research. The monograph is formally presented in a public forum to a thesis committee, and must be potentially publishable or have public health impact.

**MPH 595(c): Grant Proposal**
Working independently or as a team, students submit a grant proposal addressing a salient urban public health issue including a needs assessment, goals and objectives of the proposed study, the methodology, implementation, evaluation, budget and timeline of the proposed program.

**MPH Academic Standards and Policies**
CDU’s MPH program is a five-semester cohort-based program of required courses, currently accepting only full-time students for fall semester matriculation. MPH classes are offered only once a year, and are held in the evenings from 6-9 pm, three days a week. Accordingly, a student who fails to successfully complete an MPH course, i.e. passing the course with a letter grade of “B-” (80%) or better, will have to repeat the course in the following year when the course is offered again, and will not be able to register for the second year course being offered on the same evening, thus delaying the student’s graduation date.

If a student fails to successfully complete two MPH courses within an academic year, he/she will be put on probation. A student on probation will be required to repeat and successfully complete the courses the following year when the courses are offered again, and accordingly, will not be able to register for the second year courses being offered on the same evening, thus delaying the student’s graduation date. Probation will be lifted when the student successfully completes the repeated courses. A student on probation who fails another MPH course will be administratively dropped from the program, but will be given the option to re-apply to the program the following academic year.

Probation may be considered by the MPH program for the following reasons, but is not limited to:

- Failure to successfully complete two MPH courses with a letter grade of “B-” (80%).
- Record of excessive absences (three or more absences in one class) and/or tardiness.
- Unsatisfactory removal of two “Incomplete” grades.
- The student is in violation of the program, college or university’s behavioral or professional standards.
– The student fails to meet the MPH program’s “Ethical Guidelines” (see Appendix A in the MPH student handbook).
– Failure to comply with any MPH program policies or regulations.

The MPH program probation is determined to be continuous until the MPH student is either in a good academic standing and/or has met the behavioral standards of the program. The student will be notified in writing of his/her probationary status. The minimum standard(s) required to remove this probationary status will be stated in the notice of probation to the student.

**Termination from the MPH Program**

MPH faculty have the responsibility to prepare students to function as competent and ethical public health professionals. In this regard, the MPH faculty also have the obligation to terminate a student from the program at any time prior to completion of his/her program when the student fails to maintain minimum expected quality academic and professional standards in the classroom or in the field practicum.

Upon review by the MPH faculty, a student may be terminated from the MPH program if one or more of the following occurs:

- Failure to successfully complete two MPH courses with a letter grade of “B-” (80%);
- Earns below the minimum 3.0 cumulative grade point average (GPA) at the end of two consecutive grading periods;
- Demonstrates inappropriate or disrespectful conduct toward faculty, staff and/or student peers; or
- Fails to demonstrate ethical conduct.

Any MPH faculty member may request an MPH faculty committee review of a student at any other time if circumstances warrant such a review. The request for special review must be in writing to the Program Director. The Program Director must approve the request before the review is scheduled. The MPH faculty review committee will consist of a minimum of three MPH or COSH faculty members, and is subject to approval by the Program Director.

Students will be notified, in writing, of termination following a graduate faculty vote to dismiss.

**Petition for Reinstatement**

Upon receipt of a termination notice, a student who believes there are extenuating circumstances that led to the noted deficiencies may submit a written request for reinstatement into the program. Requests must be made within ten (10) working days after receipt of the program’s notice of termination. Once the program receives a reinstatement request, the following process will occur:

1. The student shall submit a written petition explaining the extenuating circumstances leading to the notice of termination;
2. The Program Director will constitute a Reinstatement Review Committee consisting of three (3) MPH faculty. The Reinstatement Committee will meet within five (5) working days following receipt of the student’s written petition;
3. The committee shall deliberate in private and transmit its recommendations to the Program Director within five (5) working days following the reinstatement meeting;
4. The program Director shall consider the Reinstatement Review Committee’s recommendation and provide written notification to the student and the committee of his/her decision within three (3) working days of receipt of the committee’s recommendation.

Students who are reinstated, as a result of their appeal, but who subsequently violate the above policies are automatically and permanently terminated from the program without an additional opportunity to request reinstatement.

**Graduate Certificate in Public Health Concepts**

The Urban Public Health Program at the College of Science and Health offers a “Training Certificate in Public Health Concepts” to health professionals and individuals with an earned Bachelor degree who wish to increase their expertise and competency in core public health concepts and/or who wish to move into career positions in public health. The program is designed for individuals who work in public health and seek additional formal training, healthcare professionals who seek knowledge and skills in the core public health disciplines but may not wish to pursue the complete Master in Public Health (MPH) curriculum, or future MPH students interested in applying these courses toward their MPH degree at Charles R. Drew University (CDU).

The Training Certificate in Public Health Concepts is a two (2)-semester curriculum of required courses which must be completed within four (4) years of matriculation.
to the certificate program. The graduate classes are offered only once a year, and are held in the evenings from 6-9 pm.

Objectives/Competencies for the Training Certificate in Public Health Concepts
Upon completion of the Training Certificate in Public Health Concepts, students will be able to:

1. Apply basic concepts of epidemiology to the study of the patterns of disease and injury applied to public health;
2. Describe appropriate statistical methods for critical reading of reports of statistical analysis of public health problems;
3. Identify the role of social, behavioral and cultural factors associated with population health.
4. Determine the role of environmental factors affecting the health of a population;
5. Identify the managerial and policy issues associated with the delivery, quality and costs of health care.

Requirements for Admission
All applicants to the “Training Certificate in Public Health Concepts” must satisfy the following minimum admission requirements.

2. An earned baccalaureate (or higher) degree from an accredited university, with a minimum GPA of 3.0.
3. Official academic transcripts from all previous colleges and/or universities attended. Transcripts will be considered official if forwarded directly to the University Admissions by the institutions attended or if hand-carried with official seal intact (do not send to the Department Chair). All official documents become the University’s property. Failure to complete the application or to provide accurate and authentic documents may result in denial of admission.
4. A personal essay describing the student’s motivations and reasoning for applying to the “Training Certificate in Public Health Concepts” at CDU.
5. Three (3) letters of recommendation using the recommendation forms found on the Application website, http://www.cdrewu.edu/Apply
6. A non-refundable $75 application fee.
7. Resume or Curriculum Vitae

Admission Deadlines
See University Policies section of this Catalog for deadlines regarding Application for Admission and Financial Aid. Class sizes of approximately 15-20 students are admitted each fall semester. Applications for admissions are processed as they are received and applicants are encouraged to complete their application packets as soon as possible and not wait for the final deadline as the class may be filled.

Course Descriptions
MPH 511 Principles of Epidemiology
Principles of Epidemiology focuses on the study of the distribution and determinants of urban health issues through the use of vital statistics data. The course provides students with the necessary skills to investigate the epidemiology of diseases as well as to critique population-based studies in urban public health.
Units: 3

MPH 512 Principles of Biostatistics
Principles of Biostatistics introduces students to the statistical methods commonly used in public health research, including the appropriate uses and common misuses of health statistics. The course provides the students with the necessary skills to analyze interpret and critique urban public health research studies
Units: 3

MPH 521 Environmental Determinants of Health
Urban environmental factors, including social, physical and chemical factors are examined as determinants of health, with a particular emphasis on urban communities and strategies for reducing or eliminating ambient, workplace, and residential environmental threats.
Units: 3

MPH 522 Social and Behavioral Theories in Public Health
This course reviews the social and behavioral theories influencing health-related behavior, and their application in public health programs. Students are provided the skills to apply, critique and recommend theoretically-based public health programs targeting various urban ethnic groups
Units: 3

MPH 523 Health Policy and Management
This course examines the political, structural, economic, ethical, and legal framework in which U.S. public health organizations develop, administer, and evaluate PH programs, and the U.S. policy making processes that affect the health of populations.
Units: 3
Academic Standards and Policies

The Training Certificate in Public Health Concepts is a two-semester program of MPH required courses, currently accepting students for fall semester matriculation. Currently, MPH classes are offered only once a year, and are held in the evenings from 6-9 pm. Accordingly, a student who fails to successfully complete an MPH course i.e., passing the course with a letter grade of “B-“ (80%) or better, will have to repeat the course in the following year when the course is offered again, thus delaying the student’s graduation date.

If a student fails to successfully complete two MPH courses within an academic year, he/she will be put on probation. A student on probation will be required to repeat and successfully complete the failed courses the following year when the courses are offered again. Probation will be lifted when the student successfully completes the repeated courses. A student on probation who fails another MPH course will be administratively dropped from the program, but will be given the option to re-apply to the program the following academic year. Probation may be considered by the MPH program administration, but is not limited to, for the following reasons:

- Failure to successfully complete two MPH courses with a letter grade of “B-“ (80%).
- Record of excessive absences and/or tardiness (three or more of either, in one class).
- Unsatisfactory removal of two “Incomplete” grades.
- The student is in violation of the program, college or university’s behavioral or professional standards.
- The student fails to meet the MPH program’s “Ethical Guidelines” (see Appendix A in the MPH student handbook).
- Failure to comply with any MPH program policies or regulations.

The MPH program probation is determined to be continuous until the MPH student is either in a good academic standing and/or has met the behavioral standards of the program. The student will be notified in writing of their probationary status. The minimum standard(s) required to remove this probationary status will be stated in the notice of probation to the student.

Termination from the Certificate Program

MPH faculty has the responsibility to prepare students to function as competent and ethical public health professionals. In this regard, the MPH faculty also have the obligation to terminate a student from the program at any time prior to completion of his/her program of study when the student fails to maintain minimum expected quality academic and professional standards in the classroom, the university, or the field.

Upon review by the MPH faculty a student may be terminated from the MPH program if one or more of the following occurs:

- Does not successfully complete two MPH courses;
- Earns below the minimum 3.0 cumulative grade point average (GPA) at the end of two consecutive grading periods;
- Demonstrates inappropriate or disrespectful conduct toward faculty, staff, and/or student peers;
- Fails to demonstrate ethical conduct.

Any MPH faculty member may request an MPH faculty committee review of a student at any other time if circumstances warrant such a review. The request for special review must be in writing to the UPH Program Director. The UPH Program Director must approve the request before the review is scheduled. The MPH faculty review committee will consist of a minimum of three MPH or COSH faculty members, and is subject to approval by the UPH Program Director.

Students will be notified, in writing, of termination following a graduate faculty vote to dismiss.

Petition for Reinstatement

Upon receipt of a termination notice, a student who believes there are extenuating circumstances that led to the noted deficiencies may submit a written request for reinstatement into the program. Requests must be made within ten (10) working days after receipt of the program’s notice of termination. Once the program receives a reinstatement request, the following process will occur:

1. The student shall submit a written petition explaining the extenuating circumstances leading to the notice of termination;
2. The Urban Public Health Program Director will constitute a Reinstatement Review Committee consisting of three (3) MPH faculty. The Reinstatement Committee will meet within five (5) working days following receipt of the student’s written petition;
3. The committee shall deliberate in private and transmit its recommendations to the Program Director within five (5) working days following the reinstatement meeting;
4. The Program Director shall consider the Reinstatement Review Committee’s recommendation and provide written notification to the student and the committee of his/her decision within three (3) working days of receipt of the committee’s recommendation.

Students who are reinstated, as a result of their appeal, but who subsequently violate the above policies are automatically and permanently terminated from the program without an additional opportunity to request reinstatement.

**Physician Assistant Program**  
**Master of Health Science**

**Program Director:** Katayoun Moini MHS, PA-C, RD, CNSC  
**Location:** W.M. Keck Building

**Accreditation Information**  
Charles R. Drew University is in the process of developing a Master of Health Science in Physician Assistant Studies program. The Charles R. Drew Physician Assistant Program has applied for Accreditation-Provisional from the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA). The Charles R. Drew University PA Program anticipates matriculating its inaugural class in August 2016 pending achieving Accreditation-Provisional status at the March 2016 ARC-PA meeting. Accreditation-Provisional is an accreditation status for a new PA program that, at the time of its initial accreditation review, demonstrated its preparedness to initiate a program in accordance with the accreditation Standards. In the event the program is not granted provisional accreditation, a full refund of the program seat deposit will be issued to applicants offered admission in August 2016. The CASPA application fee is non-refundable. Approvals must be obtained from the ARC-PA and the regional accreditation agency of CDU, the WASC Senior College and University Commission, before any student matriculation into the PA Program.

**Description**  
The Physician Assistant program is a 27-month program beginning in August of each year and leads to a Master of Health Science (MHS) degree. The PA Program is a full-time on campus program.

The PA Program will recruit students who believe in the importance of sharing medical knowledge to benefit the global community, and will provide students with the skills necessary to become exemplary medical providers. Students will learn and acquire clinical skills in a variety of healthcare settings and will obtain experience in disease management, disease prevention and health promotion. A strong emphasis on medical nutrition therapy in the curriculum will prepare students to address the complex nutritional needs of patients, a vital component of disease prevention and management. Students will have the opportunity to practice physical diagnosis, history taking skills and work with standardized patients in the Clinical Skills and Simulation Center. Students will share the campus and have the opportunity to collaborate with members of the medical, nursing and public health disciplines.

For more detailed information please visit the PA program website at [www.cdrewu.edu/cosh/PA](http://www.cdrewu.edu/cosh/PA)

**Mission**  
The mission of the Charles R. Drew University Physician Assistant program is to support the University Mission and College of Science and Health Mission by preparing a diverse group of uniquely qualified physician assistants who provide excellent medical care with compassion while addressing health disparities, seeking social justice and improving the health of medically underserved communities.

**Goals**  
The goals of the CDU PA program are designed to prepare a diverse group of highly qualified, compassionate physician assistants, who distinguish themselves through providing excellence in patient-care as members of the healthcare team.

The goals of the Charles R. Drew University PA program are to:

1. Prepare student with the knowledge and interpersonal communication skills necessary to practice with professionalism, compassion, and a commitment to patient advocacy within the healthcare system and community.  
2. Prepare students to be providers of culturally competent care for diverse and underserved populations, committed to the reduction of healthcare disparities.  
3. Train graduates that apply the concepts of preventative and therapeutic medical nutrition therapy to the comprehensive care of patients.  
4. Prepare students to be practitioners of evidence-based medicine, able to meet the growing need for primary care providers in a variety of medical settings.
5. Provide students with a learning environment that is student-centered, engaging and innovative in its teaching approach, training students to be life-long self-directed learners.

Admissions Policy

Purpose: To select applicants with attributes congruent with the university and Physician Assistant Program Mission and Goals. The PA Program will strive to select candidates desiring to improve the health of medically underserved communities; candidates with backgrounds diverse in both education and experience; candidates with strong interpersonal skills, professionalism and cultural competence; candidates willing and eager to collaborate with a variety of health care professionals; candidates with personal ethics, integrity, creativity, empathy, critical thinking skills and the desire to advocate for patients and the community.

Definition: The Charles R. Drew University Physician Assistant Program in committed to the principles of equal opportunity in education. In accordance with the Charles R. Drew University equal opportunity policy, the Physician Assistance Program makes admission decisions on the basis of merit. University policy prohibits unlawful discrimination based on race, religion, color, sex, sexual orientation, actual or perceived gender identity, national origin or ancestry, genetic information, medical condition (cancer or HIV/AIDS-related), handicap, disability, association with an individual in a protected category or any other consideration made unlawful by federal, state or local laws. All students are expected to work professionally and positively with persons of all backgrounds, cultures, races, ages and genders.

There are no specific policies or practices that favor specific groups of applicants. Each application is reviewed and the merits are considered individually. We do not accept previous experience or medical training for advanced placement in the Physician Assistant program. All students are expected to complete all didactic and clinical elements of the training.

To be considered for an interview candidates must at a minimum possess the following:

1. ALL prerequisites MUST either be met or in progress:
   a. Baccalaureate degree
   b. Transcripts: regionally accredited institution or evidence of a U.S. equivalent baccalaureate degree based on foreign credential evaluation (from approved organizations).
   c. The Test of English as a Foreign Language (TOEFL): if applicable
   d. Completion deadline: all prerequisites must be completed prior to May 30th of the application year.
   e. General Biology with lab (8 units): Mammalian or human biology.
   f. Microbiology with lab (4 units)
   g. Human Anatomy with lab (4 units)
   h. Human Physiology with lab (4 units)
   i. Combined Human Anatomy and Physiology: acceptable in place of separate Anatomy and Physiology course but must include lab and equal a total of 8 units
   j. General Chemistry with lab (8 units)
   k. Introduction to Statistics or Biostatistics (3 units)
   l. College Algebra or higher (3 units)
   m. English Composition (6 units)
   n. Behavioral Sciences(Psychology, Sociology, Anthropology) (6 units)
   o. Medical terminology (3 units)

2. Statement Letter/Essay must be submitted through CASPA
3. References must be submitted through CASPA. Must have three or application is incomplete.
4. Completion of the Centralized Application Service for Physician Assistants (CASPA) application by the designation deadline.

As with most PA programs, The Charles R. Drew University PA Program is competitive, and applicants are expected to present a strong academic record, diverse direct patient care experience, and an intelligent statement letter.

Competitive candidates are preferred to possess the following:

- Cumulative & Science GPA of 3.00
- Prerequisite GPA of 3.00
- Direct Patient Care (DPC) Experience of 2,000 hours
- Basic or Advanced Nutrition (3 units)
- Organic or Biochemistry: upper level chemistry courses with lab are preferred and count toward total general chemistry requirement of 8 units
- Spanish (3 units)
- No more than 2 prerequisites pending at time of application
- Academic prerequisites completion timeline: completion of all courses within 7 years preceding application to the program.

COSH Governance

The COSH Faculty Association serves as the official
voice of the Faculty of the College of Science and Health.

1. **Executive Committee**: Monitors standing committees and establishes ad hoc committees as necessary to carry out the purposes and responsibilities of the Faculty Association.

2. **Faculty Affairs Committee-A (Appointment & Promotions Committee)**: Takes action on recommendations of faculty appointments and promotions to the Dean of the College based on documentation.

3. **Education & Academic Policy Committee**: Has primary responsibility for formulating and recommending educational policy in all matters of concern to the College of Science and Health, including the implementation of such policy.

4. **Faculty Affairs Committee- B (Faculty Concerns & Grievance Committee)**: Monitors and reviews matters concerning academic freedom, Faculty conduct, recruitment and retention, educational leave, sabbaticals, vacation, (and other leaves), compensation and benefits, and delineates and resolves disputes which are identified as grievances relating to faculty rights, responsibilities, or related matters.

5. **Faculty Constitution & By-Laws Committee**: Maintains current faculty constitution through the review of issues of academic governance and relevant policies and procedures of University and College.

6. **Research Committee**: Supports and encourages the development and implementation of research in the College of Science and Health.

7. **Student Academic Performance, Promotion, & Judiciary Committee**: Develops and recommends criteria for the promotion, dismissal, and graduation of the College's students, and exercises original jurisdiction over all situations of discipline involving students enrolled in the College.

Keosha R. Partlow, PhD, MPH, Adjunct Assistant Professor
History of the College of Medicine

Initially known as the Charles R. Drew Postgraduate Medical School, the university was incorporated in the State of California in August 1966 as a private, nonprofit, educational institution. Mitchell Spellman, M.D., PhD was selected as the founding Executive Dean in 1968 and M. Alfred Haynes, M.D., MPH was appointed the first department chairman of the Community and Preventive Medicine Department. The school signed an affiliation agreement with the County of Los Angeles in 1971 and the first annual contract between the school and the county Department of Health Services was formalized. The relationship between the two entities became operational. When the Martin Luther King Jr. General Hospital opened in 1972, responsibility for direction of the hospital's medical services was assigned to the Charles R. Drew University's Department Chairmen, each of whom was designated chief of the hospital's corresponding clinical service. At that time, employees of the Charles R. Drew Postgraduate Medical School numbered a mere 109 people; 29 of these full-time faculty and nine were Department Chairman.

In 1973, the school issued a three-volume “Master Plan Study” which provided the blueprint for the development the Charles R. Drew University over the next decade. The report focused on the creation of an infrastructure that would facilitate the physical growth of the campus as well as the creation of programs. These programs would emphasize community collaboration and seek to improve the health of residents in the neighboring Watts and Willowbrook communities.

In 1978, the Charles R. Drew University Post Graduate Medical School entered into an affiliation agreement with the University of California, Los Angeles, to develop a program for undergraduate medical education leading to conferment of the M.D. degree. Since its first students entered the program in the Fall of 1981, the program has graduated more than 550 students.

The W. Montague Cobb Building is home to the College of Medicine.

A Message from the Dean

Welcome to the College of Medicine at Charles R. Drew University of Medicine and Science.

The CDU/UCLA Medical Education program is our partnership program with the David Geffen School of Medicine at UCLA, dedicated to training students who will become physician leaders in the care of underserved and diverse populations. Each year, 28 students, including four in the CDU/UCLA PRIME program, are selected based on their academic performance and demonstrated commitment to the CDU mission, vision and values. The program began in 1981 and has graduated over 550 medical students. Our medical education program graduates continue their residency training in the best programs in the region, state and nation. They have become leaders in clinical care in all areas of medicine including research, academics and health care administration.

In these Catalog pages you can read about our medical education program, the medical student thesis program and the mission-based clinical opportunities available to medical students in community settings throughout Los Angeles. I encourage you to visit our website, read our brochures and speak with our faculty and students about all of the wonderful opportunities available for our medical students.

Daphne Calmes, M.D.
Interim Dean, College of Medicine
The College of Medicine
Faculty of the Charles R. Drew University College of Medicine perform an enormous scope of work to fulfill the College's mission of education, patient care, research, and service in improving healthcare in underserved communities.

The College's faculty are responsible for the CDU/UCLA Medical Education Program. College of Medicine faculty also conduct programs in Continuing Medical Education (CME) for faculty and community physicians. The Charles R. Drew University is one of only a select group requiring medical students to complete a research thesis for graduation supervised by faculty research mentors.

Faculty supervise community-based programs affiliated with Charles R. Drew University. These affiliated programs are central to the University's teaching mission. The community-based programs serve as clinical teaching sites, community service hubs, and demonstration projects for testing innovative methods of healthcare delivery, clinical care, and health services research.

The College of Medicine faculty is also responsible for teaching an array of pre-collegiate programs that make up the Charles R. Drew University Extended Science Pipeline Programs. Individual programs in which College faculty are involved include: the Saturday Science Academy, the Post Baccalaureate Program, the Lincoln Drew Elementary Magnet School, and the King/Drew Medical Magnet High School. The pipeline concept has been endorsed by the American Association of Medical Colleges and various national commissions as a method for encouraging underrepresented populations to pursue higher education and careers in healthcare.

Office of Medical Student Affairs and Curriculum
The Office of Medical Student Affairs and Curriculum provides academic, matriculation and personal support services to students in the CDU/UCLA Medical Education Program. These services include: academic counseling and scheduling, information regarding graduation and licensure requirements, and assistance and referrals for academic and personal needs. The office is also responsible for the administration of student admission and support services, in coordination with the DGSOM at UCLA Student Affairs Office.

General information about the Medical Education Program and Student Services can be obtained from the Office of Medical Student Affairs.

The associate dean for medical student affairs and the staff provide an environment in which the academic and personal needs of students are met on a daily basis. Matters of serious concern may be brought to their attention with assurance of strict confidentiality.

The office is open Monday-Friday, 8:00 a.m. to 5:00 p.m.

Financial Aid Office  (310) 794-1629

Academic Programs

CDU/UCLA Medical Education Program
The CDU/UCLA Medical Education Program was initiated in 1978, by joint approval of the Regents of the University of California and the Board of Directors of Charles R. Drew University of Medicine and Science, (known then as the Charles R. Drew Postgraduate Medical School). The charter class entered in August 1981 as candidates for the M.D. degree.

The Medical Education Program is especially designed to attract students who have an interest in addressing the concerns of underserved populations and who are prepared to do so with competence and compassion. Undergraduate medical students accepted into this program benefit from the best efforts of both the Charles R. Drew University the David Geffen School of Medicine at UCLA in a combined curriculum.

The Prematriculation Program
During the summer preceding the first year of study, students entering the Medical Education Program are required to attend a one-week pre-matriculation
The purpose of the program is to orient students to the medical education curriculum, Charles R. Drew University and the surrounding community. The program emphasizes the development of specific learning skills such as critical thinking, problem solving, and study group interaction which are needed for successful completion of the CDU/UCLA Medical Education Program.

**First and Second Years**

The first and second years of study are conducted chiefly at the David Geffen School of Medicine at UCLA.

The block-based curriculum for years one and two integrates normal human biology with disease processes and clinical skills. Instruction is accomplished through lectures and in small group discussions, laboratories and conferences.

Progress is evaluated on a pass/fail basis.

**First Year (David Geffen School of Medicine, UCLA)**

The following courses are taught in sequential order:

1. **Block 1: Human Biology and Disease 401 Foundations of Medicine 1** (8 weeks)
   Pathologic processes, genetics, molecular and cellular biology, basic immunology, and critical appraisal.

2. **Block 2: Cardiovascular, Renal, & Respiratory Medicine I** (8 weeks)
   Anatomy, histopathology, physiology, biochemistry, genetics, imaging, and selected pathophysiologic mechanisms of these organ systems along with the clinical assessment of these organ systems.

3. **Block 3: Gastrointestinal, Endocrine, & Reproductive Medicine I** (8 weeks)
   Anatomy, histopathology, biochemistry, nutrition, genetics, and selected pathophysiologic mechanisms of these organ systems along with the clinical assessment of these organ systems.

4. **Block 4: Musculoskeletal Medicine** (5 weeks)
   Anatomy, imaging, histopathology, pathophysiology and pharmacology related to this system with a focus on rheumatology and physical medicine.

5. **Block 5: Medical Neurosciences I** (5 weeks)
   Neuroanatomy, histopathology, neurobiology, neurology, imaging, pharmacology, pathophysiology, and clinical assessment of the neurological systems.

A preceptor program is offered in which a faculty or house officer preceptor introduces the student to patient care on the wards and/or in the physician's practice site.

**Second Year (David Geffen School of Medicine at UCLA)**

The courses of the second-year curriculum include foundations in pharmacology, microbiology, infectious diseases, cancer, and hematology; advanced topics in gastrointestinal medicine, nutrition, and reproduction; and advanced topics in cardiovascular, renal, and respiratory medicine.

- **Block 6: Foundations of Medicine II** (8 weeks)
  Basic pharmacology, microbes, host defense and immunity, immune disorders, clinical trials & epidemiology, infectious diseases, including classification of pathogens & therapeutics, cancer-including classification, causes & therapeutics of other blood disorders.

- **Block 7: Gastrointestinal, Endocrine, & Reproductive Medicine II** (8 weeks)
  Endocrinology; reproductive health & disease; GI diseases; gender-specific diseases; skin diseases; common infectious diseases, therapeutics; and prevention, including nutrition.

- **Block 8: Medical Neurosciences II** (5 weeks)
  Neuroanatomy, neurobiology, psychopathology, neurology, and psychopharmacology.

- **Block 9: Cardiovascular, Renal & Respiratory Medicine II** (8 weeks)
  Pathology & pathophysiology of these systems; including hypertension, developmental disorders; therapeutics-pharmaceuticals and other treatments; clinical trials & epidemiology; prevention; common infectious agents.

Assessment Week (1 week)

One-week block of assessment concludes the second year to prepare for the USMLE and clerkships.

**Third Year (Charles R. Drew University)**
The third year consists of 49 weeks of required clerkships; one week of Clinical Foundations and 48 weeks of clinical clerkships. All third year coursework must be completed before a student is allowed to take senior and elective courses. It is in the third year that most students decide their specialty.

**Third Year Core Clerkships**
All required clerkships are taken at Charles R. Drew University and the David Geffen School of Medicine at UCLA affiliates.

**Total Required Weeks**
49 weeks

**Unscheduled Time**

- Winter Break
  - 2 weeks
- Spring Break
  - 2 weeks

**Learning Objectives for Required Clerkships**
Upon completion of the required clerkships, it is expected that the student will be able to demonstrate:

1. The ability to take an accurate, focused patient history, including psychosocial and family issues;
2. The ability to perform a complete or focused physical and psychiatric examination;
3. The ability to give a complete, accurate, and organized case presentation;
4. The ability to keep a complete, accurate, organized medical record;
5. Knowledge of common acute and chronic problems across age and gender;
6. A basic knowledge of gender and age-specific preventive health measures;
7. Interpersonal skills that enable the development of patient rapport;
8. The ability to use evidence-based medicine to solve clinical problems;
9. Knowledge of appropriate use of imaging modalities, including conventional radiography, ultrasound, CT, or MR imaging;
10. The ability to formulate a patient-centered management plan that incorporates the principles of prevention and health education;
11. Knowledge of, and sensitivity to, cultural and socioeconomic issues that impact patient care;
12. Knowledge and skills needed to provide cost effective and appropriate care;
13. Skills in life-long learning, including the ability to search computerized medical databases;
14. The ability to utilize other members of the health care team, including consultant physicians, nurse practitioners, nutritionists, and mental health professionals.

These learning objectives have been compiled by the Educational Policy and Curriculum Committee (EPCC) in an effort to inform students of the expectations of their performance on clinical clerkships. The objectives apply to all the required third year clerkships.

Students can access detailed descriptions of required clerkships in the *Handbook of Courses for Third Year Students* published by the UCLA David Geffen School of Medicine at UCLA Student Affairs Office or at: [http://www.medstudent.ucla.edu](http://www.medstudent.ucla.edu). Students may also access course information on Angel, the online curriculum resource at the following URL: [http://www.medsch.ucla.edu/angel](http://www.medsch.ucla.edu/angel).

**Fourth Year: Urban/Underserved College (Charles R. Drew University)**

Curricular revision at the David Geffen School of Medicine at UCLA has resulted in the development of smaller focused entities known as "Colleges" to enhance career advising and mentoring in addition to other defined activities. The fourth year of the CDU/UCLA Medical Education Program at Charles R. Drew University is known as the **Urban/Underserved College**.

- One week of College Foundations and thirty (30) weeks of coursework are required for the fourth year. Of these, twelve weeks must be sub-internships (300 and 400 level) and three weeks must be an ICU elective.
• 3 week, 400-level subinternship

The remaining 18 weeks may be spent in approved electives at any level. However, no more than 6 weeks may be spent in research or non-clinical electives. Up to 12 elective weeks may be arranged at other community medical centers and hospitals, also known as “away electives”. Information on elective courses offered both at Charles R. Drew University and UCLA is available from the Handbook of Courses for Fourth Year Medical Students published by the David Geffen School of Medicine at UCLA Student Affairs Office or at [http://www.medstudent.ucla.edu](http://www.medstudent.ucla.edu).

**Elective Clerkships**

The goal of the Elective Program is to broaden the medical education experience of the student. The fourth year provides the opportunity to investigate personal interests as well as gain exposure to subjects that students may not have the time to experience after medical school. Elective clerkships may only be taken once the third year core clerkships are successfully completed. The maximum duration of an elective course for which a student may receive credit is four weeks.

Electives are of three types: in-depth non-clinical electives, advanced clinical clerkships and sub-internship or sub-internship/inpatient courses. Below are descriptions of the three types of electives. For more information, please refer to the Handbook of Courses for Fourth Year Medical Students.

In-Depth Non-Clinical Electives explore the basic sciences as well as the clinical aspects of an organ system and its disease states; or focus on a particular field of study.

In-Depth Non Clinical Electives do not count toward California licensing. No more than six weeks (6) of In-Depth Non Clinical Electives and Research Electives combined will be granted toward the 30 weeks of required course work for the fourth year.

Advanced Clinical Clerkships Electives (200 level) enable students to utilize and build on the fundamental information and skills acquired during required rotations from the third year. Courses are structured to increase students’ depth of insight into complex medical problems and to stress development of intellectual and decision-making processes.

Sub Internship Electives (300 & 400 levels) are inpatient, emergency or outpatient clerkships that give students increased responsibility for decisions made for the total care of the patient. In general, the student will be expected to function at a first-year resident level.

**Research Electives**

In addition to clinical clerkships, research electives are also available and may be developed with mentors to meet special interests. Research sabbaticals may be arranged to accommodate a year of study at UCLA, an affiliated hospital, the National Institutes of Health, or any other appropriate institution. Fellowship and research opportunity information is available from the Office of Medical Student Affairs.

**Medical Student Research Thesis Program (Longitudinal Experience)**

All students in the CDU/UCLA Medical Education Program are required to complete a research project and research thesis. The goal of the research project/thesis is to address medical conditions commonly encountered in primary care practice. Students develop, design and implement a research project during their two-year longitudinal research experience.

**Longitudinal Clerkships**

Primary Care, PC011 (Third Year)
Primary Care, PC02 (Fourth Year)
Radiology (integrated in all rotations throughout the third year)

**Scheduling**

Students are responsible for scheduling their courses. Each student is provided with a scheduling packet containing samples of forms and an outline of requirements.

Scheduling meetings are held by the DGSOM at UCLA Student Affairs Office and the Charles R. Drew University Office of Medical Student Affairs. The meetings outline the clerkship scheduling process. An introduction to the National Residents Matching Program is also provided at these meetings.

**Scheduling Fourth Year Electives**

The access of CDU/UCLA Medical Education Program students to electives published in the Handbook of...
Courses for Fourth Year Medical Students is equal to that of UCLA students, subject to a computerized lottery system.

To participate in non-UCLA system electives, students must ensure that all necessary forms are routed to the appropriate persons, e.g., course chair, faculty advisor, and Associate Dean of Student Affairs. These forms include the outside institution's own forms, as well as special “away elective” forms. In order for the Associate Dean of Student Affairs to accurately complete the paperwork, it will be necessary to provide documentation of an active personal health insurance plan and evidence of Rubella status (a record of immunization or result of a screening test). Upon receipt of all paperwork, the Office of Medical Student Affairs will complete the forms, retaining for the student's file the documentation of personal health insurance, rubella immune status, and other relevant information; and will then forward the completed application to the institution at which the elective will be taken.

An elective is not considered to be approved until all required signatures have been obtained.

Prior to starting the senior year, students are to complete an elective scheduling form outlining their proposed schedule. Each student is to discuss the schedule with the Associate Dean of Student Affairs.

Changes to a student's elective clerkship schedule may be accomplished by completing an add/drop form with the Charles R. Drew University Office of Medical Student Affairs. An appropriately completed and signed add/drop form must be provided to the Associate Dean of Student Affairs at least 30 days before the requested date of the addition or deletion of a course from a student's program.

Grading System
The CDU/UCLA Medical Education Program currently has a strict pass/fail grading system for all four years.

Evaluations
There are three categories of evaluations: Student Evaluation of Clerkships and Faculty; Faculty and Resident Evaluations of Students; and Clerkship Director's Summative Evaluation and Grading.

Student Evaluation of Clerkships and Faculty
Medical students are responsible for providing evaluation as requested through the standardized evaluation system, “CoursEval”. The data collected is used in the aggregate to evaluate courses, curricula, and faculty, and the data is reported back to Clerkship Directors for use in improving teaching and rotations.

The time and tools are provided to the student for critiquing the instructional program, and it is incumbent on the student to provide the information for assessment. Constructive criticisms as well as positive recognition will be appreciated and the anonymity of the student is protected. The URL for the web-based program is http://evaluation.medsch.ucla.edu/. Students complete evaluation forms online upon completion of a given clerkship.

At the close of a clerkship, each student will receive an email reminder that he/she is required to complete the clerkship evaluation. Results of each clerkship rotation evaluation will be available to clerkship directors after they have completed and submitted the students' grades. The individual faculty evaluations will be given to the clerkship directors twice a year. This is done in order to protect the anonymity of the students.

The clerkship directors are responsible for providing feedback to faculty on the clerkship and on their individual evaluations. Students who do not complete the evaluations in a timely manner will receive reminders.

Students who are delinquent in completing their clerkship and faculty evaluations will be referred to the Office of Medical Student Affairs. Further penalty for not completing the evaluations will be determined by the Associate Dean for Medical Student Affairs.

Faculty and Resident Evaluation of Medical Students
Attending faculty, house staff, and fellows who have worked with medical students for one or more weeks must complete their evaluation of each student supervised and forward the completed evaluation form (via web-based system) to the appropriate Student Clerkship Coordinator. The Clerkship Director will use the comments to produce the Summative Evaluation and Grade Report.

Clerkship Director's Summative Evaluation and Grading of Medical Students
Clerkship Directors are responsible for providing students with meaningful, written descriptions evaluating performance in the clerkship. All clerkship directors prepare and submit narrative descriptions for all students.

A web-based evaluation program has been implemented. A login and password is assigned to clerkship directors and their coordinators by the UCLA Student Affairs Office upon completion of training on the system.
All performance evaluations must be submitted to the web-based system within six weeks of the conclusion of the clerkship. Evaluations may be reviewed via the web or in the OMSA.

Graduation Requirements
To be awarded the M.D. degree from the CDU/UCLA Medical Education program, the following are required:

- Successful passage of each year of the four-year medical school curriculum
- Annual recommendation for promotion by the Progress/Promotions Committee
- Passage of the USMLE Step 1, Step 2 CK and Step 2 CS
- Passage of a Clinical Performance Examination (CPX) at the end of the third year
- Completion of requirements of the 4th year Urban/Underserved College

Postgraduate Employment Opportunities (Internships and Residencies)
Most students make their choice of specialties during the third year. Except for some programs requiring “early matches” (e.g., urology, ophthalmology), interviews for internships and residencies are generally conducted during fall of the senior year. Students typically apply for these programs through the National Resident Matching Program (NRMP), more commonly known as “The Match.” The NRMP application and matching process is coordinated through the Office of Medical Student Affairs by the Associate Dean of Medical Student Affairs. Students will be given an orientation to “The Match” in the spring of their junior year.

Graduates of the CDU/UCLA Medical Education Program enter into intern positions at institutions throughout the United States at the Postgraduate Year I (PGY-I) level.

Admissions and Fees
Overview
The CDU/UCLA Medical Education program seeks to provide an education in the scholarly and humane aspects of medicine and to foster the development of leaders who will advance medical practice and knowledge in underserved areas of the United States and abroad. The admissions committee seeks to admit students who are best suited for the educational program and mission of the University. In particular, it looks for intelligent, mature, and highly motivated students who show promise in becoming leaders in medicine. The admissions committee also considers very carefully personal qualities necessary for the successful study and practice of humanistic medicine. These include integrity, professionalism, dedication to community service, scholastic accomplishments and potential.

The CDU/UCLA Medical Education Program admissions committee is committed to diversity by ensuring adequate representation of women and all minority groups with diverse interests and backgrounds. All applications are given careful consideration without regard to gender, race, age, religion, national origin, sexual orientation, or financial status. In evaluating candidates, the committee takes into consideration many factors including academic record, MCAT scores, record of activities and accomplishments, and recommendations from premedical committees and science teachers. We use the Multiple Mini-Interview process (MMI) which is an integral part of the selection process.

Students who are admitted into the program spend the first two years of medical school on the campus of the David Geffen School of Medicine at UCLA. World-renowned leaders in medical education have implemented an innovative preclinical curriculum ensuring a quality science foundation. The third year of medical education coordinated and supervised by Charles R. Drew University located in South Los Angeles approximately 17 miles from the Westwood campus. Students rotate through the various services including pediatrics, psychiatry, obstetrics/gynecology, surgery, Family Medicine and internal medicine at Charles R. Drew and UCLA affiliate sites.

A unique component of the CDU/UCLA Medical Education program is the longitudinal primary care clinical experience. Students in the third year spend two to three mornings per month at a primary care clinic located in an underserved area of Los Angeles. In addition, students are required to develop and implement a primary care research project, and produce a thesis with a faculty mentor that will be presented at the annual research colloquium just prior to graduation. The fourth year begins with a one-week orientation designed for students to hone their clinical skills and prepare for residency. A mentorship program in the fourth year allows the students to work closely with faculty to ensure appropriate career and academic guidance and successful completion of the research thesis.

Students successfully matriculating through the program are encouraged to pursue additional...
postgraduate training or scholarly activity on the UCLA campus. Students may choose programs in either the Schools of Public Health or Business. Graduates of the CDU/UCLA Medical Education have also successfully completed joint MD/PhD degrees.

**Academic Requirements**

The following courses are required:

- One year of college English to include the study of English composition
- One year of college mathematics to include the study of introductory calculus and statistics
- One year of college physics, (with laboratory)
- One year of general biology (with laboratory)
- Two years of college chemistry to include the study of inorganic chemistry, quantitative analysis and organic chemistry (with laboratory)

The following courses are recommended:

- One year of foreign language (Spanish is highly recommended)
- Coursework in Humanities
- Coursework in Computer Skills

Preference shall not be given to undergraduate science majors over non-science majors. Applicants are urged to acquire a broad experience in the humanities, behavioral sciences, and social sciences in their college years, but they should follow their own interests whether in the arts or in the sciences. Prior research experience and conversational Spanish are highly recommended but not required.

High school and advanced placement courses do not fulfill these requirements. If an applicant has been excused from a required college-level course, another course at the same or higher level must be substituted. Applicants currently enrolled in a professional or graduate school must be in the terminal year of the degree program to be considered for admission to the first-year class. Post-Baccalaureate students are encouraged to apply.

Students must complete all premedical requirements before beginning the first year of medical study, although these requirements need not be completed at the time the application for admission is filed.

All students must take the Medical College Admissions Test (MCAT). Arrangements for taking the MCAT must be made directly with the MCAT Program Office, http://www.aamc.org or (202)-828-0690.

Applicants are strongly urged to take the MCAT in the spring of the year of application. Please refer to the AAMC web site for more information. The test must be repeated if, at the time of the application, more than three years have elapsed since it was taken.

**Admissions Process**

In order to be considered for admission to the CDU/UCLA Medical Education Program, all applicants are required to follow the procedures listed below:

1. Fulfill the academic requirements.
2. Submit an application through the American Medical College Admissions Service (AMCAS), Association of American Medical Colleges (www.aamc.org/amcas). Completed applications and supporting documents must be received by AMCAS no later than November 1 of the year preceding anticipated entry.
3. Take the Medical College Admissions Test (MCAT).

Selected applicants will be invited to submit a supplemental application and three letters of recommendation or a composite report from a professional advisory committee of the student's college or university. The deadline for receipt of this additional information is January 31 of the year in which entry is anticipated.

Selected applicants who are invited to submit and complete the supplemental application process will be invited for an interview with members of the admissions committee.

Refer to website (www.cdrewu.edu) for updated information.

**Transfer Application**

Admission is granted into the first year of the Medical Education Program only. The CDU/UCLA Medical Education Program does not accept transfer students.

**Application Processing Fee**

An application fee of $70 is required for all applicants invited to submit a supplemental application. Fee waivers are granted only with approval of the Admissions Committee and a copy of the AMCAS fee waiver documentation must be submitted.

**Registration**

During the four years in the CDU/UCLA Medical Education Program, students are registered at University
of California, Los Angeles, for a total of eight semesters and one summer session. Enrollment is distributed as follows:

First Year: Fall, Spring
Second Year: Fall, Spring
Third Year: Summer, Fall, Spring
Fourth Year: Fall, Spring

Annual Fees and Expenses
Tuition and fees of the CDU/UCLA Medical Education Program are determined by the Regents of the University of California and are subject to change without notice. Refer to the Registrar website: http://www.registrar.ucla.edu/Fees for updated information.

Refund Procedure
Prior to the first day of instruction, fees paid are refunded in full. After that, refunds are determined based on the number of weeks classes were attended. For more information including a schedule of refunds, refer to the registrar website at http://www.registrar.ucla.edu/archive/refund/refund07-08.htm.

Financial Aid
The David Geffen School of Medicine at UCLA Student and Resident Financial Services Office administers all financial aid for students of the CDU/UCLA Medical Education Program, regardless of their year in the program. Responsibilities of this office include the processing of all applications, assessment of student eligibility for financial aid, and awarding of financial aid.

Financial aid application forms are only sent to students accepted into the CDU/UCLA Medical Education Program.

In general, awards of both loan and scholarship funds are made on the basis of demonstrated financial need—that is, the difference between the standard costs of attendance at school and the student's resources from parents, spouse, and self. However, there are several awards which are made primarily on the basis of academic excellence. Awards are determined annually, and support in subsequent years is dependent on continued demonstration of financial need, availability of funds, and satisfactory academic progress as determined by the College of Medicine and by the appropriate promotion committee.

Details about financial aid are provided at the time of application, and supplemented by information posted by the David Geffen School of Medicine Student and Resident Financial Services Office on the following website: http://www.medstudent.ucla.edu.

The Office is located at the Center for the Health Sciences (CHS), Room 12-109, (310) 825-4181.

Medical students are eligible to receive need-based aid for the normative four-year length of the M.D. program. Up to one year of additional aid may be granted to a student required to repeat course work, if a minimum of two-thirds of the normal academic load is carried. However, if a student is allowed to repeat a second year (or third semester), financial aid will not be provided during that specific year or semester.

Foreign nationals are generally not eligible for student aid. Such students may be required to submit letters explaining how they will finance their education.

Application Deadlines
There are no deadlines for entering first-year students. However, the sooner the forms are received, the sooner an award can be made. The process requires approximately six weeks from receipt of application to disbursement of a check.

After the first year, continuing students must reapply by the deadline date each year to receive full consideration for financial aid. When awards are made, the offer letter must be signed and returned immediately, in order to prevent any delay in processing and dispensing the awards.

Types of Aid Available
The David Geffen School of Medicine at UCLA generally offers a combination of grants, scholarships, and loans to help finance a student's education. The ratio of scholarship to loan may vary from year to year depending upon the availability of funds and current regulations.

Should a student be awarded a private scholarship, he/she is responsible for informing the Financial Aid Office immediately, with the name and address of the awarding entity. For complete information, go to the David Geffen School of Medicine Student and Resident Financial Aid Office website (http://www.medstudent.ucla.edu).

Emergency Loans
CDU/UCLA Medical Education Program students may take advantage of UCLA funds that are made available on the UCLA campus for emergency purposes. These loans provide from $75 to $300 for a short period of time (30-90 days) in order to help a student overcome temporary financial problems. Loans may be obtained in
one day and are interest-free. Repayment of loans by the
due date is a requirement for continued registration.
There is a $10 late fee for all loans repaid after the due
date.

Extramural Funding
The following scholarships, fellowships, and grants are
offered by agencies other than the University, but are
coordinated through the Charles R. Drew University’s
Office of Medical Student Affairs. To apply for these
funds, CDU/UCLA Medical Education Program
students should obtain an application and/or letter of
support from the Associate Dean of Medical Student
Affairs at Charles R. Drew University.

Association of Black Women Physicians
(ABWP)
Minority medical students with demonstrable financial
need are eligible for scholarships from this organization.
Between eight and ten scholarships are awarded
annually, the amount varying according to individual
need. Winners are announced in mid-October at the time
of the annual dinner dance of this organization.

Auxiliary to the Charles R. Drew Society
Scholarship
This fund has been made possible by Los Angeles
minority physicians, spouses, and friends through the
Charles R. Drew Medical Society and Auxiliary.
Minority medical students in the sophomore or junior
year with demonstrated financial need and leadership
/community involvement may apply by May 15 of a
given year. Applications are disseminated by the Office
of Medical Student Affairs each April.

National Medical Fellowships
National Medical Fellowships, Inc. is a nationwide
private organization that provides financial assistance to
minority medical students for their first two years.
Eligibility is limited to minority students (African-
Americans, Mexican-Americans, mainland Puerto
Ricans, and Native Americans) who have demonstrable
financial need and who are United States citizens.
Application for these awards requires a Dean's letter in
all cases.

Student Awards
Students in the Medical Education Program are
encouraged to learn and perform in a manner that is
consistent with the University’s Mission and are
recognized for their achievements in the following
categories of awards:

• Dr. Charles R. Drew Award: The College of
  Medicine's highest award, this honor is presented to
  the graduating student who, in the opinion of the
  faculty, has most exemplified a combination of
  compassion and academic excellence over all years
  of training. Winners of this award perform in a
  manner exemplary of the institution's Mission, as
  manifested in academic achievement in basic
  science and clinical coursework. Awardees also
  demonstrate compassion in clinical service. The
  winner of this award is selected by the Awards
  Committee, with input from the senior class.

• Dr. Mitchell Spellman Award: This award, named
  for the first Dean of the College of Medicine, is
  presented to the graduating student who has
  demonstrated unique and noteworthy achievement,
  not necessarily in the field of medicine. The winner
  of this award is selected by the Awards Committee,
  with input from the fourth-year class.

• Dr. Geraldine Burton-Branch Award: Named for a
  physician who resides in the community served by
  the MLK Hospital, this award is presented to the
  graduating student who has demonstrated
  outstanding performance in the primary care course
  over the clinical years. The winner of this award is
  selected by the Awards Committee with input from
  the primary care faculty.

• Dr. Carlos Juan Finlay Award: This award, named
  after the Cuban physician who discovered the role
  of the Aedes aegypti mosquito in the transmission
  of yellow fever, is presented to the graduating
  student who has most exemplified excellence in
  community service or public health. The winner
  of this award is selected by the Awards Committee,
  with input from the fourth-year class.

• Dr. Martin Luther King, Jr., Award (Silver Medal):
  Named for the noted civil rights leader, this award
  is presented to the graduating student who has most
  exemplified peer support and advocacy. The
  recipient of this award is selected by the Awards
  Committee, based on nominations by the members
  of the fourth-year class.

• Dr. Rebecca Lee Award: This award, named for the
  first Black woman to receive the M.D. degree in the
  United States, is presented to the graduating student
  who has best exemplified excellent performance
  despite adverse circumstances. The recipient of this
  award is selected by the Awards Committee, with
  input from the senior class.

Honor Society
Alpha Omega Alpha is the only medical honor society in the world. Its aims are the promotion of scholarship and research in medical schools, the encouragement of a high standard of character and conduct among medical students, and the recognition of high attainment in medical science, practice, and related fields.

Election to Alpha Omega Alpha is a distinction that accompanies the physician throughout his/her career. Members can be elected as students, graduates, or faculty of an affiliated institution, or on an honorary basis because of their distinguished achievement in any field of medicine. Chapters elect undergraduate members from students in their last two years of medical school. Scholastic excellence is not the only criterion for election: integrity, capacity for leadership, compassion, and fairness in dealing with one's colleagues are considered to be of equal significance.

Students elected to the society are men and women who, in the judgment of the local chapter, have shown promise of becoming leaders in their profession. The number of students elected from any CDU/UCLA class may not exceed one-sixth of those expected to graduate for that year.

Professional Associations
Students at Charles R. Drew University participate in a wide variety of professional associations designed to broaden the scope of their collegial relationships and provide support for ongoing career development.

- Latino Medical Student Association (LMSA)
- Student National Medical Association (SNMA)
- American Medical Student Association (AMSA)

Licensure

United States Medical Licensing Examinations (USMLE)
All students enrolled in the CDU/UCLA Medical Education Program are required to take and pass Step 1, Step 2 Clinical Knowledge (CK), and Step 2 Clinical Skills (CS) of the USMLE before a student is eligible to graduate.

Students must take Step 1 before beginning Clinical Foundations in their third year. Step 1 must be passed in order to advance to the fourth year. Failure of Step 1 may require removal from the clinical curriculum or the student may not be allowed to start the next rotation. The Associate Dean of Medical Student Affairs will meet individually with students who do not pass Step 1 of the USMLE to plan the best course of action. Failure of Step 1 on the third attempt will result in dismissal from the Medical Education Program.

Students must take the USMLE Step 2 CK examination by the date specified in the Handbook of Courses for Fourth Year Medical Students. If Step 2 CK is not attempted by the deadline (usually the last day of December of the fourth year), credit will not be given for any course work completed after the deadline and before the examination. No retroactive credit will be given. Failure of Step 2 CK on the third attempt will result in dismissal from the Medical Education Program.

The National Board of Medical Examiners offers self-assessment resources for medical students on its website: http://www.nbme.org. In an effort to facilitate students' success on these examinations, Charles R. Drew University’s Learning Resource Center offers Step preparation materials for student review. Additionally, the Office of Medical Student Affairs provides limited individual study skills counseling for its medical students. Please refer to the Handbook of Courses for 4th-Year Medical Students for more specific information on the USMLE policy.

Course Responsibilities during Board Review Programs
Since passing Step 1, 2 CK and CS of the USMLE is an institutional priority at CDU, any student may, by the decision of the Associate Dean of Medical Student Affairs, be relieved of course responsibilities in order to take part in an approved USMLE review course. The student so excused must complete coursework missed while completing a USMLE review course.

Student Life
Charles R. Drew University augments its programs of formal education through community service programs and organizations that provide student activities commensurate with the mission of the University and relevant to the work in which students will be engaged in their professional lives.

The University strives to see that the needs and interests of every student are met and that students are at all times...
in an atmosphere that is conducive to their social, cultural, and spiritual growth. The atmosphere must also be conducive to the realization and development of a sense of community, state, national, and international responsibility.

**Student Health**

Before registering at the University, students must show evidence that they have current immunizations, are free from communicable disease, and are physically fit to carry out university work. Copies of these documents must be submitted to the Office of Medical Student Affairs and to the Student Affairs Office (SAO) at the David Geffen School of Medicine at UCLA.

Prior to starting the clinical years, all students are to provide licensed physician-documented evidence of freedom from infectious diseases. The evidence should be based upon physical examination, chest x-ray, tuberculin testing and other methods, as determined by the physician. Students are to consult their private physicians or the Arthur Ashe Student Health and Wellness Center in order to fulfill these requirements and are responsible for all fees not covered by insurance.

Health insurance coverage is required for all students. Proof of such coverage must be presented to the Office of Medical Student Affairs during registration. Students are responsible for their own routine health maintenance and chronic healthcare.

**Medical Treatment**

UCLA student health insurance is available to all medical students and may be purchased on the UCLA campus. This health insurance plan requires that the student receive care at UCLA.

When a student is injured while on rotations, he/she should report the injury to the nursing supervisor on the nursing unit and to his/her preceptor.

**Counseling Services**

Students are encouraged to make use of the personal and academic counseling services provided for them throughout their training. Individual appointments are scheduled for students enrolled in CDU/UCLA Medical Education Program through the Office of Medical Student Affairs at (323) 563-4888.

**Identification Badges**

There are several types of photo identification badges required of students in the CDU/UCLA Medical Education Program:

Charles R. Drew University photo identification issued during the Prematriculation Program upon completion of the Charles Drew portion of registration. (This identification indicates the student has met the requirements for UCLA Student Health Services and has provided evidence of a current health insurance policy or has signed a statement that he/she will participate in UCLA’s Health Insurance Plan as of September of the current academic year.)

UCLA photo identification is issued by UCLA during first year orientation.

County of Los Angeles photo identification, issued at the start of the clinical years. This identification will not be issued until the student has provided the Office of Medical Student Affairs with evidence of current health insurance coverage, verification of freedom from infectious disease, and an updated registration form.

Students must wear the appropriate identification badges whenever they are at Charles Drew affiliate hospitals or clinics, at the UCLA Center for the Health Sciences, or whenever they are in contact with patients.

**Housing**

For information, contact the following UCLA offices:

- Housing Office (310) 825-4491
- Office of Residential Life (310) 825-3401

**Night Call Rooms**

When on call during a clinical clerkship, the student should use the relevant department's 'night call' facilities, which are usually shared with house staff.

**Liability during Assigned Travel**

The responsibility for safe transportation from Charles R. Drew University or from students' homes to assigned clinical sites rests with the individual student. All drivers on public thoroughfares in the state of California are required to have car insurance.

**Dress Code**

A medical student is responsible to the public and to patients and should thus dress and act like a physician-in-training in all patient contact situations. Men are to wear a shirt and tie; women should be dressed in professional attire. All students should wear a short white coat with visible photo identification whenever they are in a clinic or hospital, with a preceptor, or with a patient in any professional capacity.

**Student Government/Student Activities**

Charles R. Drew University offers broad and diverse opportunities for student involvement and leadership...
development, ranging from informal groups in which students share common interests and enthusiasms to formal and organized participation in elective government. Students may choose to participate in student government at the program level, the college level, or by becoming active in the University-wide student organization, Charles Drew Student Government (CDSG).

Participation in University and College Governance
Third and fourth-year medical students who are in good academic standing are eligible to serve on College committees.

For each of the committees approved for student membership, the 3rd and 4th year classes are each entitled to one representative and two alternates. Each class selects its representatives and alternates through a democratic process and submits the roster of selectees to the Associate Dean of Medical Student Affairs, who verifies that each person on the roster is in good academic standing. The slate of nominees is then presented to the College's Faculty Council, which has the right of final approval.

Student representatives will serve one-year appointments but may serve successive terms if appointed or elected. The following College committees are approved for student representation:

The Educational Policy and Curriculum Committee reviews and makes recommendations on educational policy and procedure and critiques the administration and curricula of all medical student education programs. Each department in the College is represented on the committee by one faculty member who may serve an unlimited number of consecutive two-year terms. The committee meets monthly.

The Medical Student Admissions Committee participates in the recruitment and selection of a medical student body that is committed to the University’s mission and is motivated and capable of fulfilling the academic requirements of the CDU/UCLA Medical Education Program with, particular emphasis on its primary care curriculum. This committee develops, maintains, publishes, and distributes guidelines for medical student admissions which state the admission policies and procedures developed by the faculty according to its bylaws.

Any breach of confidentiality as a student member of either of these committees may be considered grounds for immediate dismissal from the committee.

College Policies
Attendance Policy
The attendance of all students is required at all regularly scheduled class sessions, laboratories, or clinical training sessions and will be used in assessing grades and meeting state requirements. All of the above stated experiences and training sessions are viewed as extremely important by the faculty and, therefore, participation in such sessions is expected of all students on an ongoing and regular basis. Students in the College of Medicine will adhere to specific attendance policies.

Compliance Statement
Charles R. Drew University of Medicine and Science, in compliance with Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, the Rehabilitation Act of 1973, and the Age Dissemination Act of 1975 does not discriminate on the basis of race, creed, color, national origin, mental or physical disability, age, or sex in any of its policies, practices, or procedures. The University is in compliance with Title VII of the Consumer Protection Act and the Privacy Act of 1974. This policy includes, but is not limited to, the University's offices and programs related to admissions, employment, financial aid, educational services, and activities.

Harassment
Charles R. Drew University is committed to providing a work and educational environment that is free of discrimination and unlawful harassment. The University seeks to prevent and prohibit misconduct on the campus, including sexual harassment or any other type of harassment by fellow students, staff, or faculty. Actions, words, jokes, or comments based on an individual's sex, race, ethnicity, age, religion, or any other legally protected characteristic will not be tolerated. Any student who feels that he/she has been harassed should make it clear to the offending individual that such behavior is offensive and unwelcome. If the behavior continues, the incidents should be reported to the Associate Dean for Medical Student Affairs immediately.

Complaints and Grievances
Charles R. Drew University believes that the campus environment should be conducive to openly expressed and shared ideas that stimulate professional and personal knowledge and growth.

Students who have complaints against other students should report their complaints to the Director of Medical Student Affairs. Students who have a complaint against a staff member should report their complaints to the staff
member's supervisor or Program Director. If the Director of Student Affairs, the supervisor, or the Program Director is unavailable, or if the student believes it would be inappropriate to contact one of those individuals, the student should immediately contact the Associate Dean of Medical Student Affairs. Students may raise concerns and make reports without fear of reprisal.

Honor Code
The students of the College of Medicine have adopted the following statement:

We, students of the CDU/UCLA Medical Education Program, being cognizant of the high ideals of the profession of medicine and of the part that honor and self-discipline play in the maintenance of such ethical standards, pledge ourselves to observe this fundamental code in our formative years that we may better uphold the honor code for which the profession of medicine has always been venerated.

1. We will act at all times in a manner creditable to our school and future profession.

2. No un-permitted aid will be given or received for an examination, paper, or other assigned work.

3. It will be the responsibility of each student to uphold these ideals and aid in their enforcement.

Further, we agree to the establishment of an Honor Council to review infractions of the above principles during our clinical years at Charles R. Drew University according to the preceding sections of the article.

During the preclinical years at the David Geffen School of Medicine at UCLA, the students of the CDU/UCLA Medical Education Program are bound by the Medical Code of Ethics as outlined in the Medical Student Honor Code. The Medical Student Honor Code is under the jurisdiction of the UCLA Medical Student Council. Further information regarding the Medical Student Honor Code at UCLA can be obtained from www.medstudent.ucla.edu/current/policies.

Nondiscrimination Policy
The Charles R. Drew University of Medicine and Science does not discriminate on the basis of sex in the educational programs or activities it conducts. Title IX of the Education Amendments of 1972, as amended, and the administrative regulations adopted there under, prohibit discrimination on the basis of sex in education programs and activities operated by the Colleges.

Programs and activities include the admission of students and employment. Inquiries concerning the application of Title IX to programs and activities of the Colleges may be referred to the Registrar, who is assigned the administrative responsibility for reviewing such matters.

Student Code of Conduct
The Charles R. Drew University of Medicine and Science has an obligation to maintain conditions under which the College can carry out its primary function of teaching, research, and public service in accordance with the highest standards of quality and institutional integrity. The Office of Medical Student Affairs reviews all matters relating to student conduct and academic integrity.

In granting each student the M.D. degree, the faculty of the Charles R. Drew University College of Medicine endorses each student as having maintained the academic, moral, and ethical standards appropriate to the practice of medicine. It is the responsibility of the faculty to help each student recognize and correct any deficiencies before the M.D. can be granted. The formality of any such correction should vary in proportion to the gravity of the deficit.

To this end, every registered student and every instructor with an academic appointment has agreed to abide by the Student Code of Conduct and Academic Integrity guidelines. These guidelines provide the standard by which students, faculty, and administration are encouraged to take reasonable steps to prevent violations. If violations occur, however, they will be handled in accordance with the policies of the College of Medicine.
Medical Education Program Student Learning Outcomes

O1: Patient Care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health.

1.1 Conduct patient-centered encounters that balance the needs of the patient with time constraint of practice.

1.2 Accurately perform and document both complete and focused histories and physical examinations that are based on the pathophysiology of presenting complaints, and that address relevant psychosocial and family issues.

1.3 Prioritize patient's problems, formulate appropriate differential diagnoses, and develop appropriate plans for diagnosis and/or management.

1.4 Perform basic and therapeutic procedures (basic life support, suturing simple lacerations, drawing venous blood, starting an IV, basic airway management).

1.5 Be familiar with the technique of normal vaginal delivery.

1.6 Be able to discuss the principles of and the relative advantages and disadvantages of various therapeutic modalities, including surgery, pharmacology, physical rehabilitation, mental health care, behavioral modification and complementary and alternative medicine, as applied to common clinical situations.

1.7 Use epidemiological principles and data to formulate measures for care of individuals and communities and be able to read the medical literature.

1.8 Evaluate the roles that unemployment, poverty, and lack of education play as obstacles to quality health care.

1.9 Develop and implement individualized risk reduction plans based on a culturally-sensitive assessment of important medical and social conditions including sexually transmitted diseases, substance abuse, and interpersonal violence.

O2: Medical Knowledge about established and evolving biomedical, clinical, and cognate (e.g., epidemiological and social-behavioral) sciences and the application of this knowledge to patient care.

2.1 Know the scientific principles that underlie current understanding of normal human development, function, and disease. Be able to accurately express and use these principles in discussing health maintenance, common disease processes, and disease evaluation and management.

2.2 Demonstrate an understanding of social and behavioral factors that influence patients’ responses to health and disease.

2.3 Understand the scientific basis and interpretation of common diagnostic modalities. Discuss the indications, contraindications and cost-effectiveness of common diagnostic studies.

2.4 Demonstrate knowledge if common problems and diseases for diverse populations.

2.5 Understand basic issues for promoting health and preventing disease, including nutrition, exercise, psychological health, preventive pharmacology, genetic predisposition to disease, sanitation, environmental and workplace hazards, life-styles, immunizations, and apply this understanding to patient management.

2.6 Assess the health status, demographics and socioeconomic characteristics of medically underserved populations.

2.7 Know when and how to report incidents of domestic violence.

O3: Practice Based Learning and improvement that involves investigation and evaluation of their own patient care, appraisal and assimilation of scientific evidence, and improvements in patient care.
3.1 Understand the importance of life-long learning to adequately care for patients, to participate in patient education, and to pursue creative scholarly endeavors.

3.2 Use computer-based techniques, including PubMed and other relevant database, to acquire new information and resources for learning.

3.3 Identify and use reliable, authoritative sources of medical information.

3.4 Organize personal resources efficiently and systematically using electronic tools and other methods.

3.5 Describe and assess common scientific methodologies used in clinically-relevant medical research.

3.6 Identify the evidential value, organization and logistics of various types of clinical trials, and be able to advise patient concerning their participation in or interpretation of these.

3.7 Read, summarize and critique research and disease review in articles in peer-reviewed journals.

3.8 Use evidence-base approaches as tools to decide whether to accept new findings, therapies and technologies for incorporation into medical practice.

3.9 Utilize decision-support systems and guidelines for clinical decision making, including an understanding of the roles of preferences and probabilities.

3.10 Understand and use continuous quality improvement practices.

3.11 Translate questions that arise from daily clinical practice into formal research hypotheses.

3.12 Utilize computer technology to aid in the design, writing, analysis, and presentation of data from a clinical research project.

3.13 Design, implement, and complete a clinical research project that will meet the criteria for a thesis.

O4: Interpersonal and Communication Skill that result in effective information exchange and teaming with patients, their families, and other health professionals.

4.1 Demonstrate interpersonal skills that build rapport and empathic communication with patient and their families across socioeconomic, racial, and cultural boundaries.

4.2 Make both complete and focused case presentations that are accurate and well-organized, prepare and maintain complete, accurate, well-organized medical records.

4.3 Demonstrate a commitment to and skill in teaching medical students, colleagues, and other members of the allied health profession using the concepts and vocabulary of contemporary basic and clinical science.

4.4 Function as a productive member of a team.

4.5 Work collaborative with health professionals from other disciplines.

4.6 Skillfully address sensitive issues in an effective, compassionate, non-judgmental manner.

4.7 Describe and use sound principles for changing patients' behavior in order to promote and improve their health.

4.8 Inform patient and their families about health and illness in a way that is culturally-sensitive, jargon-free and appropriate to their needs, including counseling on prevention and psychosocial issues.

4.9 Obtain informed consent from patient by clearly explaining the risks, benefits, and alternative for common medical and surgical procedures in a culturally sensitive manner.

O5: Professionalism, as manifested through a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to a diverse patient.

5.1 Demonstrate reliability, dependability, and integrity in interactions with colleagues and patients.
5.2 Deal with professional mistakes openly and honestly in ways that promote patient trust and self-learning.
5.3 Accurately assess one's personal strengths and limitations, relevant to one's practice of medicine and continued learning.
5.4 Develop abilities to receive and provide constructive feedback as part of peer and self-assessment of professional behaviors.
5.5 Understand appropriate coping mechanisms for dealing with stress, intellectual uncertainty, interpersonal conflict, and issues related to power.
5.6 Use basic ethical concepts and approaches to identify and analyze the ethical dimensions of common situations in medical practice, health policy, and research.
5.7 Understand the obligation to treat the individual patient, and discuss the conflict between caring for a patient and caring for a population.
5.8 Recognize an obligation to the health of society, locally, regionally, and nationally.
5.9 Demonstrate the ability to provide leadership to groups of colleagues or patient.

O6: System Based Practice, as manifested by actions that demonstrate an awareness of and responsiveness to the larger context and system of health care and the ability to effectively call on system resources to provide care that is of optimal value.

6.1 Function under common time constraints in outpatient primary care settings, including managed care groups and underserved populations.
6.2 Discuss changing social, economic, and political factors that are affecting the patterns of health care delivery in the United States, and specifically in Southern California.
6.3 Know the structure and function of health care delivery and insurance systems currently used in United States.
6.4 Understand how payment systems for medical care affect decision making and care provision, and discuss strategies for delivering quality of care in the face of reimbursement restrictions.
6.5 Apply cost-effectiveness analysis to specific instances of diagnosis and treatment of disease and health promotion.
6.6 Understand the principles of medical record keeping and the use of electronic records.
6.7 Know how and when to use consultants.
6.8 Identify and use resources and ancillary health care services for patients in situations in which social and economic barriers to access exist.
History

At a time when millions of inner-city citizens are suffering from vast health inequities and few clinical care options, the need for innovative, comprehensive medical education and clinical care has never been greater. California consistently ranks 49th or 50th nationwide in the number of registered nurses per capita, with 30% fewer nurses than the national average. The federal Health Resources and Services Agency (HRSA) estimates that by the beginning of the second decade of the 21st century, California will need more than 42,000 additional nurses to meet demand, which it describes as “a target that more than likely will not be met because of the inability of the current nursing education program to prepare sufficient numbers of professionals.” In particular demand are healthcare providers with expertise working with highly diverse, low-income communities. California is one of the most racially, ethnically and culturally diverse states in the U.S.,1 with a significant number of residents living without health insurance (6.3 million in California compared to 45 million for the rest of the U.S.). At the same time, California’s nurse workforce is not culturally diverse; the majority of registered nurses in California are Caucasian women.2

The Life Sciences, Research, and Nursing Education Building, home to the Mervyn M. Dymally School of Nursing

The South Los Angeles area surrounding CDU has the highest concentration of racial/ethnic minorities and is the most socioeconomically disadvantaged community in Los Angeles County. The University’s service area is 60 percent Hispanic/Latino, 25 percent African American, 12 percent non-Hispanic/Latino White and 5 percent Asian American. Nearly 32 percent of the population in South Los Angeles lives below the federal poverty level and nearly 46 percent have less than a high school education. The median age is 25.6 years, with a median family income of $17,597. Compared with Los Angeles County overall, this area has significantly fewer physicians and hospital beds per capita and a significantly greater overall age-adjusted mortality rate, with high rates of serious chronic and acute health problems recognized by the National Institutes of Health (NIH) as national priorities. In South Los Angeles, diabetes rates are 44 percent higher than elsewhere in the county, hypertension rates are 24 percent higher, HIV/AIDS rates are 38 percent higher and asthma rates are 11 percent higher.

To tackle the growing demand for nurses who can provide health care in South Los Angeles and similar communities across the nation and throughout the world, Charles R. Drew University opened the Mervyn M. Dymally School of Nursing3 in the fall of 2010. This new institution aims to improve the diversity and cultural

---

1 The percentage of Hispanics/Latinos residing in California is more than double that of those residing in the rest of the United States (35.2 percent versus 14.4 percent). Of the uninsured individuals residing in California, 54 percent are Hispanic/Latino (Hispanic/Latino Coalition for a Healthy California, 2007).
2 Based on 2000 data, following Caucasians, Asian Americans constitute the second largest ethnic group of RNs working in California, at 11 percent of the workforce, followed by 4 percent African American and 3.6 percent Hispanic.
3 The CDU School of Nursing was named after Mervyn Malcolm Dymally, a California Democratic politician of mixed Indo- and Afro-Trinidadian heritage who has served in the California State Assembly, the California State Senate, as Lieutenant Governor of California, and in the U.S. House of Representatives. He has been a recognized supporter of Charles R. Drew University and of the community for many years.
sensitivity in the nursing workforce and develop nursing leaders and educators who will achieve excellence in patient care in the often-challenging urban health care settings.

Following the initial approval for the Master of Science in Nursing (MSN) program granted in June 2009 by the California Board of Registered Nursing (BRN), a nationwide search for the founding dean of the School of Nursing was conducted. In January 2010, Dr. Gloria J. McNeal, PhD, MSN, ACNS-BC, FAAN was appointed Founding Dean. The state-of-the-art, $43 million Life Sciences Research and Nursing Education (LSRNE) Building was officially opened August 2010, and houses the Mervyn M. Dymally School of Nursing (MMDSON), which is located in the first floor of the building. The first cohort of entry level masters students was enrolled in the Fall 2010 semester. Five full-time and one part-time faculty members were hired to begin the curriculum of instruction. To enhance course offerings, the faculty agreed to develop content for the Family Nurse Practitioner (FNP) curriculum of study. Approval for the new course offerings was obtained by the CDU Academic Senate. Six additional faculty holding advanced practice nursing credentials were hired and the first cohort of FNP students was admitted in January 2011. Students enrolled in the first cohort of the entry level program graduated in June 2012, and the first cohort of FNP students graduated December 2011.

The Mervyn M. Dymally School of Nursing (MMDSON) designed and implemented a highly successful recruitment plan. From a beginning cohort of 18 entry level masters students in Fall 2010, the program has grown exponentially. With the support of the California Endowment a recruitment video was widely disseminated, and Time Warner Cable was commissioned to produce several commercials that were aired over local cable networks. Enrollment currently stands at more than 300 students. To be eligible for enrollment into the nursing program, students must hold a baccalaureate degree to meet minimum requirements; however, the majority of enrollees have exceeded that requirement having earned master or doctoral degrees in a variety of fields.

With the growth in the student body, there has also been a similar rate of growth in the MMDSON faculty. From a small beginning group of six dedicated faculty, MMDSON now has 19 full-time faculty and 22 part-time faculty, of which many either have a doctoral degree or are enrolled in a doctoral program. MMDSON has been awarded over $2.2 million in extramural funding for its Song Brown, Robert Wood Johnson Foundation (RWJF), Department of Labor, and National Institute of Health (R25) grant submissions. Following the initial approval granted by the California Board of Registered Nursing, MMDSON then applied for national certification with both the Accreditation Commission for Education in Nursing (ACEN) and the Commission on Collegiate Nursing Education (CCNE).

A partnership has been established with the UCLA School of Nursing, whose faculty and students utilize the simulation lab for student learning experiences. In addition, the UCLA School of Nursing Center for Population Studies is housed on the second floor of the LSRNE Building. Future expansion of the partnership will include joint course offerings, and faculty and student exchanges.

An additional partnership was established with the Los Angeles County Department of Health Services, in collaboration with Worker Education & Resource Center, to provide an educational opportunity for County nurses to earn the family nurse practitioner credential. The first cohort of County nurses enrolled in the Fall 2012 semester.

In January 2015, Sheldon D. Fields, PhD, RN, FNP-BC, AACRN, FNAP, FAANP was appointed as the school’s second Dean following a national search.

Cheryl Kemp, MS
DIRECTOR, STUDENT AFFAIRS
Welcome to the Mervyn M. Dymally School of Nursing (MMDSON), a dynamic school dedicated to preparing a diverse nursing workforce to meet the growing demands of historically underserved populations. We are an integral part of Charles R. Drew University of Medicine and Science (CDU), a major research institution dedicated to teaching, scientific discovery and community enrichment in South Los Angeles and abroad.

On behalf of the faculty and staff at MMDSON, I invite you to explore our nursing education programs as you embark upon a new career in nursing, or seek to advance your current nursing education. I am sure you will find our programs to be innovative, challenging and stimulating. We currently offer a Master of Science in Nursing (MSN) Program with three tracks for the completion of the MSN credential: the Entry Level Master’s (ELM) program, the Family Nurse Practitioner (FNP) program and the Advance Nurse Education (ANE). The ELM program is our pre-licensure program for those with a degree in another field seeking to enter nursing at the graduate level. The ELM program qualifies students to be able to take the NCLEX-RN and Clinical Nurse Leader examinations. The FNP program prepares graduates to function as advanced practice nurses (primary care providers) in the area of primary care. We also offer Post-Master certificate programs for nurses seeking preparation as a FNP or in Advanced Nursing Education.

Our location in Los Angeles, California’s thriving Movie, Information Technology and Aerospace Space Industries as well as culturally diverse neighborhoods, places the School of Nursing within reach of several celebrated international institutions. At the same time, we are surrounded by many communities that are disproportionately plagued by preventable disease such as Cancer, Hepatitis C, Diabetes, HIV/AIDS, Hypertension and Childhood Obesity.

Our faculty are focused and dedicated on delivering high quality nursing education, cutting edge research and service that is changing the face of the nursing workforce. Working together with CDU President, Dr. David Carlisle, and the Board of Trustees, we are committed to meeting our nation’s growing need for a highly skilled and compassionate nursing workforce that mirrors the population that we serve. Whatever your interest in this area, we are confident that we can prepare you to succeed.

MMDSON graduates are prepared to improve the health and quality of life for individuals through excellent healthcare, transforming the health of underserved communities. We are very proud of our MMDSON-CDU graduates who are making a difference in the lives of their patients and working towards a world without health disparities. We invite you to come visit our campus and meet our exceptional faculty, students and staff anytime. It would be my pleasure to welcome you as a student in the MMDSON.

Sheldon D. Fields, PhD, RN, FNP-BC, AACRN, FNAP, FAANP
Dean and Professor
Mervyn M. Dymally School of Nursing
Mission Statement

To advance the science and art of nursing by conducting nursing research and providing nursing students with education that emphasizes the health status of underserved communities, for the purpose of enabling graduates to provide evidence-based nursing care with dignity, respect and compassion to all nursing clients.

The first dimension of the mission is to provide graduate level nursing education to individuals who are entering practice at the master’s degree level. Graduate level student nurses will build on their previous undergraduate education to develop professional accountability and critical thinking. Students will learn and understand nursing theories, principles, concepts and research. Ultimately, they will acquire the ability to select and apply nursing theories, principles, concepts and research to the delivery of quality nursing care.

The second dimension of the mission focuses on contributing to nursing science through research. Research promotes excellence in nursing science. The nursing faculty at Charles R. Drew University actively engages in conducting research on nursing-related phenomena and disseminating the findings in forums including scientific meetings and publications that embody the emphasis on evidence-based practice and contribution to nursing science. Collaborative research with scientists and clinicians at Charles R. Drew University and other scientific communities, locally, regionally, and internationally are encouraged. Although not conducting research as part of the curriculum, nursing students will be exposed to research concepts and studies that advance public health. Upon completion of the program, students will have the ability to improve health outcomes through applied research in various health settings.

The third dimension of the mission is to expand in the program offerings to include doctoral level curricula of study, joining faculty and students in the development of research questions and interventional solutions in meeting the healthcare needs of underserved communities.

The fourth dimension of the mission is to address healthcare disparities worldwide. Faculty and students will participate in faculty-student exchange programs in partnerships with schools of nursing throughout the nation and the world, to develop global immersion experiences designed to address healthcare disparities around the globe.

The nursing program is committed to preparing highly qualified nurses to provide quality nursing care to clients from diverse backgrounds in a multi-cultural society, paying attention to the underserved who present with special needs. The emphasis on evidence-based practice underscores the Program’s focus on education, research and practice.

The MMDSON currently offers one degree program leading to the Master of Science in Nursing, (MSN) and three specialties, Clinical Nurse Leader (CNL), Family Nurse Practitioner (FNP), and Advance Nurse Education (ANE). Post Masters Certificates are offered in the FNP and ANE specialties.

Accreditation

The Master of Science in Nursing Program at Charles R. Drew Mervyn M. Dymally School of Nursing is accredited by the Commission on Collegiate Nursing Education.

One Dupont Circle, NW, Suite 530
Washington, DC 20036, (202) 887-6791
www.aacn.nche.edu/ccne-accreditation

The Nursing Entry Level Master’s (ELM) Program is approved by the Board of Registered Nursing (BRN).

The California Board of Registered Nursing
1747 North Market Boulevard, Suite 150
Sacramento, CA 95834
www.rn.ca.gov

The Senior Commission of the Western Association of Schools and Colleges (WASC)
985 Atlantic Avenue, Suite 100
Alameda, CA 94501
www.wascweb.org

Graduates of the MSN Program with the FNP specialty are eligible to take a certification exam from either the American Nurses Credentialing Center (ANCC) to earn the FNP-BC credential; or take a certification exam through the American Association of Nurse Practitioners (AANP) to earn the NP-C credential.

Graduates who complete the pre-licensure segment of the ELM program are eligible to sit for the NCLEX-RN exam and apply for the Public Health Certificate issued by the California Board of Registered Nursing.
Graduates who complete the CNL specialty are eligible to sit for the CNL certification examination with the American Association of Colleges of Nursing (AACN).

Graduates of the Advance Nurse Education program are eligible to sit for the Certified Nurse Educator (CNE) examination with the National League for Nursing.

Terminal Objectives
The MSN Program and terminal objectives are leveled to the expected competencies of a master’s level nurse clinician.

The ELM program is for individuals with a bachelor degree in another field, who want to pursue nursing. This program provides nursing students an opportunity to study basic nursing knowledge and science at the graduate level concurrently with graduate core content to prepare for licensure as a registered nurse. The ELM program approved by the California Board of Registered Nursing curriculum contains the CNL content, a generalist role developed by the American Association of College of Nursing. The CNL oversees the care coordination of a distinct group of patients and actively provides direct patient care in complex situations. Students graduating from the ELM program will be able to assume the role of a direct provider of care, nursing administrator or nursing faculty member.

The (CNL) is a generalist nursing role developed by the American Association of Colleges of Nursing. The CNL oversees the care coordination of a distinct group of patients and actively provides direct patient care in complex situations. The FNP curriculum prepares the registered nurse to provide primary care services in a variety of clinic and community-based settings. The ANE will prepare students to teach a new generation of nurses. Competencies for this specialty were derived from the NLN Nurse Educator standards and the Masters Essentials for Professional Nursing Practice. The coursework will prepare students to become knowledgeable nurse educators ready to teach in diverse settings. This program is designed for Registered Nurses (RNs) who possess a bachelor or Master of Science in Nursing, have a current RN license and wish to move into nursing education. Students will learn all the essential skills and knowledge needed. This program includes a practicum requirement in nursing education.

The MSN Program of study contains a strong foundation in the physical and social sciences and builds upon previous learning experiences in philosophy, arts and humanities. The curriculum also integrates recent and evolving trends in health care with a particular emphasis on learning related to: economics, environmental science, epidemiology, genetics, gerontology, global perspectives, informatics, organizations and systems, and communication. Graduates will be eligible to apply for post-master’s study and to pursue educational preparation at the doctoral level.

Upon the completion of the MSN Program, the student will be able to:

1. Synthesize theoretical and empirical knowledge derived from the physical and behavioral sciences and humanities as a basis for professional nursing practice.
2. Apply the nursing process to all levels of practice using the steps of assessment, diagnosis, outcomes identification, planning, interventions and evaluation.
3. Demonstrate competent practice as a master’s prepared registered nurse in a variety of settings.
4. Implement health promotion and disease prevention strategies for population-based practice that incorporates systems, the community, individuals and families.
5. Communicate effectively using oral, written, and technological skills in clinical, educational and professional settings.
6. Demonstrate ethical nursing practice to improve professional nursing practice, the work environment and influence improvement in healthcare.
7. Advocate for the patient’s rights, healthcare policies and finance systems that promote, preserve and restore individual and public health.
8. Provide leadership in collaborative efforts with interdisciplinary and intradisciplinary teams, thus providing a broad approach to complex patient care and community problems.
9. Demonstrate a spirit of inquiry and critically analyzes data, research findings, and other evidence to advance nursing practice, initiate change, and promote quality health care.
10. Formulate a professional philosophy that incorporates a commitment to human values and lifelong learning.
11. Provide leadership in collaborative efforts with other disciplines to improve professional nursing practice, the work environment and influence improvement in healthcare.

Curriculum
The MMDSON curriculum is based on the philosophy and conceptual framework for the University and the
School of Nursing MSN Program. The Smith and Bazini-Barakat (2003) public health nursing practice model provides the theoretical framework for the curriculum. The model captures three phases of health and illness in which nurses are involved, including: 1) primary, 2) secondary and 3) tertiary prevention.

The programs consider the recommendations presented by the following:
- American Association of Colleges of Nursing Essentials of Baccalaureate Education for Professional Nursing Practice, and Essentials of Master’s Education for Advanced Practice Nursing (2011);
- The Quality and Safety Education for Nursing (QSEN) Competencies;
- The National Organization of Nurse Practitioner Faculties (2012);
- The National League of Nursing Education Competencies Model (2010); and
- The California Board of Registered Nursing.

Theory and clinical practice are concurrent in the following nursing areas: medical-surgical and geriatric, maternal/child, and psychiatric/mental health nursing. Integrated curriculum content also includes the following topic areas: personal hygiene, human sexuality, client abuse, cultural diversity, nutrition, pharmacology, legal, social and ethical aspects of nursing, nursing leadership and management.

Independent/Directed Study
Independent/directed study allows individualized coursework to be designed and tailored to meet a student’s particular needs. Enrollment in independent/directed study courses requires prior program approval. The student may not be required to be on campus while completing the work. Independent/directed study courses involve supervised independent study and/or research in a subject area proposed for in-depth study. Courses may comprise special study, directed readings and/or directed research structure as determined by the instructor and student at the time of the initial proposal.

Independent study courses are open to eligible students. A maximum of eight units are permitted, unless individual program guidelines specify otherwise. Permission of the instructor is always required.

The Academic Community
Community Service and Service Learning
The intent of the MMDSON’s community service and service learning requirement of 60 hours is to fulfill the mission of the University. The community service learning will also provide students with an opportunity to apply the theories and competencies learned in their core and program courses to the real needs of the community.

To facilitate achievement of these community service learning goals, volunteer experiences must be conducted in a setting or with a population that meets at least one of the following criteria: 1) low income; 2) medically disadvantaged, underserved or under-represented; or 3) other special populations or communities as defined by course requirements (e.g., hospice patients, victims of domestic violence, students with special learning needs, etc.).

Requirements for Admission
Admission is a competitive process in which each student’s entire application is individually reviewed. The applicant’s previous academic record, i.e., Grade Point Average (GPA) and performance on the Graduate Record Exam (GRE) are used to identify the student’s potential in fulfilling the CDU mission, and the ability to succeed in this fast-pace rigorous program.

Entry Level Master of Science in Nursing (ELM)
All applicants to the ELM program must satisfy the following minimum application requirements.

1. Submission of the online University Application and a non-refundable $100 application fee.
2. An earned baccalaureate (or higher) degree from a regionally accredited college/university or the equivalent of a U.S. bachelor degree from a regionally accredited college/university based on a University approved foreign credential evaluation.
3. Official academic transcripts from all previous colleges and/or universities attended. Transcripts will be considered official if forwarded directly to the University Admissions Office (do not send to the Department Chair) by the institutions attended, or if hand-delivered, with official seal intact. All official documents become the University’s property. Failure to complete the application or to provide accurate and authentic documents may result in the denial of admission.
4. Completion of 9 pre-requisite courses; English, Sociology, Psychology, Nutrition, Human Anatomy with a lab, Human Physiology with a lab, Microbiology with a lab, Statistics and Speech/Communication (see specific qualifiers below).

5. An absolute cumulative GPA of 3.0 is required;

6. At least 75% on the cumulative HESI Admission Assessment (A2) Exam.

7. Proficiency in English is mandatory. All applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL, http://www.toefl.org). The minimum overall score is 84; 24 is the minimum score in the speaking section, and 24 is the writing section minimum score.

8. The applicant’s goals must be congruent to those of the MMDSON, the University and the applicant’s chosen specialty. A personal goal statement is required, which may be submitted online via the CDU online application system, in a .pdf or Word format. The goal statement is an opportunity for students to tell the admissions committee about their career plans upon completion of their graduate degree. Before writing a goal statement, prospective students should review carefully information about the Entry Level program on CDU’s website so that they can clearly indicate to the admissions committee that they are a good fit with the program.

9. Three (3) recommendations using the recommendation forms found on the CDU Application website, http://www.cdrewu.edu/Apply. Recommendations from family, friends or other students are NOT accepted. Recommendations should address the following areas: a. relationships with work (paid or voluntary) associates, b. work competence, c. communication and interpersonal skills with persons of diverse backgrounds, d. leadership skills or potential, and e. values, ethical standards, responsibility and initiative.

10. Computer proficiency is required (especially word processing and internet/web skills).

### ELM Required Pre-requisites and Qualifiers

All science prerequisites must be completed within 7 years of initial application submission.

- English Composition (3 units)
- Sociology (3 units)
- Psychology (3 units) Qualifier – Introductory psychology, general psychology and developmental psychology are acceptable
- Nutrition (3 units) Qualifier – Eligible courses must include the life-span of the human*
- Human Anatomy w/ lab (4 units)* Qualifier – If anatomy and physiology are combined, a minimum of 8 semester units will be acceptable
- Human Physiology w/ lab (4 units)* Qualifier – If anatomy and physiology are combined, a minimum of 8 semester units will be acceptable
- Microbiology w/ lab (4 units)*
- Statistics (3 units) Qualifier – Business statistics, biostatistics, epidemiology, statistics, patients and populations, etc. are acceptable
- Speech/Communication (3 units)** Qualifier – Group communication, storytelling, debate, interviewing, etc. are acceptable

All prerequisites must be completed at a regionally accredited U.S. Institution (exceptions may be made on a case-by-case basis).

All science prerequisites must be completed with a grade of “B” or better (a grade of “B-” or lower is not acceptable).*

All coursework from non-US institutions must be evaluated for U.S. equivalency by an approved foreign credential evaluation service. University approved evaluation services are listed under International Students section of this Catalog.

English Composition may be taken outside the U.S. in countries whose native language is English.

Will accept Spanish for Speech/Communication**.

### Assessments And Examinations

Upon acceptance, ELM students will be required to take the HESI entrance exam prior to the first day of class.

### Associate Degree in Nursing (ADN) to MSN

All applicants to the ADN to MSN program must satisfy the following minimum application requirements.
1. Submission of the online University Application and a non-refundable $100 application fee.

2. An earned associate degree in nursing and a baccalaureate or master’s degree in a general discipline other than nursing.

3. Official academic transcripts from all previous colleges and/or universities attended. Transcripts will be considered official if forwarded directly to the University Admissions Office (do not send to the Department Chair) by the institutions attended, or if hand-delivered, with official seal intact. All official documents become the University’s property. Failure to complete the application or to provide accurate and authentic documents may result in the denial of admission.

4. Completion of both Nutrition and Statistics classes prior to entering the program (see specific qualifiers below).

5. An absolute cumulative GPA of 3.0 is required; however, the minimum GPA requirement may be waived on a case by case basis.

6. At least 75% on the cumulative HESI Admission Assessment (A2) Exam.

7. Proficiency in English is mandatory. All applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL, http://www.toefl.org). The minimum overall score is 84; 24 is the minimum score in the speaking section, and 24 is the writing section minimum score.

8. The applicant’s goals must be congruent to those of the MMDSON, the University, and the applicant’s chosen specialty. A personal goal statement is required, which may be submitted online via the CDU online application system, in a pdf or Word format. The goal statement is an opportunity for students to tell the admissions committee about their career plans upon completion of their graduate degree. Before writing a goal statement, prospective students should review carefully information about the Entry Level program on CDU’s website so that they can clearly indicate to the admissions committee that they are a good fit with the program.

9. Three (3) recommendations using the recommendation forms found on the CDU Application website, http://www.cdrewu.edu/Apply. Recommendations from family, friends or other students are NOT accepted. Recommendations should address the following areas: a. relationships with work (paid or voluntary) associates, b. work competence, c. communication and interpersonal skills with persons of diverse backgrounds, d. leadership skills or potential, and e. values, ethical standards, responsibility and initiative.

10. Computer proficiency is required (especially word processing and internet/web skills).

11. Licensure as a registered nurse in California (and home state of residence). Out-of-state students will not be permitted to start clinical rotations without a CA RN license.

**ADN to MSN Required Pre-requisites and Qualifiers**

- Nutrition (3 units) Qualifier – Eligible courses must include the life-span of the human.*

- Statistics (3 units) Qualifier – Business statistics, biostatistics, epidemiology, statistics, patients and populations, etc.

All science prerequisites must be completed with a grade of “B” or better (a grade of “B-” or lower is not acceptable).*

All prerequisites must be completed at a regionally accredited U.S. Institution (exceptions may be made on a case-by-case basis).

All coursework from non-US institutions must be evaluated for U.S. equivalency by an approved foreign credential evaluation service. University approved evaluation services are listed under International Students section of this Catalog.

**Master of Science in Nursing (MSN) – Family Nurse Practitioner FNP**

Applicants to the FNP specialty must satisfy the following minimum application requirements.

1. Submission of the online University Application and a non-refundable $100 application fee.

2. An earned baccalaureate (or higher) degree from a regionally accredited college/university or the equivalent of a U.S. bachelor degree from a regionally accredited college/university based on a University approved foreign credential evaluation.

3. Official academic transcripts from all previous colleges and/or universities attended. Transcripts will be considered official if forwarded directly to the University Admissions Office (do not send to the Department Chair) by the institutions attended, or if hand-delivered, with official seal intact. All
official documents become the University’s property. Failure to complete the application or to provide accurate and authentic documents may result in the denial of admission.

4. Completion of one prerequisite course: Statistics
5. An absolute cumulative GPA of 3.0 is required; however, the minimum GPA may be waived on a case by case basis.
6. Proficiency in English is mandatory. All applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL, http://www.toefl.org). The minimum overall score is 84; 24 is the minimum score in the speaking section, and 24 is the writing section minimum score.
7. The applicant’s goals must be congruent to those of the MMDSON, the University, and the applicant’s chosen specialty. The applicant’s goals must be congruent to those of the MMDSON, the University, and the applicant’s chosen specialty. A personal goal statement is required, which may be submitted online via the CDU online application system, in a .pdf or Word format. The goal statement is an opportunity for students to tell the admissions committee about their career plans upon completion of their graduate degree. Before writing a goal statement, prospective students should review carefully information about the Entry Level program on CDU’s website so that they can clearly indicate to the admissions committee that they are a good fit with the program.
8. Three (3) recommendations using the recommendation forms found on the CDU Application website, http://www.cdrewu.edu/Apply. Recommendations from family, friends or other students are NOT accepted. Recommendations should address the following areas: a. relationships with work (paid or voluntary) associates, b. work competence, c. communication and interpersonal skills with persons of diverse backgrounds, d. leadership skills or potential, and e. values, ethical standards, responsibility and initiative.
9. Computer proficiency is required (especially word processing and internet/web skills).
10. Licensure as a registered nurse in California (and home state of residence). Out-of-state students will not be permitted to start clinical rotations without a CA RN license.
11. A minimum of one year of work experience as a registered nurse is desired.

**Master of Science Specialties Required Pre-requisites and Qualifiers**

- Statistics (3 units) Qualifier – Business statistics, biostatistics, epidemiology, Statistics, patients and populations, etc. are acceptable.

All prerequisites must be completed at a regionally accredited U.S. Institution (exceptions may be made on a case-by-case basis).

All coursework from Non-US institutions must be evaluated for U.S. equivalency by an approved foreign credential evaluation service. University approved evaluation services are listed under International Students section of this Catalog.

**Master of Science in Nursing (MSN), Advance Nurse Education (ANE)**

All applicants to the MSN-ANE programs must satisfy the following requirements:

1. Submission of the online University Application and a non-refundable $100 application fee.
2. An earned Bachelor of Science in Nursing degree from a regionally accredited college/university or the equivalent of a U.S. Bachelors degree in nursing from a regionally accredited college/university based on a University approved foreign credential evaluation.
3. An absolute cumulative GPA of 3.0 is required; however, the minimum GPA may be waived on a case by case basis.
4. Proficiency in English is mandatory. All applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL, http://www.toefl.org). The minimum overall score is 84; 24 is the minimum score in the speaking section, and 24 is the writing section minimum score.
5. The applicant’s goals must be congruent to those of the MMDSON and the University. The applicant’s goals must be congruent to those of the MMDSON, the University, and the applicant’s chosen specialty. A personal goal statement is required, which may be submitted online via the CDU online application system, in a pdf or Word format. The goal statement is an opportunity for students to tell the admissions committee about their career plans upon completion of their graduate degree.
6. Three (3) recommendations using the recommendation forms found on the CDU Application website, http://www.cdrewu.edu/Apply. Recommendations from family, friends or other students are NOT accepted. Recommendations should address the following areas: a. relationships with work (paid or
lates the potential, and work competence, communication and interpersonal skills with persons of diverse backgrounds, leadership skills or potential, and values, ethical standards, responsibility and initiative.

7. Computer proficiency is required (especially word processing and internet/web skills).
8. Licensure as a registered nurse in California (and home state of residence). Out-of-state students will not be permitted to start clinical rotations without a CA RN license.
9. A minimum of one year of work experience as a registered nurse is desired.

Admission Requirements for International Applicants & Applicants with a Foreign Degree
1. Completion of a nursing bachelor degree, if available in the country of origin, or the equivalent of a U.S. bachelor degree in nursing from a regionally accredited college/university based on a University approved foreign credential evaluation.
2. Note: non-U.S. (and/or non-English) transcripts must be submitted for evaluation; please refer to the International Students Policy of this Catalog for more information regarding University approved foreign credential evaluation agencies.
3. Scholastic record comparable to that reflected by a 3.0 Grade Point Average.
4. Completion of one prerequisite course: Statistics
5. Proficiency in English is mandatory. All applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL, http://www.toefl.org). The minimum overall score is 84; 24 is the minimum score in the speaking section, and 24 is the writing section minimum score. Consult with Nursing Student Affairs for any questions on TOEFL examinations and scoring.
6. International students need to be licensed in their country of origin. If they are going to perform direct patient care activities locally, they will need to obtain California registered nurse licensure before the start of a clinical rotation.
7. One year of recent work experience as a registered nurse is desired, related to the prospective field of study.
8. Computer proficiency is required, (especially word processing and internet/web skills).

PLEASE NOTE: Admission requirements are only for California State Board of Registered Nursing. Other State Boards of Registered Nursing FNP certification requirements may be different.

International and Foreign Applicants Required Pre-requisites and Qualifiers
- Statistics (3 units) Qualifier – Business statistics, biostatistics, epidemiology. Statistics, patients and populations, etc. are acceptable.

All prerequisites must be completed at a regionally accredited U.S Institution (exceptions may be made on a case-by-case basis).

All coursework from Non-US institutions must be evaluated for U.S. equivalency by an approved foreign credential evaluation service. University approved evaluation services are listed under International Students section of this Catalog. (exceptions may be made on a case-by-case basis).

Entry Level Master of Science in Nursing (ELM)

Program Description
This is a two-year program leading to a Master’s of Science in Nursing degree. The first year of the CDU ELM program consists of courses that provide the foundation for safe nursing practice while immersing students in a variety of classroom, hospital and community based experiences.

Courses are sequenced from simple to complex so that students are able to build upon prior learning as they progress through the program.

Through a series of designed learning activities, students are able to learn how to care for patients and their families within a supportive environment that promotes the spirit of inquiry and application of research to nursing practice. The second year of the program provides coursework in nursing research, issues/theory, community health and a final clinical immersion experience in a preceptored course where students can further develop the professional RN role through patient care experiences at the point of care, delegation, prioritization of care, interdisciplinary communication, and team management. Students are eligible to sit for the NCLEX-RN licensing exam after year 2, semester 1. After passing the NCLEX-RN students continue into the upper level clinical nurse leader graduate courses.
Clinical and Program Requirements
The pre-licensure curriculum requires students to complete 945 hours of clinical practice. In addition to actual clinical hours, the student will spend additional hours studying, preparing and completing assignments, usually triple the amount of time spent in actual class or role activities, depending on the time necessary to complete assignments and meet individual objectives.

Prior to taking clinical courses, students must satisfy all prerequisites and submit important documents for instructor verification. Students must provide documentation of all the requirements listed on the ELM Clinical Requirements form located in the MMDSON Student Handbook.

These requirements include uploading into the Certified Background portal the following information:

- Complete physical examination
- Drug screening
- Health insurance, private or through the University
- Annual CPR certification
- Training in universal precautions and blood borne pathogens
- Training in HIPAA requirements
- Annual PPD/2 step process or chest x-ray if positive
- Immunity status: Hepatitis B titer series, Rubella, Rubella & Varicella
- Annual Flu vaccine, if required by clinical site.

All students will be required to complete a criminal background check before starting their first clinical lab/practicum. Some agencies also require live scan fingerprinting in addition to background checks. A positive criminal record shall not automatically disqualify a student from continuing in the program. If a record of criminal activity is revealed through the background check, the student shall be counseled by the Program Director regarding their continuation in the program and implications for licensure.

In addition to the above, students may be required to provide additional documentation as required by specific agencies. Students must complete the clinical agency orientation before starting a clinical rotation. Students must complete all required clinical documentation in a timely manner or they will not be allowed to progress in the cohort.

Entry Level Nurse Program
Clinical Nurse Leader (CNL) Specialty

Overview
This master's degree-prepared clinician puts evidence-based practice into action to ensure that patients benefit from the latest innovations in care delivery. The CNL evaluates patient outcomes, assesses cohort risk and has the decision-making authority to change care plans when necessary. The CNL is a leader in the health care delivery system, and the implementation of this role will vary across settings (American Association of College of Nursing [AACN], 2005). The MMDSON courses will prepare students to design, implement and evaluate client care by coordinating, delegating and supervising the care provided by the interdisciplinary health care team. The CNL role is not one of administration but rather a provider and manager of care for individuals and groups. The graduates, in the role of clinical nurse leader, will provide comprehensive care for patients in the hospital and the
community, manage the work environment, engage in case management and other graduate-level nursing functions, as well as teach and precept nursing students. Success is achieved when students meet or exceed the program outcomes and fulfill their personal and professional goals for their career and stage of life.

The Entry Level Master of Science in Nursing Track is designed for non-nurses holding baccalaureate degrees in another field, who are interested in completing course requirements leading to a graduate degree in nursing. Graduate of this program are eligible to sit for the NCLEX-RN examination and the Clinical Nurse Leader (CNL) certification examination.

**Role and Qualifications**

Graduates of this specialty are prepared at the generalist level to assume the CNL role at the point of care. The CNL is responsible for the comprehensive clinical management of individuals, families and communities across the continuum of care in a variety of clinical settings, including virtual environments. The CNL designs and implements the plan of care, and is accountable for improving clinical outcomes and care processes in a quality, cost effective manner, as a key member of an interdisciplinary team of healthcare professionals.

**Curriculum**

This 80 credit Entry Level Master of Science in Nursing track is completed through full-time study in preceptored clinical settings. The following course sequence is required for this curriculum of study. Students are admitted to this program in either the Spring or Fall semester of each academic year as a cohort.

The Board of Registered Nursing requires that any pre-licensure program offer a 30-unit option for licensed vocational nurses. This option is for LVN’s that do hold a baccalaureate degree and are interested in taking courses to prepare for the NCLEX-RN exam. Anyone interested in this option should contact the school of nursing for more detail.

Family Nurse Practitioner Specialty  
(BSN to MSN)

Overview
The Family Nurse Practitioner (FNP) Master of Science in Nursing Specialty prepares advanced practice nurses to manage the care of individuals and families across the lifespan. The specialty is designed for nurses holding baccalaureate degrees, who are interested in completing course requirements leading to a graduate degree in nursing. Graduates of this program are eligible to sit for the FNP national certification examinations through the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners (AANP).

Clinical and Program Requirements
The MSN program requires that students complete 645 hours of clinical practice in the FNP specialty. In addition to actual clinical hours, the student will spend additional hours studying, preparing and completing assignments, usually triple the amount of time spent in actual class or role activities, depending on the time necessary to complete assignments and meet individual objectives.

Role and Qualifications
Graduates of this specialty assume responsibility for the provision of healthcare in the areas of health promotion, disease prevention and clinical management of primary care conditions. The FNP develops collaborative relationships with other healthcare providers, designs and implements the plan of care, and is accountable for improving clinical outcomes and care processes in a quality, cost effective manner. The emphasis of this specialty is on meeting the healthcare needs of underserved populations.

Curriculum
The 51-credit FNP Master of Science in Nursing Specialty, which is completed through full-time or part-time study in preceptored clinical settings provides a flexible, executive-education format. All clinical courses are offered as immersion practicum experiences, conducted in faculty approved, in-person, preceptored clinical settings.

The FNP specialty is a 4 semester full-time program with opportunity for part-time enrollment. The program begins each semester in the Fall, Spring and Summer. Students may transfer a maximum of 12 units for courses completed at an accredited four year academic institution. Clinical experiences are offered in a variety of clinical settings, where students work in preceptored settings to acquire clinical skills in structured environments designed to ensure that all students will satisfy the 645 clinical hours required to complete the program.

The FNP graduate is prepared to deliver care as a member of a healthcare team and to improve the availability of culturally relevant primary healthcare in underserved populations. Graduates possess the ability to evaluate the health status of an individual, diagnose and treat acute illness, manage chronic diseases, deliver preventive care and counsel individuals on psychosocial problems in collaboration with a supervising physician.

Post Master Certificate – Advance Nurse Education

Post Master Certificate Overview/ Advance Nurse Education (PMC-ANE) prepares advanced practice nurses to become knowledgeable nurse educators ready to teach in diverse settings. Skilled nurse educators are in demand to train not only student nurses but also practicing nurses, consumers, patients and others.

The ANE Specialty is designed for Registered Nurses (RNs) holding a Master of Science in Nursing who wish to move into nursing education. Graduates of this program are eligible to sit for the NLN Certified Nurse Educator (CNE) examination.

Curriculum

The courses and credits required will be based on review of each student’s transcripts and prior courses completed. The core educational courses including the practicum in nursing education must be completed. The PMC-ANE specialty is a 4 semester full-time program with opportunity for part-time enrollment. The program begins each semester in the Fall, Spring, and Summer. Students may transfer in course credit for courses completed at an accredited academic institution in accordance with the School of Nursing Transfer Credit Policy.

Post Master Certificate – Family Nurse Practitioner

This FNP certificate program prepares master-degreed nurses to manage the care of individuals and families across the lifespan. This specialty is designed for nurses holding master degrees in nursing who are interested in completing course requirements leading to the FNP certification. Graduates of this program are eligible to sit for the FNP national certification examinations through the American Nurses Credentialing Center (ANCC), or the American Academy of Nurse Practitioners (AANP).

Role and Qualifications
Graduates of this specialty assume responsibility for the provision of healthcare in the areas of health promotion, disease prevention and clinical management of primary care conditions. The FNP develops collaborative relationships with other healthcare providers, designs and implements the plan of care, and is accountable for improving clinical outcomes and care processes in a quality, cost effective manner. The emphasis of this program is on meeting the healthcare needs of underserved populations. Applicants must meet with the Director of Student Affairs to discuss specific program objectives.

Curriculum
The 39-credit Post Master Certificate specialty, completed through part-time study in preceptored clinical settings, provides a flexible, executive-education format in which the theoretical content of all courses is taught one weekend session per month each semester. The remainder of each semester is taught using both a face-to-face and web-enhanced pedagogical approach for student/faculty collaboration, faculty presentations, and clarification of theoretical content. All clinical courses are offered as immersion practicum experiences, conducted in faculty approved, in-person, preceptored clinical settings.

ADN to MSN-FNP Program

Role and Qualifications
Graduates of this specialty assume responsibility for the provision of healthcare in the areas of health promotion, disease prevention and clinical management of primary care conditions. The FNP develops collaborative relationships with other healthcare providers, designs and implements the plan of care, and is accountable for improving clinical outcomes and care processes in a quality, cost effective manner. The emphasis of this program is on meeting the healthcare needs of underserved populations.

Curriculum
The 58-unit FNP Master of Science in Nursing Specialty, which is completed through full-time or part-time study in preceptored clinical settings, provides a flexible, executive-education format in which the theoretical content of all courses is taught one-weekend sessions per month each semester. The remainder of each semester is taught using both a face-to-face and web-enhanced pedagogical approach for student/faculty collaboration, faculty presentations, and clarification of theoretical content. All clinical courses are offered as immersion practicum experiences, conducted in faculty approved, in-person, preceptored clinical settings. The following course sequence is required for this curriculum of study.

Course Descriptions

NUR 500 Concepts of Professional Nursing
2 Units
This course provides an overview of the professional nursing role within the healthcare environment, including nursing theory and evidence-based nursing practice. Highlights of the influence of culture and professionalism. Pre-requisite: ELM admission; Co-requisites: NUR 511, 516, and 520

NUR 510 Pharmacology
3 Units
Presents core drug knowledge, pharmacotherapeutics, and pharmacodynamics. Emphasizes drug classification by categories affecting various body systems. Pre-requisite: ELM admission, NUR 500, 511, 516, 520; Co-requisites: NUR 512, 621

NUR 511 Fundamentals of Nursing and Care of the Older Adult
6 Units
Concepts of physiological integrity, psychosocial integrity and effective care environments, and health promotion/maintenance are examined. This course focuses on beginning competencies required for care of adult and older adult clients with acute and chronic health problems. Pre-requisite: ELM admission; Co-requisites: NUR500, 516, and 520. 135 clinical hours

NUR 512 Medical Surgical Nursing
8 Units
This course provides nursing theory and care of adult and older adult clients with medical-surgical health alterations. Includes diagnostic and therapeutic nursing interventions relevant to medical surgical alterations. Emphasizes the nursing process and critical thinking to manage acute and chronic medical-surgical, remedial, supportive and rehabilitative problems. Pre-requisites: NUR 500, 511, 516, and 520 all with grade of “B” or higher; Co-requisites: NUR 510 and 621. 225 clinical hours

NUR 513 Nursing of Culturally Diverse Families Maternal Child/Pediatrics
8 Units
Students will apply the nursing process in the care of diverse and multicultural women, newborns, children and their families. Emphasis is placed on the integration of theory from nursing and related fields including genetics/genomics, growth and development, standards of clinical practice, evidence-based care, communication, family systems, and critical thinking in planning and providing care. Pre-requisites: NUR 510, 511, 512, 516, 520, 621, all with grade of “B” or higher; Co-requisites: NUR 515, 642. 225 clinical hours

NUR 515 Community Health Nursing
5 Units
Theories of epidemiology, community health, and nursing are synthesized to help students facilitate the adaptation process of clients, families, and communities to attain and maintain optimal health. Emphasis is placed on family healthcare, assessment of community health needs, advocacy and collaborative role. Pre-requisites: NUR 500, 510, 511, 512, 516, 520, and 621 with a grade of “B” or higher; Co-requisites: NUR 513 and 642. 90 clinical hours

NUR 516 Pathophysiology
3 Units
This course covers principles of normal body functioning, pathophysiologic and psychological changes occurring with altered health across the lifespan. Pre-requisites: None; Co-requisites: NUR 500, 511, and 520.

NUR 517 Psychiatric Mental Health
4 Units
This course provides psychiatric/mental health nursing including scope of practice, roles and responsibilities, and social, political, and economic issues related to mental health/illness. Relevant theories and evidence-based research. Pre-requisites: NUR 500, 510, 511, 512, 513, 515, 516, 520, 621, and 642; Co-requisites: NUR 618 and 639. 90 clinical hours

NUR 520 Physical Assessment
4 Units
This course focuses on health assessment for professional practice. Basic knowledge and skills necessary to perform assessments including interviewing, history taking, and foundational physical assessment skills are required. Emphasizes developmental and culturally competent assessment skills and ability to recognize deviations from normal across the lifespan. Pre-requisite: ELM admission; Co-requisites: NUR 500, 511 and 516. **45 clinical hours**

**NUR 610 Advanced Pharmacology**
3 Units
This course expands students’ knowledge of clinical pharmacology to provide a sound basis from which to engage in prescriptive drug management. Pharmacodynamics, pharmacokinetics and pharmacotherapeutics of drug classes are explored through a variety of teaching-learning methodologies, including seminar discussion, problem-based case study presentations, focused readings, and web-based exercises. Co-requisites: NUR 516 and 520.

**NUR 616 Advanced Pathophysiology**
3 Units
This course provides the pathophysiologial principles and concepts essential for performing advanced clinical assessments, differential diagnoses, and therapeutic decision making. Describes the disordered physiology and clinical consequences resulting from common disease processes. Analyses of the biophysical rationale for selecting and interpreting data used in the management of plans of care throughout the lifespan will be presented. Seminar discussions focus on alterations in normal functions of major organ systems. Through problem-solving exercises and case studies, students are encouraged to recognize the pathophysiologic basis of clinical findings associated with disease processes. This course serves as an essential link between the basic sciences and clinical management.

**NUR 618 Advanced Medical Surgical**
5 Units
Provides nursing theory for the care of adult and older adult clients with complex health alterations; includes diagnostic and therapeutic nursing interventions relevant to advanced medical-surgical health alterations.

Emphasizes the importance of collaboration, accountability, and advocacy in the leadership role. Pre-requisites: NUR 500,510,511,512,513,515,516,520,621,642; Co-requisites: NUR 517 and 639. **135 clinical hours**

**NUR 619 Residency I (Clinical Internship)**
6 Units
This preceptored patient care clinical course builds on the knowledge and skills obtained in the nursing curriculum. Student will synthesize clinical management, assessment, and interpretation of diagnostic data of complex health care problems seen in the tertiary care setting. Students will work closely with bedside clinical nurses as they transition to the role as a professional practicing nurse Pre-requisite: completion of all pre-RN licensure clinical courses with grades of “B” or higher, NUR 500,510,511,512,513,515,516,517,520,618,621, 639,642. Co-requisites: NUR 627 and 628. **225 Clinical hours**

**NUR 620 Advanced Physical Assessment**
4 Units
This course presents information that expands the student's knowledge base related to current health patterns across the lifespan. In addition, faculty will facilitate the students' acquisition of advanced skills in the collection of subjective data and the performance of an adult physical and mental status examination. Students interpret data acquired through the assessment of adults and the results of laboratory and diagnostic tests. **45 clinical hours**

**NUR 621 Advanced Nursing Theory**
3 Units
This course provides a study and critique of the organization and development of nursing knowledge. Students will discuss and compare concepts and theories from nursing, humanities, and science with emphasis on their significance to the practice of professional nursing across the lifespan. Pre-requisites: NUR 500, 511, 516, and 520; Co-requisite: NUR 510, and 512.

**NUR 622 Education Theories**
3 Units
This course explores major research-based theories of adult learning and knowledge development in nursing. These theories will be examined for their utility across a variety of settings and/or levels of education. Utilization of the evidenced-based teaching-learning and electronic communication will be explored. The course will analyze specific learning theories which address the needs of multicultural learners.

**NUR 623 Evaluation Methods in Nursing Education**  
3 Units  
This course focuses on testing, measurement, and evaluation methods in nursing education. It is designed to prepare nurse educators to implement student and program assessment strategies. Various modalities for assessment, testing, validating, and evaluating learning will be examined. Principles of test construction, item analysis, clinical evaluation, and program outcomes will be explored. Prerequisite: NUR 622

**NUR 624 Curriculum and Instruction**  
3 Units  
This course is designed to introduce students to the components of educational program processes. Classic and contemporary philosophies, theories and research on the development of nursing education programs will be analyzed. Principles of program design, development of a teaching syllabus, assessment of nursing education and staff development are the key concepts of this course. Prerequisite: NUR 622 (concurrent)

**NUR 625 Practicum in Nursing Education**  
3 Units  
This is the student’s first practicum experience to analyze the role and function of nurse educator in the academic and clinical settings. This course provides the student with a guided experience in development and implementation of the syllabus, course modules, testing, and measurement. The practicum will focus on nurse educator planning, developing, implementing, and evaluating methods of instruction. Prerequisites: NUR 622, 623; Concurrent: NUR 624.

This is a continuation of NUR 625. Under supervision of a nurse educator/administrator students design, implement and evaluate educational plans based on the chosen practicum site. The role of the nurse educator in higher education, staff development in the health care environment and community setting is analyzed. Prerequisites: NUR 622, 623, 624, and 625 with grades of “B” or higher. 90 clinical hours

**NUR 627 Advanced Epidemiology and Biostatistics for Nursing**  
3 Units  
This course presents core epidemiology and biostatistics knowledge and skills that can be used to draw practical conclusions regarding data pertaining to nursing and patient care. Students will become acquainted with the epidemiological and biostatistical concepts in theory and in practice. Students will develop the basic skills necessary to use epidemiological and biostatistical knowledge and methods as the basis for health practice. Pre-requisites: NUR 510, 520, 516, 621, 628, 631, and 632 with a grade of “B” or higher; Co-requisites: NUR 633 and 635

**NUR 628 Health Management and Systems**  
3 Units  
Healthcare delivery for populations is examined as a multidisciplinary system of dynamic interactions among human and social systems, concerned with healthcare delivery, quality and costs. The management of urban health systems addresses structure, process and outcomes of health services including costs, financing, organization, outcomes and accessibility of care. Pre-requisites: NUR 510, 511, 512, 520, 521, 530, and 531 with a grade of “B” or higher; Co-requisites: NUR 513, 522, and 532

**NUR 629 Residency/Internship II**  
8 Units  
This course builds on the concepts from Residency I. The students participate in supervised practicum experiences within a multidisciplinary setting with a focus on the application of the CNL role. Students will design a planned change project which reflects skills necessary for the application, design, implementation, and evaluation of an outcome-based practice model. Pre-requisite: completion of all pre-RN licensure clinical courses with grades of “B” or higher. Pre-requisites (ELM): NUR 500,
NUR 630 Primary Care of Adults and Aged
6 Units
The focus of this course is the development of clinical decision-making skills needed by the primary care provider in the delivery of comprehensive health care, including health promotion, health maintenance, and the diagnosis and treatment of common acute and chronic illnesses. Through assigned readings, lectures, class discussion, case studies, and supervised practicum in multicultural practice settings, the student will begin the process of developing sound clinical judgment as a primary care provider. Pre-requisites: NUR 610, 616, and 620. 180 clinical hours

NUR 631 Health Promotion Disease
Prevention
3 Units
This course provides an introduction to the description and analysis of characteristics of health promotion disease prevention interventional strategies across a variety of environmental settings. The development of modern population centers will be explored with an emphasis on the interactions among population growth, disease (infectious, epidemic, etc.) and public health measures (water supply, sanitation, food purity, and handling). The significance of these characteristics to strategic health care planning, policy formation, health promotion, and disease prevention will be discussed from a public health conceptual framework.

NUR 632 Primary Care of Women and
Children
6 Units
This course will prepare advanced practice nursing students to deliver primary care to women and children within the context of family. This course builds upon the knowledge of primary care obtained in the adult health core theory and practicum courses. The focus of the course will be on methods of health promotion/disease prevention, and assessment and management of common health problems in infants, toddlers, school age children, adolescents, and women from menarche through to the climacteric. Class content will include the direct care provider role in a primary care setting. Health education methodologies and counseling strategies pertinent to a pediatric primary care practice will be explored and intervention strategies developed. Supervised clinical practice with expert primary care clinicians provides the student with opportunities to practice to cognitive and psychomotor skills necessary to provide obstetric, gynecologic and pediatric primary care. Pre-requisite: NUR 630. 180 clinical hours

NUR 633 FNP Practicum
8 Units
This course prepares advanced practice nursing students to deliver primary care services within a variety of supervised clinical practice settings. Students will have the opportunity to investigate the inter-relationships among various socioeconomic, legal, and political factors which impact the structure and function of healthcare delivery systems. Students will be assisted to perform the advanced practice roles of manager, clinician, educator, researcher and consultant in the provision of primary care services across the lifespan to underserved populations. Students will participate in the development of joint protocols, scientific research and development, community service activities and professional endeavors. The purpose of this course is to enable the student to operationalize the role of the family nurse practitioner in the care of individuals, families and communities. Pre-requisites: NUR 630 and 632. 240 clinical hours

NUR 634 Family Theory
3 Units
This course focuses on nursing care of the family as the client throughout the life cycle. It covers the synthesis of family theories and their application in the nursing process of families. It provides the students with opportunities to study families within the acute, primary, and community contexts. Family assessment tools and other nursing intervention strategies will be utilized in the analysis of family systems. Pre-requisites: NUR 616, NUR 610, NUR 620; Co-requisites: NUR 630, NUR 642.
**NUR 635 Nursing Research**  
*3 Units*  
This course examines concepts and issues related to evidence-based practice. The course focuses on the development and refinement of the directed project/research proposal. The proposal includes problem/purpose statements, literature review, measurement tools, work plan, timeline, method and evaluation (analysis/synthesis) plan. Pre-requisites (ELM): NUR 500, 510, 511, 512, 513, 515, 516, 520, 618, 619, 621, 627, 628, 639, 642; Co-requisites: NUR 629.

**NUR 639 Perspectives in Nursing Issues**  
*3 Units*  
This course provides an analysis on socioeconomic trends and issues affecting nursing and health care. Bioethics, healthcare legislation, public policy and roles of professional organizations are examined. Nursing leadership tasks are explored in relation to group dynamics, values clarification, and ethical decision making. Pre-requisites: NUR 513, 522, 523, and 531; Co-requisite: NUR 514.

**NUR 642 Understanding Race/Ethnicity and Cultural/Diversity in Health and Illness**  
*3 Units*  
This course provides culturally sensitive approaches to providing nursing care. Focuses on socio-cultural factors and health disparities that influence health and illness and explores that impact in the use of health care resources. Pre-requisites: Admission and NUR 521; Co-requisites: NUR 528 and 532.
School of Nursing Policies

Attendance
Students must comply with the attendance policy of the University and those provided in each syllabus. Attendance in all nursing courses is conducive to the learning experience of each student. The learning that results from the interaction and sharing with other students is an important and integrative aspect of the learning process. Therefore, attendance at all classes is expected. MMDSON policy states that attendance is required for at least 90% of all clinical and theory courses; if attendance falls below 90% the course grade may be lowered one course grade for every class section missed. It is expected that students will arrive on time for class.

All clinical absences are required to be made up in the Clinical Setting. Excessive absence from clinical sessions may result in the inability to meet course objectives and failure of the course. Absenteeism from a clinical day that is due to unavoidable and serious reason is acceptable. In such circumstances, the student must advise his/her instructor immediately and make arrangements to complete course requirements. Absences must be reported to the instructor prior to the scheduled class time.

Students are responsible for making up any skills lab and clinical lab hours before the next scheduled skills lab or clinical rotation. If the time missed is longer than 3 weeks (for example, 10% of the required clinical experience), the student will be required to repeat the course. Students who must repeat a course will not be allowed to progress with the cohort.

Promotion
To pass a course, students must obtain a cumulative grade of 80% (B). As in all clinical nursing courses, a grade point average of “B” or better is required to progress in the program. Students must pass the assigned “pass/fail” components of the course and must complete all clinical hours.

Clinical rotation and supporting theory components are offered as 15- week sessions. The clinical and theory components of a course must be passed independently of one another to progress to the next rotation within the course. Students who failed the first rotation will not be allowed to progress to the next (second) rotation. Failure of the second rotation within a course results in a failing grade for the entire course and the student will not be allowed to progress to the next course in the sequence.

Students who are failing clinical components, but are receiving a passing grade in the theory, will receive an “F” for the entire course. Nursing courses may only be repeated one time. A student who fails two nursing courses or a clinical theory component may not continue in the nursing program.

Retention
A graduate student is subject to academic probation if a cumulative GPA of at least 3.0 (B) is not maintained. A listing of students subject to probation will be reviewed each semester by the MMDSON. The MMDSON will, with the advice of the Student Advisor, disqualify a graduate student who is on academic probation if the student does not, or cannot, raise the study plan course work cumulative GPA to 3.0 by the completion of the second regular semester following the session in which the cumulative GPA failed to meet the minimum 3.0 standard. A student who has been disqualified from a graduate degree program may apply for readmission to that program or any other after one calendar year following disqualification.

A new study plan must be filed; any student who wishes to use previous course work must have it approved by the MMDSON. Disqualification will remove a student from graduate standing and prevent further enrollment in the University.

Students experiencing academic difficulty are encouraged to enter into a Learning Contract with their advisor or faculty to identify problem areas and develop a strategy to achieve academic/course requirements.

A graduate student may be placed on probation, or may be disqualified, for reasons other than cumulative GPA. These reasons include repeated withdrawal, failure to progress toward an educational objective, non-compliance with an academic requirement, failure to pass the NCLEX-RN examination and inappropriate behavior as defined in the Student Bill of Rights and Responsibilities, and in the Academic
Dishonesty sections of the University Catalog.

Students on probation must meet with their advisor to discuss strategies to achieve and maintain a “B” average. Students on probation at the close of their last semester remain on probation.

Transer and Challenge

Graduate students may be able to transfer a maximum of 12 units in meeting the requirements for the MSN degree. The use of transfer credits on the student’s study plan is subject to the following criteria.

Policy on transfer units and challenge examination. Graduate students may be able to transfer a limited number of course units (12 units) in meeting the requirements for the MSN degree. The use of transfer credits on the student’s study plan is subject to the following criteria.

Each course:

- Must have been taken at a regional or nationally accredited college or university,
- Be acceptable for credit toward a graduate degree at the institution where the course was taken,
- Have been completed with a grade of B or better,
- Not have been used in meeting the requirements for another earned degree,
- The student must have left the previous school in good academic standing, and
- Have been completed within the student’s 7 year time limit.

The Challenge Exam Procedure is as follows:

MSN Entry-Level faculty and/or advisors are responsible for explaining and following the following procedure listed below:

1. The student is directed to speak with the course Faculty of Record (FOR) at least one month prior to the beginning of the class. The FOR will clarify the specific requirements and process for challenging an ELM course.
2. The FOR determines whether the student has adequate knowledge and preparation of the subject matter to challenge the course. Prior course work must be part of preparation for nursing or another health profession (e.g., dentistry, psychology, pharmacy, medicine, physical therapy).
3. If the student is determined to be eligible to challenge the course, the student and faculty member agree on a date and time for the examination. The schedule must allow adequate time for course enrollment if the student is not successful in the challenge.
4. The student obtains the form, “Petition For Credit By Examination” from the Office of Registration & Records. The student completes the “Student” section and the FOR completes the “Instructor” section of the form.
5. Faculty provides the student with the following documents as preparation for the examination:
   - Course outline
   - Detailed course objectives
   - Bibliography and textbook list
   - Style and format of the examination
6. The examination for credit shall be designed for the purpose of evaluating knowledge and/or clinical skills necessary to meet course objectives.
7. Once the examination is completed and graded, the student is informed of the grade. If the grade earned is passing, the student can then decide whether they wish to take the class or accept the exam grade as their final grade for the course. Students who fail the challenge exam are required to take the course.
8. If the student successfully passes the exam, the FOR notifies the MMDSON Office of Student Affairs (OSA). The student brings the form to OSA for completion of the form.
9. The student then brings the completed form to the Registrar’s Office and pays the required fee.
10. Students who successfully challenged the course must include the course on the study list

BRN Licensure: ELM students are prepared to take the licensure examination in the summer following the successful completion of their first year of study in the ELM program. Students are strongly encouraged to register with the BRN to take the NCLEX as soon as possible after completion of the ELM year.
Each student must be licensed as a Registered Nurse in order to enroll in courses associated with the MSN Program. **There can be no exceptions to this rule.** To take advantage of the MS program slot held for them, ELM students MUST pass the NCLEX exam and MUST show evidence of such to the MMDSON Office of Student Affairs (OSA) on or PRIOR to the first day of class.

Students who do not pass the NCLEX exam after the first day of class are encouraged to discuss plans to re-enter their program of study at a later date with their Program Director.
